CITY DOCUMENTS

OF THE

CITY OF LOWELL, MASS.

FOR THE

YEAR 1886-87.

LOWELL, MASS.,
DAILY NEWS PRESS: 76 MERRIMACK STREET.
CITY PRINTERS.
1887.

EXTRACT FROM THE ORDINANCES OF LOWELL.

CHAPTER VIII.—CITY DOCUMENTS.

SECTION 5. All City Documents, except the rules and regulations for the government of the police and fire departments, shall be printed in pamphlet form of the size of the Annual Report of the School Committee.

Secr. 6. All City Documents shall annually be bound together in one volume, under the direction of the City Clerk; and three or more copies shall be deposited in the City Library, and one copy in the library of the Middlesex Mechanics' Association. One copy shall be sent to each City of the Commonwealth, to the library of Harvard College, the Public Library of Boston, the State Library, and the Smithsonian Institution at Washington, and the Old Residents' Historical Association of Lowell.

CONTENTS.

1. Inaugural Address of His Honor, James C. Abbott, Mayor of the City of Lowell, to the two branches of the City Council, January 3, 1887.
2. Municipal Register, containing Rules and Orders of the City Council, etc., with a list of the Government and Officers of the City of Lowell, for 1887.
3. Sixty-first Annual Report of the School Committee of the City of Lowell, together with the Twenty-second Annual Report of the Superintendent of Public Schools, 1886.
4. The Auditor's Fifty-first Annual Report of the Receipts and Expenditures of the City of Lowell, together with the Treasurer's Account, for the Financial Year ending December 31, 1886.
5. Annual Report of the Directors of the City Library, for the year 1886.
6. Annual Report of the Board of Health for 1886.
7. Annual Report of the City Physician and Superintendent of Burials of the City of Lowell, for the year 1886.
8. Annual Report of Births, Marriages and Deaths in the City of Lowell, during the Year, 1886.
9. Annual Report of the Chief Engineer of the Fire Department, for the year ending March 31, 1887.
10. Thirteenth Annual Report of the Water Board of the City of Lowell to the City Council, accompanied by the Reports of the City Engineer and of the Superintendent of Water Works to the Board, January 1, 1887.

11. Annual Report of the Chief of Police, for the year 1886.
12. Annual Report of the City Solicitor, for the year ending February 28, 1887.
13. Sixty-first Annual Report of the Overseers of the Poor of the City of Lowell.
14. Annual Report of the Superintendent of Streets, for the year ending December 31, 1886.
15. Annual Report of the Superintendent of Public Buildings, for the year ending December 31, 1886.
16. Annual Report of the Sealer of Weights and Measures, for 1886.
17. Annual Report of the Superintendent of Street Lamps, for the year 1886.
18. Annual Report of the Superintendent of City Scales and Measurer of Wood and Bark, for the year 1886.
19. Salaries of the Officers of the City of Lowell for the year 1887.

THE INAUGURAL ADDRESS

—OF—

HON. JAMES C. ABBOTT,

MAYOR OF THE CITY OF LOWELL,

—TO THE—

TWO BRANCHES OF THE CITY GOVERNMENT,

JANUARY 4, 1887.

LOWELL, MASS.:
CAMPBELL & HANSCOM, PRINTERS,
1887.

CITY OF LOWELL.

IN COMMON COUNCIL, January 3, 1887.

Order requesting a copy of the Mayor's address for publication.

ORDERED, if the Board of Aldermen concur, That His Honor the Mayor be requested to furnish a copy of his Inaugural Address for publication.

IN COMMON COUNCIL, January 17, 1887.

Read and adopted; sent up for concurrence.

DAVID CHASE, *Clerk.*

IN BOARD OF ALDERMEN, January 17, 1887.

Read and adopted in concurrence.

DAVID W. O'BRIEN, *City Clerk.*

ADDRESS.

GENTLEMEN OF THE CITY COUNCIL:—

By the partiality of the citizens of Lowell, I am called upon, a second time, to make suggestions to the City Council concerning the administration of municipal affairs.

There has been a marked change for the better in the industrial concerns of our people; our population has increased, a greater demand for our manufacturing products has sprung up. It is important that we should realize how necessary to our prosperity it may become, that our city government should be prudent and judicious.

I believe to-day that nothing needs to be urged more earnestly upon members of the City Council than that they expend the hundreds of thousands of dollars that will come into their hands, economically. It devolves upon this City Government, and upon each individual member, to forward the interests of the city in such a manner that, among cities of similar size and means, Lowell may be maintained in the van of municipal progress.

There are many and varied expenditures to be made; our streets must be kept in a safe condition for travel, the sewers be kept in repair and extended, the fire department and the police service

adequately supported, our schools generously cared for, and all paid servants of the city sufficiently compensated. These and all other interests of the city should be managed with economy, and above all, in a non-partisan spirit.

Net ordinary city debt, Dec. 31, 1886	\$956,125.43
Debt of the city on account of Water Works, Dec. 31, 1886.....	\$1,837,000.00
Amount of the several sinking funds for the payment of the same, Dec. 31, 1886.....	517,994.42
Net Debt of the city on account of Water Works, Dec. 31, 1886...	1,319,005.58

Total net debt of the city, Dec. 31,	
1886,.....	\$2,265,131.01
Net debt of the city, Dec. 31, 1885..	<u>\$2,451,723.70</u>
Net debt of the city, Dec. 31, 1886..	<u>2,275,131.01</u>
Decrease in net debt of the city during the year 1886.....	<u>\$176,592.69</u>

The foregoing statement prepared by the City Auditor shows that the city debt has been reduced during the year one hundred and seventy-six thousand five hundred ninety-two dollars and sixty-nine cents (\$176,592.69). There was borrowed from the Commonwealth in 1876, on account of Water Works, fifty thousand dollars (\$50,000), to be paid in ten years.

Payment for this amount was provided for by sinking fund. This fund was closed in June last, and forty-four thousand five hundred and nine dollars and thirty-nine cents (\$44,509.39) was transferred to the city for the payment of the city's note, due June 15, 1886. There has been paid into the several sinking funds seventy-five thousand nine hundred dollars (\$75,900), and in installments on various notes sixty-one thousand three hundred and forty dollars and sixty-one cents (\$61,340.61). The earnings of the sinking funds for the year amount to thirty-nine thousand three hundred and fifty-two dollars and eight cents (\$39,352.08), making a total of one hundred and seventy-six thousand five

hundred ninety-two dollars and sixty-nine cents (\$176,592.69).

As there has been no permanent loan made, this amount of one hundred and seventy-six thousand five hundred ninety-two dollars and sixty-nine cents (\$176,592.69) is the true reduction made in the city debt during the year.

The temporary loans made from time to time for current expenses of the city have all been paid from the tax levy of 1886. These loans have been made at a very low rate of interest; one hundred and three thousand dollars at the rate of two and seven-eighths per cent. per annum; two hundred thousand dollars at the rate of two and seven-eighths per cent., and one hundred thousand dollars at the rate of two and fifteen-sixteenths per cent. per annum. In March the several national banks in the city were asked by the Committee on Finance for proposals for the city's deposit account. All proposals received were examined by the committee and the account was awarded to the First National Bank, at the rate of three and one-fourth per cent. per annum, the highest rate of interest offered by any bank.

SCHOOLS.

The time has not yet come when our public schools can be neglected with impunity. There is no other of our free institutions about which the

people are so sensitive. In the future, as in the past, our schools should be generously supported.

For years there has been a dispute as to what repairs should be charged to the appropriation under the control of the School Committee, and what should be paid from the appropriation of the Committee on Lands and Buildings.

During the past year the School Committee requested the City Council to make sundry improvements in certain school-houses. Some of the improvements urgently required were of a sanitary character. No issue was publicly made between the two boards. Nothing, however, was done because the sub-committee of the City Council, to whom the whole matter was referred, thought the expense should be incurred by the School Committee and paid from their appropriation. It would be well that there should be an ordinance to define the responsibility of each committee, so far as it could be done under the charter and the laws of the Commonwealth.

The whole number of pupils enrolled during the year 1886 was 9,473. The average number belonging was 6,947, and the average daily attendance was 6,309.

The total expenditure, including the evening schools, was \$168,888.18; receipts, \$721.11; net expenditure, \$168,167.07.

EVENING SCHOOLS.

There has been a larger attendance upon the evening schools during the last year than ever before. The good results of the work of the Supervisor are apparent in the improved deportment of the pupils, and in the greater uniformity and efficiency of methods employed.

There is no diminution in the interest manifested in the evening drawing school. The performances of all the classes are admitted to be eminently satisfactory by competent critics in the several departments. It seems especially fitting, in a manufacturing city like Lowell, that the department of industrial and mechanical drawing should continue to be fostered.

SCHOOL-HOUSES.

A new primary school-house is much needed in that part of Centralville located northerly from Aiken Street Bridge.

An addition to the Highland school-house seems to be required, as well as annexes or separate buildings for the accommodation of the over-crowded schools on Dover and School streets.

The cost of new school-rooms and the new Weed street school house was \$18,315.29. There was expended for repairs \$9,858.25; janitors, \$14,112.45; net expenditure, \$42,285.99.

CITY LIBRARY.

As an important adjunct to our educational system, and an institution having a direct influence upon the prosperity of the public, the affairs of the City Library should receive careful consideration and broad and liberal legislation. In particular, it should be your aim to place on its board of directors men who are fitted by taste and education for such a position, who may be expected to manifest an intelligent zeal for its interests.

In accordance with a recommendation made last year, the ordinance relating to the library has been so modified that the election of librarian is placed in the hands of the library directors, and they have elected Mr. Charles H. Burbank, who was placed in the position by the City Council last year. The Superintendent of Schools has also been added to the board of directors, as an *ex-officio* member, and the two members elected annually by the City Council are to be chosen "at large," and not from the wards as heretofore. The most pressing need of the library is for more room, both for the accommodation of the public and the storage and care of books. There are upwards of eight thousand subscribers to the library, and the circulation of books during the year was nearly 120,000, over one thousand volumes being distributed in a single day; and the reading room is daily visited by several hundred persons, a large number of them being

habitual frequenters of it. To consider the erection of a library building by the city in the present state of the municipal finances, may be deemed unreasonable, but, unless private generosity shall in the meantime supply the want, the time is near when this question must be seriously confronted by the City Council.

The total expenditure for the year was \$15,-290.38; the receipts were \$2,630.31; net expenditure, \$12,660.07.

LICENSE LAW.

There is an unmistakable sentiment in the community against a multiplication of licenses to the large number issued last year. There is a demand not only that there should be fewer licenses, but also that the character and record of applicants should be investigated and that the places where sales are to be made, with their appurtenances, should be scrutinized. Licenses should not be issued to women. Every effort should be made to rigorously enforce the law under which licenses are issued.

There was received for licenses \$70,606.67; from this there was paid to the Commonwealth \$17,651.67; leaving to the city treasury a net income of \$52,955.

POLICE.

The proper management of this department of our government is of the highest importance, and from personal knowledge and observation I am convinced that during the past year it has been conducted in an eminently satisfactory manner. Such a degree of harmony has been established among the members that all have worked together for the public interest, and the result has been a very efficient administration of the criminal law in our city. Many important cases have been investigated and brought to a successful end, and there is a feeling among our citizens that their persons and property receive ample protection, and the good order and welfare of our city are in the hands of a capable, vigilant and trustworthy police organization.

Three new day beats were added December 1, one including Ayer City, another, that portion of Ward Four west of Nichols street, and the third comprises lower Market, Prescott, Paige, Shattuck and intersecting streets, with the exception of Post Office square. At the Square one man is now detailed, the increasing business and traffic at that point rendering it necessary for an officer to give it all his attention. The two first-named beats were established in consequence of numerous complaints from those growing sections of our city.

The department now consists of seventy-one officers, rank and file; sixty-five regulars and six

supernumeraries. The total number of arrests for the year ending November 30, 1886, was 3,393, and the number of persons lodged at the station house, 3,313.

The total expenditure for the year was \$68,-624.20; receipts, \$11,744.42; net expenditure, \$56,-879.78.

PUBLIC BUILDINGS.

The public buildings are in good condition with the exception of the police station. It seems that some extensive repairs are needed there in order that business may be carried on in a proper manner. New floorings should be laid and urinals placed in the cells. It is also desirable that a drying room be provided for and an addition made to the number of cells.

The City Treasurer's office has been enlarged and entirely refitted, so that it is now perfectly adapted to meet the requirements of the future. I would repeat my suggestion of last year that the office of the Overseers of the Poor be removed to one of the stores in the government building.

The total expenditure of this department was \$10,625.18; receipts, \$3,641.73; net expenditure, \$6,983.45.

FIRE DEPARTMENT.

The apparatus in active use in the fire department at present consists of three steam fire engines,

four horse and two hand hose carriages, two hook and ladder trucks, one protective wagon, and one chemical engine, all in first-class condition. During the year additions have been made in the houses of Steamer 2, Branch street, Hose 5 on Fourth street, and Hose 7, Fletcher street.

A new brick house for the use of Hose 6 is now being erected on the corner of Central and North streets, and will be ready for occupancy about Feb. 1, 1887, the total cost of which will be about \$8,500. The number of hydrants now in use is 763, 11 having been added in the past year. Ninety alarms of fire have been given, entailing a loss of \$17,632.16. The amount of insurance on the property injured or destroyed amounted to \$107,807, and the amount of insurance paid \$17,542.16, making a net loss of \$90.

Our fire department is deserving of special commendation. We have been very fortunate in escaping serious conflagrations, owing mainly to our excellent system of water works and to the efficient and faithful manner in which this department has been managed.

The entire cost of this department during the year has been \$64,712.98; receipts, \$4,938.59; net expenditure, \$59,774.39.

LIGHTING DEPARTMENT.

The lighting department next calls our attention. This important branch of our city is constantly growing, as new streets are being laid out and the demand for light increases.

During the past year 117 new lights have been added, making a total of 1,285, consisting of 74 electric, 876 gas, and 335 kerosene, the latter being substituted for gasolene the past year.

The appropriation for 1886 was \$45,000 and the expenditure was \$44,282.82.

I would recommend that this department be not stinted, as light is requisite as a preventive of danger and crime.

COMMONS.

The work of cutting down the ledge at the southerly corner of the South common has been continued throughout the year and is nearly completed. Over 1,200 cubic yards of very hard granite rock have been removed. The elevated sidewalk extending along a considerable part of the Thorndike and Highland street sides of the common has been cut down to the street grade, thus getting rid of the steps at the corner of Thorndike and Highland streets.

The material removed from the ledge has been used to fill in the low ground near the pond. This filling might be continued by using material excavated

from sewers and other city work, until an easy slope is obtained from the present filling to the corner of Summer and South streets.

The wooden fence which formerly enclosed the South common is now entirely gone and that around the North common is so rotten and unsightly that it ought to be removed. As the people are allowed to walk on the grass at will a fence seems to be useless.

The amount expended on commons the past year has been \$8,777.44; receipts, \$540.67; net expenditure, \$8,236.77.

ROGERS FORT HILL PARK.

During the past year Messrs. Ethan A. Smith, Eli W. Hoyt, Freeman B. Shedd and Thomas R. Garity, trustees, have conveyed to the City of Lowell, Fort Hill, and the city has accepted the same upon the express trust that it should be kept and maintained as and for a public park for the use, recreation and enjoyment of the people of our city forever. This property was conveyed by the Misses Emily and Elizabeth Rogers to the gentlemen named, as trustees, and they were required, when they had suitably prepared the same for the purpose of a park, to transfer the title thereof to the city.

It is apparent to all that these gentlemen faithfully discharged their trust. Although the last City Council adopted suitable resolutions expressing its

own and our citizens' gratitude for this munificent gift, I feel that this occasion justifies, if it does not require, this public reference to the subject; and while I am aware that the historic spot prepared and used years ago as a fortification in times of war by a tribe of Indians, is the most enduring monument of the thoughtful generosity of the donors, I feel that I should supplement the action of the City Council by emphasizing our obligation to these public benefactors of our city.

In this connection it is proper that I should call your attention to the effort which was made last year to purchase some one hundred and eight acres of land lying on either side of the "Rogers Fort Hill Park," to be added thereto.

Few things contribute as much to the people's health as pure air, and the opportunity for this is afforded by large commons which may be used for the rest, recreation and enjoyment of the people.

It would be very desirable to enlarge the boundaries of our beautiful park, and it should be done if it can be accomplished at a reasonable cost. I commend this matter to your early consideration.

ROADS AND BRIDGES.

During the year considerable work has been done on streets laid out by previous city councils, which include Parker, Pine and Humphrey streets. I consider that too much care cannot be exercised

in the matter of laying out streets, and one city council ought not to lay out work for the next to do; or, which is often the case, the laying out is only a matter of record in the office of the City Clerk, and the streets remain ungraded until some improvement is petitioned for, when the cost of grading is generally increased and often the cause of damage. As soon as a street is accepted by the city it should be wrought to its proper width and grade. What I should consider the best policy to pursue, would be not to accept any street unless it has sufficient width so as not to require widening in the future, and is also properly graded. In all localities where the "common convenience and necessity" require that streets should be laid out which have not been properly constructed by the abutters, I would sincerely recommend that the "Betterment Act" be applied and enforced; for it is only just, where a small section of the city is to receive special benefits that it should be assessed for such improvements and not impose the cost on taxpayers who receive only a general benefit.

The expenditures this year have been largely increased by the laying of horse railroad tracks in several of the streets, which had to be regraded and macadamized. As there is no suitable roadway material to be found within the city, the problem of keeping the streets in good repair at the least expense becomes a difficult one. Paving should be

used in those thoroughfares where the traffic is heavy, but for other streets macadamizing is far superior, and, if thoroughly done, will last a long time and prove to be economical. The wooden paving in Bridge and Dutton streets has been replaced by granite. These portions were the last of that pavement which was laid twelve years ago. Branch street, between Coral and Loring streets, has been paved with granite. The amount of paving laid is about 5,987 square yards. During the year 19,133 lineal feet of edgestones have been set, 6,343 square yards of tar concrete sidewalks laid, and 4,883 square yards of concrete sidewalks top dressed. There has also been top dressed 3,754 square yards of concrete pavement in Pawtucket street.

The bridges are in good repair. Pawtucket bridge roadway has been relaid, and the top planking of the roadway of Central bridge has also been repaired.

The entire amount expended during the year in this department is \$112,752.80, the receipts have been, \$18,181.57 making the net cost \$94,571.23.

The expenditures of this department are larger than any other in this municipality, excepting schools, and I desire to again impress upon the committee on streets that a very great responsibility rests upon them, and to exercise watchfulness and careful management.

SEWERS AND DRAINS.

As the suburban portions of our city are laid out into streets, new dwellings built and water pipes laid, then comes the request for sewers. The sewerage system can never be completed so long as the city continues to grow; therefore each year quite an appropriation will be necessary to meet the imperative demands for new sewers, so that the health of our citizens may be protected so far as it lies within the power of the city government. Most of the main sewers have been built, but probably there will be required this year one in Gorham street from Congress to Manchester street, which would give an opportunity to drain a large and thickly settled district lying on the westerly side of this street, where the wants of a system of sewerage have been felt for a considerable time, but cannot be obtained until this sewer is built.

A main sewer will be required to drain the territory lying west of Mammoth road and north of Woodward avenue in Pawtucketville, and another to drain the territory lying between Bridge and Hildreth streets, which is being rapidly built upon, and at present there are more than one hundred and fifty families without proper means for draining their premises.

As the cost of these main sewers will be considerable, I would earnestly recommend that a permanent loan be made to meet this large expenditure,

and thereby reduce the annual appropriation for ordinary sewer construction. This method would relieve the taxpayers to quite an extent from the burden of paying for sewers which are built as much for future requirements as they are for the present.

During the past year \$49,601.40 have been expended by this department. The receipts have been \$5,858.39, making the net expenditure \$43,-743.01.

The amount of sewers built during the year is as follows: Brick, 2,162 lineal feet; pipe; 6,392 lineal feet, making the total length of the sewerage system about fifty miles.

PAUPER DEPARTMENT.

The cost of this department for the year 1886 was \$59,811.23. This includes all expenses for the poor. The average number supported for the year at the Farm was 336; the present number of inmates is 359. In addition there were 3,037 persons who received partial support. This number was divided among 874 families. There were 545 persons who had no settlement in Lowell but belonged to other cities or towns which were liable for their support.

Wood, coal and provisions to the amount of \$14,311.85 were dispensed to the worthy poor. There has also been expended the sum of \$2,056.75 for support of paupers at St. John's Hospital.

The City Farm is a credit to the city. None are refused a shelter there; no matter what their condition may be, all are cared for alike. I recommend that the appropriation be increased, so that a suitable laundry be added to the institution. I consider it an absolute necessity. For a detailed statement of this department I refer you to the annual report of the superintendent.

STATE AND MILITARY AID.

State aid is paid to those persons who are in receipt of a pension from the United States, which aid is refunded to the city by the state.

Military aid is paid to those indigent soldiers and sailors of the late war who do not receive a pension from the United States. Of the aid paid to this class, one-half is refunded to the city by the state.

The total amount of aid paid to both classes was \$17,982.25. Amount received from the state was \$14,030.75.

HEALTH.

It is one of the highest duties of the City Council to protect the health and lives of its citizens. The capital of the poor man is his health. The interest which he receives upon his capital is the wages of each day's labor. It is as much the duty of the City Government to protect that capi-

tal, principal and interest, as it is to protect our large manufacturing corporations. The health of the people is the real foundation upon which the prosperity of the city depends.

Our first and greatest want is the more rapid extension of our sewer system. I feel assured in my own mind that unless the sewerage of that portion of the city which I have recommended under the head of sewers is rapidly pushed, serious results will follow from the neglect.

I believe that the money appropriated for the health department has been well and judiciously expended. For a detailed statement of this department, I refer you to the annual report of the board of health. The net expenditure for the past year has been \$13,691.70.

WATER WORKS.

I am happy to be able to state that the Lowell Water Works are self-sustaining. They will require no appropriation this year; and the prospect now is that by careful management the water rates may be materially reduced, even before the debt is refunded, which will occur in 1891.

It should be the policy of the city to furnish its citizens with water at as low rates as possible, and eventually the time will come when there will be no "water debt," and the citizens can be

furnished with free water by a small annual appropriation.

This department in all its branches is in excellent condition, and the experience of the past year shows that the city can enjoy the blessing of pure, tasteless water in winter as well as in summer. For the details of the workings of this department I would refer you to the annual report of the water board.

CIVIL SERVICE.

The local Board of Civil Service Examiners, consisting of Messrs. C. E. Paige, J. J. Colton, and C. H. Conant, have held two examinations during the past year.

Twenty-eight persons have been examined, of whom twenty-one were for the clerical and seven for the police service.

Fourteen of the twenty-one passed the examination successfully, attaining a rank above 65 in 100, and of the seven police applicants three obtained the requisite rank.

No requisition for names for service in the police department has been made during the year, but for the purpose of filling positions in the clerical service ten requisitions have been made upon the Board and the persons selected have, without exception, performed efficient service in their respective departments.

CONCLUSION.

Gentlemen, we begin our work at a season favorable by tradition and custom to good resolutions. Let us begin, you, in your several positions, and I in mine, with the resolution that every act of ours shall be in the interest of the whole people of Lowell.

A wise discrimination in the election of heads of departments and other municipal servants is to be commended; a "clean sweep" does not always benefit the public or the sweepers.

Let the affairs of the city be so administered that our fellow citizens and all who come to our gates to find a place to live, work and invest capital may feel it safe to stay and help make Lowell richer, happier and greater.

MUNICIPAL REGISTER:

CONTAINING

RULES AND ORDERS

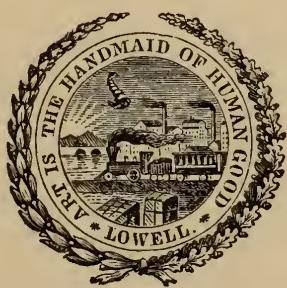

OF THE

CITY COUNCIL,

AND A LIST OF

THE GOVERNMENT AND OFFICERS OF THE CITY OF LOWELL.

1887.

LOWELL, MASS.:
CAMPBELL & HANSOM, PRINTERS.
1887.

JOINT RULES AND ORDERS OF THE CITY COUNCIL.

1. In the month of January joint standing committees shall be appointed as follows :—

- A COMMITTEE ON ACCOUNTS,
- A COMMITTEE ON CLAIMS,
- A COMMITTEE ON EDUCATION,
- A COMMITTEE ON THE FIRE DEPARTMENT,
- A COMMITTEE ON LANDS AND BUILDINGS,
- A COMMITTEE ON MILITARY AFFAIRS,
- A COMMITTEE ON ORDINANCES AND LEGISLATION,
- A COMMITTEE ON PRINTING,
- A COMMITTEE ON STREETS,
- A COMMITTEE ON COMMONS.

Each committee shall consist of two Aldermen and three members of the Common Council, except the Committee on Streets, which shall consist of two Aldermen and five members of the Common Council.

2. Each board shall, in such manner as it may determine, select its own members for any joint committee.

3. In all joint standing committees, except that on Finance, the member first named in the Board of Aldermen shall be chairman ; of the Committee on Finance, the member first named in the Common Council shall be chairman ; and in all joint special committees, the member first named in the board where the business originates, shall be chairman, and shall call the committee together.

4. Reports of committees shall be made to the board first meeting after such reports are prepared and signed.

5. No committee shall act by separate consultation, and no report shall be received unless agreed to in committee actually assembled.

6. It shall be the duty of every joint committee (the Committee on Streets excepted), to whom any subject may be specially referred, to report thereon within five weeks, or ask for further time.

7. The by-laws of the city shall be termed Ordinances; the enacting clause of which shall be—“Be it ordained by the City Council of the City of Lowell, as follows.”

8. An ordinance may originate in either board, and shall be considered in three several stages. It shall first be read for information, and the question shall then be on ordering it to a second reading, but if it has not previously been in the hands of some joint committee it shall first be so referred. When reported back, the recommendations of the committee shall first be acted on. If it shall then be ordered to a second reading, it shall next be examined by a standing committee of that board, who shall see that it is drawn in proper form. When returned by such committee, the question shall be on ordering it to be enrolled. If so ordered, it shall then be sent to the other board, where the same order of proceeding shall be observed. When it has been ordered by both branches to be enrolled, it shall be enrolled by the Clerk of the Common Council, and shall be by him submitted to the proper committee of that board, to ascertain if it has been correctly enrolled. If so reported, the question shall be on passing it to be ordained. If it shall so pass, it shall be signed by the President of the Common Council and be sent to the Board of Aldermen, where it shall take a like course. If passed to be ordained in that board, it shall be signed by the Chairman of the Board of Aldermen, and be sent to the Mayor for his approval.

9. Every joint resolution shall be read in the board in which it is introduced, and the question shall be upon ordering it to a second reading. If so ordered, the question shall then be upon its passage. If passed, it shall be sent to the other board, where the order of proceeding shall be the same. When passed by both boards, the resolution shall be presented to the Mayor for his approval, and when the same shall be in force, shall be enrolled by the Clerk of the

Common Council, and when found correctly enrolled as provided in the case of an ordinance, it shall be signed by the President of the Common Council and the Chairman of the Board of Aldermen, and be presented to the Mayor for his signature, if he approved the original.

10. Joint orders shall require but one reading, and when adopted shall be sent to the Mayor for his approval, except when they relate to a question of a convention of the two branches, or the election of any officer.

11. An ordinance may be rejected in any stage, but may not pass through all its stages in the same day.

12. Every appropriation of money exceeding fifty dollars, shall be by resolution.

13. Each board shall transmit to the other all papers on which any ordinance, joint resolution, or order, shall be founded; and all papers on their passage between the two boards shall be under the signature of their respective clerks, except ordinances and joint resolutions in their last stage, which shall be signed by the presiding officers. If papers come before either board, which have been duly acted upon in the other board, the presiding officer shall so state without reading the endorsements of the clerk, unless the latter are called for.

14. All enrolled ordinances shall be written in a fair and legible hand, without interlineations or erasures, and no enrolled ordinance or resolution shall be amended.

15. When either board does not concur with the other in any ordinance or resolution sent from the other, notice of such non-concurrence shall be given by a written message.

16. In any case of non-concurrence, each board may appoint a Committee of Conference. Such committee shall consist, in each case, of three members who support the vote of their own board. These two committees may meet jointly or separately, and a majority of each shall decide its action.

17. No committee shall enter into any contract with any of its

members, or purchase, or authorize the purchase of, any article therefrom.

18. No chairman of any committee shall audit or approve any bill or account against the city, for any supplies or services, which shall not have been ordered or authorized by the committee.

19. All reports and other papers submitted to the City Council shall be written in a fair hand, without endorsement, except in case of the introduction of an order or resolution. In such case, the member introducing an order or resolution shall subscribe his name at the bottom of the back of the same. All other endorsements upon the back of papers shall be made by the clerks ; and the clerks of the boards respectively shall, on seasonable notice, make copies of any papers to be reported by committees, at the request of the respective chairmen thereof.

20. No business shall be transacted by the City Council in convention, except such as shall have been previously agreed on; unless by unanimous consent.

21. After the annual appropriations shall have been passed, no subsequent expenditure shall be authorized for any object, unless provision for the same shall be made by a specific transfer from some of the appropriations contained in the annual resolution, or by expressly creating therefor a city debt; but no such debt shall be created unless the resolution authorizing the same pass by the affirmative votes of two-thirds of the whole number of each branch of the City Council, said votes to be taken by yeas and nays, excepting in cases of appropriations for the providing of armories for the use of military companies, for the celebration of holidays, and for other purposes of public nature, when a vote of two-thirds of the members of each branch of the City Council present and voting shall be sufficient, but the amount of such appropriations named in this clause shall not exceed one-fiftieth part of one per cent. of the valuation of the city for the same year.

22. In ballottings in joint convention, blanks shall not be counted.

23. When both boards are in session at the same time, neither shall adjourn without giving notice to the other of its intention.

24. Reports of city officers, after being presented, shall remain in the office of the City Clerk two weeks before being printed.

25. All papers, of whatever description, relating to business requiring concurrent action of both boards of the City Council, must be presented to the City Clerk or the Clerk of the Common Council not later than noon on the day the meeting is to be held. Petitions, reports, or other papers, presented after that hour will not be taken up for action thereon until the next meeting.

26. These rules may be suspended for a specific purpose, or amended, whenever twenty-two members of a joint convention of the two branches shall so direct, or whenever a joint order to that effect shall be passed by the votes of six members of the Board of Aldermen and sixteen members of the Common Council.

RULES AND ORDERS OF THE BOARD OF ALDERMEN.

1. At the appointed time the presiding officer shall take the chair, and on the appearance of a quorum, proceed to business.

2. The order of business shall be as follows :—

First. — At all regular meetings, the journal of the last regular meeting, and all intervening meetings of the board, shall be approved without reading, unless the reading be called for by some member of the board.

Second. — Petitions and similar papers.

Third. — Appointments, elections, etc.

Fourth. — New business, which unless otherwise ordered, will take its place at the foot of the Orders of the Day.

Fifth. — Orders of the Day, consisting of unfinished business of the last previous meeting, papers from the Common Council, and such matters as have been introduced as new business. By a vote of six members, any matters in the Orders of the Day may at any time be taken up for immediate consideration.

3. The presiding officer shall decide all points of order, subject to appeal. He may read while sitting, but must rise to put a question. He shall allow debate on a question until the vote has been declared, but not on the verification of a vote ; and on a demand of two members shall take every vote by yeas and nays.

4. When a question is under debate, the presiding officer shall receive no motion but to adjourn, to take up a special assignment, to lay on the table, to postpone to a day certain, to commit, to amend, or to postpone indefinitely. These several motions shall have precedence in the foregoing order, and debate upon any of them shall be confined to the actual motion, and shall not go into the merits of the main question, except on amendment.

5. When a vote has passed, except for adjournment or to lay on the table, any member voting with the majority may move a recon-

sideration to be acted upon at the same meeting. Any member voting with the minority may move a reconsideration to be acted upon at the next meeting, which latter motion shall have priority if made before the motion first mentioned shall have been decided. No motion shall be twice reconsidered.

6. No member shall be interrupted while speaking, but by a call to order, or for the correction of a mistake; nor shall there be any conversation among the members while a paper is being read or a question stated from the chair.

7. When any member is about to speak in debate, he shall rise in his place and respectfully address the presiding officer, shall confine himself to the question under debate, and avoid personality.

8. In the month of January, the following committees shall be appointed :—

- A COMMITTEE ON BILLS IN SECOND READING,
- A COMMITTEE ON ENROLLMENT,
- A COMMITTEE ON LICENSES,
- A COMMITTEE ON LIGHTING STREETS,
- A COMMITTEE ON POLICE,
- A COMMITTEE ON REPAIRS OF STREETS,
- A COMMITTEE ON SEWERS,
- A COMMITTEE ON WEIGHTS AND MEASURES,
- A COMMITTEE ON STATE AID.

The Committees on Licenses, on Police, and on Sewers shall consist of three members each; the other committees shall be composed of two each.

9. Every member present shall be held obliged to vote on all questions, and not to leave without permission, if his presence is necessary to make a quorum.

10. The clerk shall prepare, for the use of the board, a copy of the Orders of the Day, to which shall be added a list of matters laid on the table or postponed to a day certain.

11. When a reference is proposed to more than one committee, the question shall first be upon a standing committee of the Board,

then a special committee, then a joint standing committee, and last a joint special committee.

12. These rules may be amended or suspended whenever two-thirds of the members present may so vote, but a motion to amend shall not be made and finally acted upon at the same meeting.

13. All petitions for the appointment or removal of police officers and watchmen, shall, before any action thereon is taken by the board, be referred to the Committee on Police.

14. All nominations of persons to serve as police officers and watchmen, shall, before action thereon by the board, be referred to the Committee on Police, who shall report upon such nominations at or before the next regular meeting after such reference.

15. All papers of whatever description, which may require action by this board, shall be presented to the City Clerk not later than the hour of noon on the day of each regular meeting. Petitions, reports, and other papers presented after that hour on such day, will not be considered until the next meeting.

RULES AND ORDERS OF THE COMMON COUNCIL.

1. The President shall take the chair precisely at the hour appointed for the meeting, call the members to order, and within ten minutes (or sooner, if a quorum be present,) he shall cause the roll to be called and the names of absentees recorded. The first business after the roll call shall be the approval of the records of the previous meeting, which shall be approved without reading, unless their reading be called for by some member. In the absence of the President, the oldest member present shall call the Council to order, and preside until a President *pro tempore* be chosen.
2. He shall preserve order and decorum; may speak to points of order in preference to other members, rising from his seat for that purpose; and shall decide questions of order, subject to an appeal to the Council by any member.
3. He shall rise to address the Council, to state facts, but may put questions, or read, sitting.
4. He shall declare all votes: but if a vote be doubted, the President shall, without further debate, require the members voting in the affirmative and negative to rise and stand until they are counted, and he shall declare the result.
5. He may call any member to the chair, but such substitution shall not extend beyond an adjournment; and when out of the chair, the President may express his opinion on any subject under debate, and he shall not resume the chair while the same question is pending.
6. All questions shall be propounded in the order in which they are moved, unless the subsequent motion be previous in its nature.
7. After a motion is stated by the President, it shall be disposed of by a vote of the Council, unless the mover withdraw it before a decision or amendment.
8. A motion to adjourn shall always be in order; that and the motion to lay on the table, shall be decided without debate.

9. The previous question shall be in this form: "Shall the main question be now put?" It shall only be admitted when demanded by a majority of members present; and, until it is decided, shall preclude all amendment and further debate of the main question.

10. The yeas and nays shall be taken on any questions upon the request of one-third of the members present.

11. When two or more members happen to rise at the same time, the President shall name the member who shall speak first.

12. When any member is about to speak in debate, or deliver any matter to the Council, he shall rise in his place, and respectfully address the presiding officer, confining himself to the question under debate, and avoid personality.

13. No member shall be mentioned in debate by his name, but may be described by the place he sits in, or such other designation as may be intelligible and respectful.

14. No member speaking shall be interrupted by another, but by a call to order or to correct a mistake. If any member, in speaking or otherwise, transgress the rules of the Council, the President shall, or any member may, call him to order; in which case, the member so called to order shall immediately be seated, until the question of order is decided. If the decision be in favor of the member called to order, he shall be at liberty to proceed; if otherwise, he shall not proceed without the leave of the Council.

15. No member shall speak more than twice to the same question, without obtaining leave of the Council.

16. Whilst the President or any member is speaking, none shall stand up or pass unnecessarily before the person speaking.

17. Every motion shall be reduced to writing, if the President or any member require it.

18. When a question is under debate, no motion shall be received but to adjourn, to lay on the table, for the previous question, to postpone to a certain day, to commit, to amend, or to postpone indefinitely; which several motions shall have precedence in the order in which they are arranged; and no motion to postpone or

commit shall be allowed twice in the same day, in the same stage of the ordinance or proposition.

19. When a vote has passed, except for adjournment or to lay on the table, any member voting with the majority may move a reconsideration to be acted upon at the same meeting. Any member voting with the minority may move a reconsideration to be acted upon at the next meeting; which latter motion shall have priority, if made before the motion first mentioned shall have been decided. No motion shall be twice reconsidered.

20. Every member who shall be in the Council when a question is put, shall give his vote, unless the Council, for special reasons, excuse him.

21. No motion or proposition, on a subject different from that under consideration, shall be admitted under color of an amendment.

22. All reports may be committed or re-committed, at the pleasure of the Council.

23. The division of a question may be called for when the sense will admit of it.

24. When the reading of a paper is called for and objected to, it shall be determined by a vote of the Council.

25. No standing order of the Council shall be suspended, unless three-fourths of the members present consent thereto; nor shall any rule or order be repealed or amended, without one day's notice being given of the motion therefor, nor unless a majority of the whole Council concur therein.

26. All committees, except such as the Council determine to select by ballot, shall be nominated by the President.

27. No member shall be obliged to serve on more than two committees at the same time, or be chairman of more than one.

28. All memorials and other papers, addressed to the Council, shall be presented by the President, or by a member in his place, who shall explain the subject thereof, and they shall be taken up in the order in which they were presented, unless the Council shall otherwise direct.

29. Standing committees shall be appointed on the following subjects : —

ON SECOND READING OF BILLS AND ORDINANCES,
ON ENROLLMENT,
ON ELECTIONS AND RETURNS.

30. No committee shall sit during the sittings of the Council without special leave, except the Committee on the Second Reading of Bills and Ordinances, and the Committee on Enrollment.

31. The rules of proceeding in the Council shall be observed in the Committee on the Whole, so far as they are applicable, except the rule limiting the time of speaking.

32. When a committee is nominated by the chair, the person first named shall be chairman. In election of committees by ballot, when a chairman is not specially chosen, the person having the highest number of votes shall act as chairman, and in case of an equality in votes between two or more members of a committee, the members thereof shall choose a chairman.

33. All ordinances and resolutions shall have two several readings before they shall be finally passed by this Council.

34. All ordinances, before being read a second time, shall be referred to the Committee on the Second Reading of Bills and Ordinances, and after being reported upon by said committee, shall be again read, after which second reading, the question shall be on passing the same to be enrolled.

35. No ordinance or resolution imposing penalties, or authorizing the expenditure of money, shall have more than one reading the same day.

36. The seats of the Common Council shall be numbered and determined by lot, and no member shall change his seat but by permission of the President.

37. All committees of the Council shall consist of three members, unless a different number be specially ordered. And no report shall be received from any committee, unless agreed to in committee actually assembled ; and all reports shall be in writing.

38. It shall be the duty of every committee of the Council, to whom any subject may be specially referred, to report thereon within five weeks, or ask for further time.

39. The clerk shall keep brief minutes of the votes and proceedings of the Council, entering thereon all accepted resolutions; shall notice reports and memorials, and other papers submitted to the board, only by their titles, or a brief description of their purport.

40. All salary officers shall be chosen by written or printed ballots, and in the election of any officers by ballot, blanks shall not be counted.

41. Members of the Council may attend meetings of any of its committees, but shall not vote thereat.

42. The clerk of the Common Council shall keep the record of committees who may require that service; and on the appointment of every standing committee, a book for records shall be provided by its chairman, or by said clerk. The clerk shall have the custody of all minutes by him kept; and the records of the several committees shall be open to the inspection of the members of the City Council.

43. Any member offering a resolution, shall write his name on the bottom of the back of such resolution.

ORDINANCES.

CITY OF LOWELL.

In the year eighteen hundred and eighty-six.

AN ORDINANCE FOR THE REGULATION OF PLUMBING.

Be it ordained, by the City Council of the City of Lowell, as follows:

SECTION 1. No person shall carry on the business of plumbing unless he shall have first registered his name and place of business in the office of the City Engineer, and notice of any change in the place of business of a registered plumber shall be immediately given to said City Engineer.

SECTION 2. Every plumber, before doing any work in a building, shall, except in the case of repairs of leaks, file at the office of the City Engineer, upon blanks to be provided by the Board of Health for the purpose, a notice of the work to be performed. No person shall commence work on such drainage, or plumbing, until the plans are approved by the Board of Health. Plans and specifications shall be approved or rejected within five days of the time of filing.

SECTION 3. The Board of Health must be notified when any work is ready for inspection, and all work must be left uncovered and convenient for examination until inspected and approved.

SECTION 4. Every building shall be separately and independently connected with the common sewer, or cesspool, said cesspool to be approved by the Board of Health.

SECTION 5. Drains and soil pipes, through which water and sewage is used and carried, shall be of iron, or Akron, or cement drain pipe, to be approved by the Board of Health when within a building. They shall be supplied with a suitable trap placed with an accessible clean-out, either outside or inside the foundation wall of the building. There shall be a fresh air inlet pipe entering the soil pipe or drain on the house side of the main trap of not less than four inches internal diameter. All soil pipes shall be carried out through the roof, open and undiminished in size, to such height as may be directed by the Board of Health, but no soil pipe shall be carried to a height less than two feet above the roof.

SECTION 6. Every sink, basin, bath tub, water closet, slop hopper, and each set of trays, and every fixture having a waste pipe, shall be furnished with a trap which shall be placed as near as practicable to the fixture that it serves. Traps shall be protected from siphonage, or air pressure, by special air pipes of a size not less than the waste pipe; but air pipes from water closet traps shall be of not less size than two inch bore for thirty feet or less, and not less than three inch bore for more than thirty feet, and shall be run as direct as practicable.

SECTION 7. Drip or overflow pipes from safes under water closets and other fixtures, or from tanks or cisterns, shall be run to some

place in open sight, and in no case shall any such pipe be connected directly with a drain waste pipe or soil pipe. Waste pipe from refrigerators, or other receptacles in which provisions are stored, shall not be connected with a drain soil pipe or other waste pipe.

SECTION 8. Every water closet, or line of water closets on the same floor, shall be supplied with water from a tank or cistern, and the flushing pipe shall not be less than one inch in diameter. Provided, that where it is impracticable by reason of frost the Board of Health may give a written permission for other service.

SECTION 9. The provisions of sections 3 to 9 inclusive of this ordinance shall apply only to buildings erected, or to work performed, after its passage.

In Common Council, April 27, 1886.

Passed to be ordained.

W. M. SAWYER, President.

In Board of Aldermen, May 18, 1886.

Passed to be ordained.

JEREMIAH CROWLEY, Chairman.

Approved May 20, 1886.

JAMES C. ABBOTT, Mayor.

CITY OF LOWELL.

In the year eighteen hundred and eighty-six.

AN ORDINANCE TO AMEND CHAPTER FOURTEEN OF THE REVISED
ORDINANCES OF 1883.

Be it ordained by the City Council of the City of Lowell, as follows:

That Sect. 2 of Chapter 14 of the Revised Ordinances of 1883 be amended as follows:

By striking out the word "and" at the beginning of the second line and inserting in place thereof the word "the."

By inserting after the word "Council," in the same line, the words "and Superintendent of Public Schools."

By striking out the words "one from each ward." in the third line, and by striking out all after the word "years" in the eleventh line.

That Sect. 4 be amended by striking out all after the word "chosen," in the first line, and inserting the following: "in the month of December, 1886, and whenever a vacancy occurs, by a vote of the Board of Directors, a Librarian of the City Library, who shall hold his office until removed for cause."

That Sect. 5 be amended by inserting after the word "said," at the beginning of the eighth line, the words "library and."

In Common Council, March 23, 1886.

Passed to be ordained.

WALTER M. SAWYER, President.

In Board of Aldermen, March 30, 1886.

Passed to be ordained.

JEREMIAH CROWLEY, Chairman.

Approved March 31, 1886.

J. C. ABBOTT, Mayor.

CITY OF LOWELL.

In the year eighteen hundred and eighty-four.

AN ORDINANCE REGULATING THE ERECTION AND MAINTENANCE OF
WIRES IN STREETS AND WAYS.

Be it ordained by the City Council of the City of Lowell, as follows:

SECTION 1. The Mayor and Aldermen may give to Telegraph, Telephone, Electric Light and other Companies desirous of erecting and maintaining wires in the streets and ways of the City, instruments in writing specifying where in said streets and ways the posts of said Companies may be located, the kind of posts, and the height to which and the places where the wires of said Companies shall run.

Provided that no such Company shall be permitted to erect or maintain their said wires in such positions as to cross from above any wire of the Lowell Fire Alarm Telegraph. And provided further that any and all of said Companies shall erect and maintain the topmost crossbar on their said posts for the exclusive use of the wires of the said Lowell Fire Alarm Telegraph, and such other wires as the City may at any time attach thereto for its own use.

In Common Council, December 10th, 1884.

Passed to be ordained.

JOHN J. HOGAN, President.

In Board of Aldermen, December 16th, 1884.

Passed to be ordained.

ROBERT J. THOMAS, Chairman.

Approved December 31, 1884.

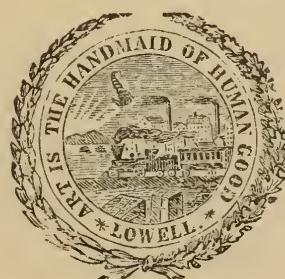

JOHN J. DONOVAN, Mayor.

REPORTS.

REPORT OF THE SCHOOL COMMITTEE.

THE COMMITTEE UPON REPORTS, in pursuance with regulation and precedent, has the honor respectfully to present the following as the annual report of the School Committee.

After many years have elapsed, during which time a paper of this character has been annually presented for the consideration of officials and others interested, it becomes a difficult matter to offer anything essentially new; but yet the time when there is need of emphasizing many of the suggestions of the past, or calling attention to matters of importance and practical value to the present welfare of our schools, and hence to the general public, has not passed away.

In this age the necessity of education is recognized. There are hardly any so poor, or so shiftless, as to affirm a negative. We need not, then, discuss this question at the present time. The various methods and means of education—the best manner of training and of disciplining—the thousand and one details of school efficiency and progress, have been and are being discussed by some of the most thoughtful and consecrated scholars.

of the land. Life work and study have been given to these essentials; and we only endorse a truth, as it seems to us, when we say that unquestionably the best is used, to a greater or less extent, in all progressive and earnest school work. Experience teaches men that one of the grandest bequests they can leave to their children is a well-stored mind. Communities, generally speaking, are partially ready to pay for the best methods to secure such results, and for competent teachers to drill and instruct; although in this respect the public mind has not been so well educated as it has been in recognizing the first proposition presented. While, then, the theoretical has been accepted, it becomes more difficult to accept the practical. Oftentimes what *has* been good enough in the past is believed by many to be good enough now. If in seasons or decades gone by, boys who as men have become successful in any of the relations of life mastered the elementary principles of an education in the old-fashioned, dingy, smoky school-house, with its hard seats and benches; committed the lessons verbatim though with little understanding and with little explanation; went through somehow, and went out into the world-school to battle, and yet to win; thousands cannot see why the boys and girls of the present time cannot do the same; why there should be any more expense than formerly, never once thinking that, with the advancement of the average American, one to win in these days, aye, even to commence a

success, must be much better equipped than ever before. So they sneer at methods, and shrug their shoulders when a dollar of expense beyond an absolute necessity is asked to give us, what the most reflecting minds decree to be the best, and, in many respects, the most essential. But the world is advancing, whatever may be the opinions of those who do not watch the current of events; and only as we possess the best in anything can we hope to keep abreast with the on-sweeping tide of education, intelligence, and prosperity.

That we have in Lowell much which ranks with the best is a fact. That her citizens have recognized the great value of education is evident when we consider the expense, as we believe, cheerfully borne, and the heartiness given to every proposition for a general unfolding of children's minds. That there are still many things needed, which a prosperous city like Lowell should possess, is also true. We have not what might be termed a crushing debt; we are not oppressed with exorbitant taxes; we are not staggering under hard times; we are not rich; we are not poor; while we do enjoy a prosperity sufficient to enable us to do a greater good than we do, and that without wearisome burden. We affirm, what has been so often expressed by others, that there is no department in which money can be expended to greater advantage, or which calls for a livelier interest in its welfare, than the educational. We are building for life—for future prosperity, and

though we cannot tell how far this work extends into the future, surely for earth we are laying up treasure “where neither moth nor rust doth corrupt,” and which will be of vital importance and usefulness in all coming experiences.

It will be said that Lowell has freely given of her means to promote educational facilities. True. Yet there are many who inquire, “How is it that our schools cost so much more now than formerly?” We must not forget the fact that our city is growing; that already some districts have out-grown their accommodations; that there have been increases beyond the ideals of the wisest of ten years ago, and hence increased expenses result. If with this increase of scholars, expenses, and demands, there came to our city no increase in revenue from additional taxes upon people coming to make their homes with us, and adding their property to the gross amount taxable, there might be some reason why the strictest economy should be exercised. But as much is required, even so to us much has been given. Extravagance should never be permitted; but it is not extravagance when money is spent to give to the children of Lowell the best at her command.

Sums absolutely inadequate to properly sustain the schools of Lowell—or to sustain them in all of their relations as we are able to do—have been appropriated for school purposes. Oftentimes, somebody has guessed that about so much money might be required for the

year. It has been essential, of course, that the guess should be marked with wisdom; although a great deal of wisdom at the commencement of a municipal year is of the non-progressive stamp. The fact, however, is that the guess has usually fallen below the actual necessity, and the fearful (?) alternative that either the appropriations must be over-run in spite of all the heroism manifested when the cry "exceeding appropriation" was sounded, or else absolute interests must suffer, stared all in the face. The consequence is that the schools have cost beyond their appropriations, notwithstanding the valiant battles which have been fought to make some other department pay for expenses on schools or school-houses; as though it made any difference to the City of Lowell who paid the bills, as long as they were paid, and there *was money in the treasury, or money somewhere*, belonging to the city to pay them. In view of the greater demands made by the increasing numbers of scholars, we deem it not economy, but almost a measure of folly, with a tincture of meanness, to restrict the school funds to the lowest possible minimum, and to estimate the fidelity and ability of the members of the school board by their success in keeping within the guess-work appropriation, or by their failure in making both ends meet with the means allowed. The school appropriation is not alone for the absolute expenses of the schools, such as paying teachers, furnishing text-books, and doing the legitimate work

of the schools, but it has many bills of expense for repairs and various necessary improvements, which, properly, should not be charged to its account, although it is a question if some politicians would ever allow the necessary repairs and improvements to be made if they were not charged thereto. It is an absolute fact that there are intelligent men who believe in the dollar first and every time, and in the schools second—if they get time. So the school appropriation sustains the schools and much more.

No complaint upon this ground would be made if the appropriations were only large enough. But the truth is, with the passing years, many school buildings have become almost useless and undesirable; while in some districts the new school-houses are inadequate for the requirements of the localities. We need at once several new buildings to accommodate the increased number of applicants. Some houses are badly located for the purposes designed, notably the Franklin and Moody. There may be others. Close to busy, paved, noisy streets, it is almost a wonder that teachers and scholars can accomplish as much as they do. The wear and tear to nerves must be terrible. Some are wholly unfit for occupancy, notably the Rock, Church, and Elliot Street Schools, and others. In many places the sanitary arrangements are miserable. Conditions are allowed in our school buildings, and our children sent to take their chances of becoming sick from odors, permeating rooms

and halls, which we would not tolerate in our homes a single hour. We would pay double our taxes to abate the evil in our houses; but under the guise of "city's poverty," hug our dollars and let a wrong for the public continue. One great need today is a brain which can invent and place in practical working a decent sanitary arrangement for our public school buildings. Until that is perfected, out of basements, out of doors, with convenient necessities, should be the direction. A quarter—yes, a half a million dollars expended in erecting new and necessary buildings; in putting in good repair those which are unfit for decent children to enter—and what is not good enough for a rich man's child is not good enough for the poorest man's child who desires to gain something to take out into the world with him—in making pleasant and desirable the school buildings; would be one of the grandest investments our good city could make. It might not give employment to so many from whom votes are expected by the various political parties as if expended in some other, though not so essential, manner; but it would give additional impetus to hundreds of the rising generation who are preparing themselves, not only to vote, but to control the educational and financial affairs of the future.

For years we have been putting up with the inconvenience of a single building for a High School. While it is true that the standards are so high, the requirements so strict, and the course of study, etc.,

so arduous, that only a small part of the scholars who have been connected with our Grammar Schools ever complete the High School work, yet a sufficient number do attend to make it over-crowded. We say over-crowded, because there are so many who are required to find accommodations in the third story. A new building, or another one to be used for the same purpose, is one of the urgent demands of the day. To have one devoted to purely English, physical, and domestic culture, and the other to the classics, sciences, and so on, would be a decided improvement upon the present system. The present location, well enough once, is extremely inconvenient for many. Another building, even if devoted to the same educational methods as the present one, located westerly, would meet a great want. True, it would cost something; but the present arrangement is costing terribly, especially as concerns the health and strength of many of the young ladies, who are anxious and determined upon a High School education.

In this matter of school expenditure, of school improvement, of hygiene, we cannot afford to be parsimonious. Economy of a certain kind is well enough; but we need that economy which will consult the important school interests first, and the dollar afterward.

A few dollars expended upon the walls of most of our school buildings would render them much pleasanter and more desirable. Not only this, but

more healthful. The glare of the plain white wall meeting the eye of the pupil, month in and month out, cannot be without its ill effects upon his sight. "O, we stood it through our school days without detriment," is the remark of many. Some may; but were the histories of many weakened visions unfolded from their secrecy, the cause of a great number would be directly traceable to a false economy which we will not permit in our own homes, if we can help it. Make the school room pleasant, a desirable place to go to, to live in; give the scholars an opportunity to cultivate a little taste by placing upon decently prepared walls, pictures and mottoes, which they will gladly do of their own accord, and you will have better pupils. You, or they, may get an education in a barn, if so determined; but a barn discipline is not required in these days of prosperity and general comfort.

During the year the subject of the teachers' salaries has been considerably agitated. While it is true that, in many cases, the present ones are commensurate with the work and abilities of some teachers, it is also true that others are under-paid, if we estimate talent at its value. If we would have the best, compensation must be made desirable. In some cases salaries have been raised; if all should be advanced, even a small per cent., and a rule inflexibly enforced that all teachers not really worth the sum fixed should be retired, a competent board of disinterested parties to make the

examination, it would give authority for a revision of the list of teachers which would be of value. Anyone conversant with the present difficulties of removing incompetent teachers, can appreciate the opportunity which the above method would give. Bring your teachers up to the standard of salaries, and not adjust the salaries to the teachers. We want the best, and in every respect the best are the cheapest, even though you pay more money. By the former rule, you can command the service of the best; by the latter, there is a temptation to tolerate the second or third rate, which cannot too soon be overcome. The qualification for teaching is not alone intellectual culture. This is of vast importance, it is true; but an understanding of children, a natural love for, or an interest in, them; a firm yet pleasant attitude toward them; are most important requisitions; and not only this, but while possessing brains, they should also have a physique that isn't dyspeptic or gloomy, which does not remind one of a thunder cloud, but rather of sunshine; for in the school-room, of all things, a cross, unbending, solemn, cold-hearted teacher is least desirable. We are inclined to form our opinions of a person's qualification for teaching by the rank attained at a written examination, while the truth is, as already intimated, many other qualifications should enter into the estimate. There are teachers, so-called, ranking high in language and science, who are no more fitted to teach than as though they

were animated stone posts, and there are others not so intellectually brilliant, yet sufficiently so to lead their pupils on to grand success; and yet too often the first will be preferred to the second, because of the demand for mere intellectual culture alone. We do not want brutes nor do we want angels for teachers just yet; but we do want, in all of our schools, men and women, and those two words signify a great deal.

The annual election of those teachers already permanent seems superfluous. A good teacher should be able to feel secure in his or her place. The opportunity to drop a faithful teacher to make room for some other, especially an untried one, or to please the wisdom of some sub-committeeman, without the best of reasons, to be properly and impartially determined upon, should not be open. As long as one is worthy, able, efficient, faithful, so long should her service be continued. Politics, age, nationality, or religion have no business to enter into the consideration. The yearly farce of an election already once made, brings uneasiness and anxiety to all interested, and should be declared not worthy a place in our rules and regulations.

If parents and educators generally had in view the capacities and the capabilities of children's and young people's mental organizations more perfectly, and were governed less by a desire to have children "smart", it impresses us that the present system of cramming would be wrested of some of its power. Almost every

year the standards are advanced, but the scholar is expected to meet the conditions of advancement at about the same age as formerly, although there has not yet been any law discovered by which the mind can become precociously quickened and made to healthfully receive its over-loaded meal of book learning. We are getting many young brilliant minds; but we are also growing weak and puny bodies, never able to set off the brilliancy of the intellectual in after life. The necessity of the day is a more practical development of the physical and mental in unison. A school of physical culture has been hinted at in the past. The military drill for the boys helps a little. If something practical could be established for young ladies; if there should be less smattering of non-essentials and more instruction in essentials, we might not send out so many limpid young women into the world, but we should send out better equipped ones for the domestic and earnest duties of life; while they might possess, at the same time, as many of the really required accomplishments as are essential to home and society. Above the primary department, there is not a course of study in our schools which should not be extended, as regards time. It is a wrong to allow our boys and girls, at twelve or thirteen years of age, to struggle under the burden of the four years' course in the High School (and which, under the present requirements, should be extended to at least six years) with bodies, in so many instances, too weak to walk

erect after the school hours. Many may differ, but if sixteen years of age was the earliest any one could enter upon the High School work, the beginning of a reform might be instituted. Moreover, under the present pressure much study is required to be done out of regular school hours. In very many instances we pay teachers, not to teach, but simply to listen to recitations which the scholars have really been taught at home by the aid of parents, or by other methods which may be proper, or hap-hazard. The work of the school should be done in school hours, making your schedule to fit the hours, while every moment spent outside in the work is, in nature, wrong. In some respects there is a great deal too much work required of young brains, and too little physical exercise outside of the school room. More years might be consumed in completing the courses prescribed, but they would be years of immense profit to the young in after life.

In our schools there have been but few changes of note. In June last, however, our former efficient and faithful Superintendent, Mr. George H. Conley, resigned his office to accept another, more lucrative and with a wider field for usefulness, in Boston. His work and record in Lowell were excellent, and he left our city with the best wishes of all who knew him. To the position thus left vacant George F. Lawton, Esq., was elected. He brought to his work a practical and ripe experience acquired formerly as a teacher, and manifested a desire to

make himself thoroughly acquainted with his duties and responsibilities.

The office of School Superintendent, however, should not be one liable to change from year to year. No man can work so well as he who knows he is not liable to removal without just and sufficient cause, and so can devote more energy to his duties with a greater amount of enthusiasm, feeling that while he is worthy and faithful, his ability and works will be recognized. To make the office one of political favoritism, and liable to political changes, is an act which, by some legal measures, should be forever debarred. Experience makes men better and more valuable. The divorceement of schools and school officials from political dictum cannot too soon be made imperative.

The present system of the supervision of the Primaries by the several Grammar masters, and the examination of pupils for promotion from the Primaries to the Grammar Schools under the direction of the masters, calls for some enlargement. As a matter of principle, no master should be allowed to decide who shall, or shall not, enter his school. If the master can decide upon the merits of those who shall enter the High School, our Primary teachers ought to be able to determine who is fitted for advancement to the Grammar Schools, or else the teachers are not qualified for their positions. If in this respect any partiality is exhibited the penalty to the teacher should be dismissal. With

the supervision there is responsibility delegated to the masters, but no means to make good the responsibility. It seems almost a waste of time for them to supervise simply as visitors with no power. The master, under the present regulation, may desire the best fitting for his schools, may point out errors if any exist, and may counsel the Primary teacher, which error she may rectify, or which counsel she may accept or not, as she chooses; and while, as we have said, he has responsibility, he is powerless to make conditions to meet the requirements. As all authority is vested in the Superintendent he should have the responsibility, blame, praise, and work. If the duties are too onerous, let an assistant be elected, whose duty might be to supervise the Primaries, or to aid him in his general work, as may be deemed expedient. To fully perform all the duties of a Superintendent, with the growth of our schools, a competent assistant is demanded today by the exigencies of the school service.

Instruction by special teachers in both drawing and penmanship continues as last year.

During the summer, by a vote of the Board, a special instructor in music was elected, and at the commencement of the fall term was assigned to the schools. Though he entered upon his duties with zeal and earnestness, yet it becomes apparent to the careful observer that the instruction must needs be very superficial; for, devoting every moment to the schools, yet so large is their

number that even the longest lesson to double classes is half an hour, and this is given but once in two weeks, for the reason before stated. We are of the opinion that the return in detail is not an equivalent to the expense. No one man, under present methods, can possibly fill all the duties of instructor. Some of your Committee conscientiously feel that all instruction in the ornamental branches is, practically and in every other way, an expense which we, for the public schools, should not incur. Be that as it may, yet to make the teaching of music profitable, either the present methods should be improved upon, the special instructorship abolished, or at least two more teachers should be employed. With all of the energy and faithfulness of the present incumbent, yet the work, under one man, can be done only in an unsatisfactory manner to himself, the schools, and the public.

The Evening Schools meet a want which is ever felt in a city like Lowell, and your Committee is confident that they have been doing a fair work, and should be maintained for the present, at least.

Yet with all the criticisms which have been made—and they are offered only with the hope that they may aid in correcting errors, and enable good work to go on to even better—it can be truly said, in general terms, that the schools of Lowell are good schools, many of them excellent. We have, we believe, able, earnest, and consecrated teachers. With a great majority there

is a love for the work, a devotion to the interests of the schools, which always mean prosperity and advancement to them and to their pupils. There is also a willingness manifested to rectify errors, to improve upon methods in any way which may seem just and reasonable, that promises increased efficiency. Aid in every proper way the school work of Lowell—not cripple or harass it—and we believe that the work of education will go on, proving even more beneficial to the young, and so, ultimately, adding to the great profit and welfare of our city and commonwealth.

Respectfully submitted,

GEO. W. BICKNELL,
ANDREW G. SWAPP,

REPORT ON EVENING SCHOOLS.

To the School Committee:—

GENTLEMEN—When we assumed the duties assigned us in January last we found the number of pupils in the Evening High and Elementary Schools considerably in excess of the attendance reported at a similar period in previous years. The attendance at the schools would have been considerably larger in January and February of 1886, but for the fact that many, who were anxious to attend, were obliged to work in various mills, machine shops and stores. The decrease in attendance at the time when teachers and pupils should be interested in the studies of the schools is one of the defects with which those who favor Evening Schools have to contend. The falling off in attendance may be caused by many reasons. The majority of those attending are young men and women, who are obliged to work through the day to support themselves and perhaps relatives who are dependent upon them, and it is natural to expect that some of them will be unable to bear the strain of constant toil through the day and close application to studies in the evening. Others, we regret to say, leave the schools when they ascertain that they are not pleasure resorts, but educational institutions for the benefit of those inclined to be orderly in their deportment and attentive to the studies.

It is also but just to say that some pupils do not attend the schools constantly, because of the lack of interest displayed by a few teachers. We have, in visiting the schools, noticed teachers who contented themselves with remaining at their desks and repeating the questions of the text-books in regular order.~

If a pupil desired further information, those teachers were slow in making explanations and sometimes the pupils were not correctly informed.

We are glad to say that many instances of this kind do not occur. In our visits to the schools we have noticed teachers who so interested pupils in their studies that it was with regret they remained away a single evening during the term. Another instance of the effective work of teachers was the desire expressed by pupils that the term of the schools be extended after March 1st.

We have found in our visits to the schools a number of pupils who never attended any school previous to their arrival in Lowell; others were unable to read and write in the English language. Many pupils of this class attend the Bartlett School, which is devoted to pupils of French-Canadian parentage. There was established in the Butler School building, early in the year, a room for pupils of Swedish parentage. All the studies of these pupils were conducted in the English language, and the progress made by numbers of the pupils attested the good work done by teachers and pupils.

In the Evening Elementary Schools are many pupils who have never attended a session of the Grammar Schools. Many of them were compelled, by the poverty or neglect of parents, to enter the mills and work-shops when they should be receiving an education. There are also pupils who register at the opening of the term, in October, who have not been more than a year or two in the Grammar Schools. These pupils, unaccustomed to the restraints and discipline of a school room, remain but a few weeks after the opening of the schools. We believe that it is the special object of the Evening Schools to reach and educate pupils of that character. To assist in keeping them in constant attendance at the schools we request the assistance of parents, relatives and employers of these young men and women. In our efforts to secure a large attendance at the schools we have been greatly assisted by the agents and other officers of our leading corporations, to whom we return our thanks.

It is with pleasure that we note the constant visits of some parents to the schools, and their anxiety that their children shall have the best instructors at the service of the Committee. It is our wish that parents generally would visit the schools and see for themselves how generously the City of Lowell provides for the education of those who are unable to attend the sessions of the day schools.

When pupils have absented themselves, postal cards have been sent to their residences, and in many cases satisfactory reasons are given for non-attendance.

During 1886, through the efforts of Hon. E. C. Carrigan, a bill was reported in the Massachusetts House of Representatives making it compulsory on cities with over 50,000 inhabitants to establish and maintain Evening High Schools. At the hearing granted the remonstrants, Superintendent George F. Lawton and Supervisor John A. Smith appeared by invitation of those in favor of the bill, and informed the Committee what had been done in Lowell regarding an Evening High School and its success. The bill was favorably acted upon in both branches of the Legislature and was signed by the Governor.

Previous to the opening of the term of the Evening High School in the fall of 1886, 308 persons made application to become members. After the opening of the term 22 other persons were added to the roll of membership, making the total 330. The largest attendance on any evening was 283. During November the average membership was 316, and the average attendance 247. In December the average membership was 269, and the average attendance 184. The decrease in the average during this month was on account of the number of pupils absent during the Christmas holidays.

The studies pursued in this school are Penmanship, Book-keeping, English Grammar and Composition, French, Science of Government, Elementary and Advanced Arithmetic, English Literature and Chemistry. James D. Horne, who has aided considerably in arousing an interest in the school, continues as Principal. He is assisted by Cyrus W. Irish, Thomas M.

Graves, George W. Poore, Julian L. Whiteside, F. N. Wier, John W. McEvoy, Joseph F. Mulcahy, William Bagley, and Miss Katie F. Keyes.

The total number of pupils registered at the opening of the term of the Evening High and Elementary Schools in November, 1886, was 1900, against 1600 in 1885. Owing to this increase, additional rooms were opened in the High and Franklin School buildings.

The total expense of conducting the schools during the term of 1885-86, as will be seen by the tabulated statement accompanying this Report, was \$10,736.65. The total expenditure of conducting the schools from January 1 to December 31, 1886, was \$10,125.51. Under Supervisor Smith's direction it is expected the expenses for the term of 1886-87 will be considerably reduced.

In conclusion, we desire to return our thanks to Supervisor John A. Smith for faithful services, and to the members of the School Committee and to Superintendent George F. Lawton for assisting us in our efforts to make the Evening Schools successful.

REPORT OF COMMITTEE ON MUSIC.

To the School Committee:—

MUSIC in the public schools has not been a success. The reasons for this are obvious. 1st. A lack of interest on the part of the regular teachers. 2d. The lax following of the system now in use. 3rd. Failure to enforce the study by the School Board. The lack of interest by teachers, with some exceptions, is manifested in various ways. The principal one is their failure to observe and attend to the instructions of the Supervisor. No teacher can write notes, reports, and chat with other teachers during the music lesson and justify the action; it is a lack of respect for the Supervisor and an injustice to the pupils. How are they to instruct the army under their charge unless they interest themselves and heed the lesson? This complaint, we trust, in the future will not be allowed to arise. Another trouble is the failure to follow the manual supplied to all Primary Teachers. Unless this is done it is impossible to properly teach the National System.

At the beginning of the school year few of these manuals could be found, but on search some were produced from various places, filled with maple leaves and ferns. Now, this may be evidence of an interest in botany but not in music.

This year we are pleased to note a decided change. Music has again taken its place among the regular studies of the school. A special instructor has been engaged, in the person of Walter E. Owen, a gentleman of pronounced merit as a musician, enthusiastic, energetic and capable, bringing to his work natural gifts and years of experience; he has succeeded,

in the limited time he has been at work, in bringing about a marked change for the better. We should remember one thing in connection with the Supervisor's work. It is this: the scholars are not there as musicians are in a conservatory, and the same may be said of the teachers. Singing by syllable has been renewed. This had been dropped for the last few years in Lowell, and our city stood alone in this respect, being the only place in the country where music has been taught without use of the syllable. We have no space here to discuss music in the abstract. Suffice to say, as an educational factor it was recognized years ago. Of it Plato said: "Music to the mind is as air to the body." It appeals directly to the sentimental portion of our being; it promotes quick and precise mental action; it is among the best means to refresh a fatigued pupil; it promotes circulation of the blood; it is a preventive of throat and lung affections. In Europe "it is esteemed so highly as to be taught more hours per week than any other study." Full 95 per cent. of the human race are capable of becoming fair musicians. When they are *taught* this important branch, learn to read it as they would a book or a newspaper, then they will see that sounds are as fixed as are figures in mathematics; then, indeed, will a new order of things in the musical world be brought about and our people, as the Germans, become a really musical one, appreciating it for its worth and saying with the poet,

" Music is the measure of the planets' motion,
Heart-beat and rhythm of all the glorious whole;
Thrills through all hearts a uniform vibration;
Starting from God and felt from sun to sun;
God gives the key-note, Love to all creation,
Join, Oh! my soul, and let all souls be one."

STEPHEN J. JOHNSON,
CHAS. H. CONANT,
HERBERT P. JEFFERSON.

REPORT ON MILITARY INSTRUCTION.

THE COMMITTEE ON MILITARY INSTRUCTION respectfully submit the following report:

On taking charge of this department of public instruction your Committee found that, while the condition of the battalion itself reflected credit on all connected therewith, some changes were needed in its equipment and surroundings, before the best results could be secured. Only one company was properly armed. The guns of the others were clumsy, old-fashioned pieces with which good work could not well be done. The armory was badly out of repair, and its condition was not such as to associate ideas of neatness and soldierly conduct in connection with the drill.

These defects have been remedied. New guns have been secured. Racks which afford a safe and fitting place for them have been added. Belts and bayonet scabbards have been issued. The hall has been painted, plastered and tinted; the officers' room furnished with all needed conveniences, and a case provided for the flags and other property of the command.

Although considerable expense was entailed by these improvements, yet so necessary did they appear that your Committee did not hesitate in ordering them. Good results have followed in the increased interest of the boys in their work and visible pride in their new arms and more suitable quarters. The discipline of the battalion is excellent, which renders possible movements not before attempted, and such variety adds interest to the drill. Of these, the silent manual, added this year by the military instructor, is an interesting feature. The former

high standard for efficiency and deportment has been fully maintained, which is in great part due to the confidence existing between the Committee and teachers in charge, and the pride that all members feel in the reputation of the command.

As the officers are elected by the Committee, with the advice of the teachers, they feel responsible for the satisfactory performance of their duties.

The guns as at present furnished are not provided with straps, and it would add much to the appearance of the battalion if these could be obtained.

It is recommended that a number of the guns be provided with wooden barrels, which would greatly lessen their weight and so relieve some of the smaller boys, who cannot handle their pieces without great exertion.

It is recommended that the teachers in charge be required to keep an accurate record of all cases of discipline, such record to be submitted to the Committee, and that members of the command so reported be ineligible to promotion and subject to such further discipline as the Committee may direct.

JOHN J. CLUIN,

For the Committee.

REPORT OF THE SUPERINTENDENT.

Gentlemen of the School Committee:—

IN accordance with the rules of this Board, I have the honor to submit the following report for the year 1886.

I first direct your attention to the Summary of Statistics.

SUMMARY OF STATISTICS.

Value of real and personal property	\$53,495,941
Popnlation	64,051
Number of polls	16,379
Increase for the year	632
Number of children in the city between five and fifteen years of age, May 1, 1886	11,355
Ward One, 1,846; Ward Two, 2,322; Ward Three, 2,586; Ward Four, 1,840; Ward Five, 1,376; Ward Six, 1,385.	
Increase for the year	385
Number of public schools	44
Number of public school buildings	46
One High, nine Grammar, two Mixed, thirty-two Primaries.	
Number of teachers employed in them	184
High School: three males, ten females	13
Grammar Schools: eight males, seventy-three females	81
Mixed Schools: two females	2
Primary Schools: eighty-eight females	88
One teacher of penmanship	1
One teacher of drawing	1
One military instructor	1
One teacher of music	1
Increase for the year	8
Average number belonging to all the day schools	6,947
High, 353; Grammar, 2,877; Mixed, 42; Primary, 3,675.	
Average attendance in all the schools	6,309
High, 338; Grammar, 2,642; Mixed, 37; Primary, 3,292.	
Average number belonging to each teacher	37.7
High, 27; Grammar, 35.5; Mixed, 21; Primary, 40.6.	
Average number belonging to each room	40.2
High, 35.3; Grammar, 39.4; Mixed, 21; Primary, 40.6.	

Average per cent. of attendance	90.8
High, 96; Grammar, 92; Mixed, 88; Primary, 89.6.	
Average cost of each scholar, for tuition only, based on the average number belonging	\$17.27
High, \$31.95; Grammar, \$19.23; Primary and Mixed, \$13.57.	

RECEIPTS AND EXPENDITURES.

RECEIPTS.

Balance undrawn Jan. 1, 1886

SCHOOL HOUSES.

A brick addition to the Varnum School House was built during the summer vacation and the month of September.

The annex contains two fine, well-lighted rooms.

Contrary to expectation it was found necessary to occupy both rooms immediately. Should the increase in attendance continue for another year in Centralville, at the same rate as in the past two years, the Varnum School building would again be crowded.

Further additions to that building would be undesirable. The increase of population in the territory northward from Aiken Street makes a new Primary School House in that vicinity a necessity.

Perhaps the best plan would be to erect a building large enough to accommodate both a Primary School and a small Grammar School. If, in the future, such a Grammar School should outgrow such a building, a new and larger one could be built for the Grammar department, while the original structure could be devoted entirely to the Primary School.

The least that can be done to provide for the immediate requirement of the present is to erect a Primary building in the locality indicated.

WEED STREET SCHOOL HOUSE.

A new four-room building for Primary Schools has been erected at the corner of Weed and Gorham Streets.

Two rooms upon the first floor were finished for immediate occupancy. The other two rooms remain unfinished at present.

The building is of wood, but of the most approved model.

Twenty-eight scholars were transferred to the new school house from the London Street School, thirty-five from the Carter Street School and seventeen from other sources, making eighty in all. After the transfer from the Carter Street School, about thirty of the scholars of the Lyon Street School were received into the Carter Street School, perceptibly relieving two crowded rooms from which they were

taken. It is thought that it will not be necessary to finish a third room in the Weed Street School House for a year. It certainly would not be necessary if any addition could be made early next year to the London Street School House.

Most of the children transferred from the latter school to the Weed Street School live nearer to the old than to the new building.

An annex on London Street, containing two rooms, is imperatively called for.

A separate structure situated in "Ayer's City," or the region in Ward Three westerly from London Street, would serve the same purpose as the annex.

The progress, however, in building has tended in the direction of large structures with large schools in central localities. It is only by the continuation of this policy that thorough grading can be attained. It is apparent that this policy may be insisted on to an undesirable extent.

In sparsely populated districts of the city, perfect grading can only be secured at great inconvenience to very young pupils and at too great a sacrifice in other respects.

HIGH SCHOOL.

It may be futile to call public attention to the insufficiency of the High School House. This has been pointed out by my predecessors more than once.

Compared with our Grammar and Primary Schools the High School is of insignificant importance. The law, however, requires such a school to be maintained, and the people of Lowell desire it to be handsomely maintained.

In this Commonwealth, all the children must have a Grammar and Primary School education.

In all towns of more than 4000 inhabitants, all the children *may* have a High School education: In a city of 70,000 people, the High School should be the crown of our local school system. It should have a great many good things. Among them should be a suitable school building. There should be a hall for the assembling of the entire school. This

is not the place to argue that such a room is of prime importance to the discipline and general management of a High School of 400 pupils. That importance is admitted everywhere that modern American school houses are built. When the house was last remodelled, the third floor was used as an assembly room and was an admirable one. The growth of the school in numbers has necessitated cutting up the old hall into four school rooms, and there are no uglier school rooms in the city than these four.

The corridors and passageways are altogether too narrow. They are thronged every time there is a change of recitations during the day. Including the laboratory, there are a dozen different places of recitation. Every time the recitation bell strikes, there is an interchange of scholars from room to room throughout the building. For their orderly, rapid and decorous transfer, large corridors and hallways are indispensable.

The rooms are neither well lighted nor well ventilated.

The building is old, inconveniently arranged and generally behind the times. So much stress is laid upon the necessity of a new High School House, because of the belief that the earlier the agitation of the subject is begun the sooner a proper building will be had.

To almost every plan for relief that can be suggested there are some palpable objections. Exactly what ought to be done to bring about the desired result is hard to determine, and for this reason it is very important that the subject should be taken up immediately. It has been suggested that the Green School House be altered over to accommodate the High School and that the High School House be remodelled for the occupation of the Green School.

It has been also suggested that the High School be divided; that a new building be erected in the southern part of the city and that a separate school be established therein. Still another plan has been mentioned, involving the purchase of property adjacent to the present High School lot, an extension of the present structure, or its entire demolition, and the erection of a new and larger building.

During the year 1885 four teachers were added to the High School corps. Until the close of the present school year, Miss Melvin was absent on leave pursuing the study of the modern languages in Europe. The smaller number of pupils made it possible to continue without a temporary teacher in her place.

In March Mr. Cyrus W. Irish was transferred to the High School from the Pawtucket School. His career since has justified the high expectations entertained, that his services would be peculiarly valuable in the position of his new labors. In June Miss M. Jennie Keese tendered her resignation, which was accepted by the Board, and the following resolutions were unanimously adopted:—

Resolved, That by the resignation of Miss Keese the High School suffers the loss of an efficient and accomplished teacher.

As an assistant and principal teacher in a Grammar School, and afterwards as assistant in the High School, she rendered services that were exceptionally varied and valuable.

This Board hereby recognizes her uniform success and expresses its regret at receiving her resignation.

The graduating class for the present year numbered seventy-three, of whom twenty-seven were of the four years' course and forty-six of the three years' course.

The average age of the graduates was seventeen years and seven months.

The graduating exercises were held at Huntington Hall, Tuesday evening, June 29th.

The following is a copy of the programme:—

ORDER OF EXERCISES.

GARFIELD.

HARRY C. MESERVE.

OLD BOSTON *Written by Mabel D. Nickerson.*

IDA W. WHITTEMORE.

2. Standard oxalic acid 1 c. c. exactly corresponding to 1 m. g. of carbonic dioxide.

3. An indicator, Rosolic acid or Phenol phthalein. A number of calibrated bottles containing 4 to 8 litres. These should be fitted with perforated rubber stoppers, which have been treated with hot caustic potash and well washed. The stoppers should carry a good sized glass tube, just passing through and projecting above for an inch in order that it may be closed by a rubber cap. The bottles clean and dry, are filled with the air to be tested, by means of a suction bellows. A glass tube reaching to the bottom of the bottle should be connected with the bellows by a rubber tube. The bottles after being filled are taken to the laboratory, where the barometer and thermometer are noted. The bottles are allowed to stand until they reach the temperature of the laboratory. 50 c. c. of the standard baric hydrate, are now quickly run in through the tube in the stopper, the tube closed, and the bottle placed on its side and shaken at frequent intervals for an hour. At the end of the hour, shake well, taking care to have the liquid a perfectly homogeneous one, pour the mixture into a 50 c. c. bottle and allow to settle. An aliquot portion, 25 c. c. of the clear liquid is taken for titration with oxalic acid.

The difference between the number of c. c. of standard oxalic acid required to neutralize 50 c. c. of baric hydrate before absorption and after absorption gives the number of m. g. of carbonic dioxide in the volume of air tested. The value of carbonic dioxide is calculated to volumes saturated with moisture by the table in Fresenius, paragraph 139. An example will show the method of calculation. 8.467 litres of air contained 17.2 m. g. of dry carbonic dioxide. Temperature, 18°; barometric pressure, 760 m. m. According to Fresenius 1 c. c. carbonic dioxide saturated with moisture under these conditions will weigh 1.80781 m. g. therefore,

$$\frac{17.2 \times 10}{1.80781 \times 8.467} = 11.24$$

will be the parts of carbonic dioxide per 10,000.

Very respectfully, your obedient servant,

CYRUS W. IRISH.

There is referred to the sub-committee, the request for the building of an annex to the Butler school-house, but it was deemed advisable to refer the matter to the committee appointed for the year 1890.

Respectfully submitted,

LAWRENCE CUMMINGS,
GUSTAVUS A. GERRY,
JOHN W. McEVOY,
RANSOM A. GREENE,
A. G. THOMPSON,

Committee on School-Houses and Hygiene.

REPORT ON MUSIC.

The Committee on Music, in accordance with the requirements of the rules of the Board, make the following report:

In presenting this report as to the condition of music in the public schools, we desire in the first place to again call your attention to the zeal and skill displayed by the special instructor in music in the performance of his duties. The past year has proved no exception to the previous ones, but has still further demonstrated the fact that he is specially adapted to the work.

The results of the experiment of the previous year having proved satisfactory, the Committee have continued the instruction of music in the High School by having the girls meet the instructor once a week in the hall of the Green School building.

Notwithstanding the disadvantages arising from the lesson being given in a building separate from the High School building, we believe it to be wise to continue the same until such time as the city shall provide a new High School building, when music can again be systematically taught in all the schools, beginning with the primaries and continuing to the completion of the course in the High School.

In the fall of 1888, as stated in the report of the Committee for that year, charts of the Normal system, so called, of instruction in music, were placed on trial in certain primaries, and the revised charts of the National system, so called (the system then in use in all the schools of the city), were placed in certain other schools.

In the spring of 1889, the Committee visited each one of these schools, for the purpose of ascertaining the result of the experiment, and reported, recommending to the Board that the material of the Normal system be substituted for that of the National in all the primary schools of the city. The Board having voted to do this, the change was made at the beginning of the fall term, and so far as we have heard, no complaints have been made on

CARNEY MEDAL SCHOLARS.

John Joseph Tobin.	Mabel Dollner Nickerson.
Lewis Henry Dow.	Alice Bond Dexter.
George Albert Costello.	Mary Frances Ward.

SPECIAL MEDALS.

Special medals were granted by vote of the Board to four other graduates. Three of the recipients were considered not entitled to receive Carney Medals because of imperfect attendance or some disqualification other than a low grade of scholarship or imperfect deportment.

The names of scholars to whom these medals were awarded are :—

Merton Leland Miller.	Charles Austin Carey.
Winthrop Edwards Fiske.	Fannie Blanche Hard.

Of the graduates, five passed the examination for admission to Harvard University without a condition. This includes Miss Helen B. Peabody, who passed the examination for the Annex.

Four entered Harvard. Five are at other colleges; one at Dartmouth; one at Amherst; one at Holy Cross; one at Bates and one at Hamilton. Two are pursuing their studies at the Massachusetts Institute of Technology. The Principal of the High School received a letter complimenting his pupils, who were examined at Harvard, on their fine preparation in Chemistry. They passed with an unusual number of honors in other branches.

OPINION OF THE CITY SOLICITOR CONCERNING THE CARNEY MEDALS.

Replying to a request made by the Board for an opinion, the City Solicitor submitted the following:—

CITY SOLICITOR'S OFFICE,
LOWELL, MASS., Nov. 13, 1886.

To the School Committee:—

GENTLEMEN:—I am in receipt of a communication forwarded to me by your Secretary containing your request for an opinion on the following questions:—

First. Has any trust or legal obligation been assumed by the City of Lowell which requires the awarding of the Carney Medals, so called, to graduates of the High School?

Second. If such a trust or obligation exists, in what way, if any, can it be legally discharged, so that the awarding of the medals may be discontinued or avoided in the future?

From an examination of the correspondence accompanying the gift of Mr. Carney to the city, copies of which are hereto subjoined, as well as from an inspection of the records of the official action of the City Government relative thereto, I am led to the opinion that the gift of Mr. Carney was one to charitable uses, within the meaning of the law.

I am of the opinion, also, that the city has the legal capacity to accept the trust imposed on it by the terms of the donation, and that it has formally accepted the same by the adoption of resolutions by the City Council passed on the fourteenth day of September, 1858, and the twenty-sixth day of July, 1859, copies of which are annexed marked B and C; that by such express acceptance on the part of the Council, and the subsequent acquiescence therein by the School Committee, of the obligations thereby imposed on it by the terms of the acceptance as to the award and distribution of the medals, both the City and School Committee became bound to the performance of the trust as accepted.

The Supreme Judicial Court of the Commonwealth has by statute general jurisdiction of trusts so far as relates to the enforcement and regulation of the same, and for good cause shown may modify the terms of a trust or the holding of the same, when lapse of time or change of conditions, from whatever cause arising, may render it necessary to make such modifications in the execution of the trust as will carry out the intent of the donor as declared at the creation of the trust.

To effect this purpose legislative aid has been resorted to in some instances to clothe the court with the necessary

the just discharge of the valuable trust committed to it agreeably to the expressed wishes of the donor.

2d. That medals with suitable devices and inscriptions be procured under the direction of the School Committee, and that the first distribution of them be made under like direction at the annual examination of the High School in 1859, and at every annual examination thereafter.

3d. That the medals be forever known and designated by the name of the "Carney Medal."

4th. That the letter of Mr. Carney to the Mayor, covering the donation, be entered upon the records of the City Council, in order that ever hereafter, the views and wishes of the donor in regard to the distribution of the medals may be fully understood.

5th. That a copy of these Resolutions be transmitted to Mr. Carney by the City Clerk.

In Board of Aldermen, Sept. 14, 1858,
Passed.

E. HUNTINGTON, Mayor.

In Common Council, Sept. 14, 1858,
Passed.

B. C. SARGEANT, President.

A true copy. Attest: JOHN H. MCALVIN, City Clerk.

LOWELL, July 15, 1859.

HON. JAMES COOK, Mayor.

DEAR SIR:—The dies for the medals to be distributed in the High School have been prepared, and are lodged, with the dies for the city of Boston school medals, at the United States mint in Philadelphia, subject to the order of the City Government, or the School Committee, of the city of Lowell. The maker of them informs me that many dies for medals are left there, where a safe place is provided for them, and proper care taken of them, and medals struck as they may be ordered, by experienced hands, at reasonable prices. I understand that the dies belonging to the city of Boston are kept there all the time, and suppose they are better cared for there than they could well be cared for anywhere else.

I find, upon having some of the medals struck, that they are rather larger and more valuable than it was supposed they would be when the City Government accepted the donation, the annual interest of which was to be appropriated forever to their purchase and annual distribution; and that it will need the addition of the income of another hundred dollars to pay the annual expense. I accordingly enclose my check

for that amount, asking of the City Government the kindness to place it with the donation already made, under the same perpetual provisions, and remain,

Very respectfully,

Your fellow citizen and friend,
JAMES G. CARNEY.

LOWELL, July 26, 1859.

JAMES G. CARNEY, Esq.

DEAR SIR:—I hereby acknowledge the receipt of an additional sum of one hundred dollars, to be placed with the Carney Medal Fund. Allow me, dear sir, to express to you my grateful acknowledgments for this generous gift. May it be the means (as undoubtedly it will) of stimulating our scholars to virtuous and noble exertion, to the latest generations, and thereby of elevating many to be well informed and honest men and women, to fill the important positions of public and domestic trusts, as well as to encourage our public school system, which is the very foundation of our religious and civil privileges.

The City Council has this day accepted your supplementary donation of one hundred dollars, and placed the same with the donation previously made, under the same perpetual provisions.

Very respectfully.

Your humble servant,
JAMES COOK, Mayor.

C.

CITY CLERK'S OFFICE,
CITY OF LOWELL, MASS.

[Extract from the Journal of the Board of Aldermen, being part of the record of proceedings at a meeting of the Board held on Tuesday evening, July 26th, 1859, and written on pages 431-432 Volume VI. of said Journal.]

“Came up from the Common Council a communication from the Mayor covering a letter from James G. Carney, Esquire, who has donated an additional one hundred dollars, the same to be placed with the donation already made for the Carney Medals.

“It was read, and the letter of Mr. Carney, enclosing his check for one hundred dollars, asking that it may be placed with the donation already made, under the same perpetual provisions, was read and accepted in concurrence.”

A true copy from the records.

Attest: SAMUEL M. CHASE, City Clerk.

GRAMMAR SCHOOLS.

In accordance with the recommendation of my predecessor in his last annual report, a modification has been made in the Bartlett School and Green School Districts.

The result has been an equalization of the promotions from the Primaries to the two Grammar Schools.

All the territory bounded by the Merrimack River, Cabot and Merrimack Streets was transferred to the Green School District.

The Highland School has so increased during the year as to necessitate two additional rooms in the old Franklin School building. There are now three rooms of scholars in that building belonging to the Highland School. This portion of the Grammar School has just been connected with the majority of the school by *telephone*. This expedient makes supervision by the master more convenient, or, rather, less inconvenient, than it otherwise would be. Still, dividing a thoroughly graded school into two parts, separated by three-quarters of a mile, is decidedly improper.

Every room of a homogeneous school ought to be inspected daily by the master. Such inspection of the portion of his school in the Franklin School building cannot be expected of the master of the Highland School. A four-room extension of the Grammar School building ought to be constructed at once, or else the school should be divided into distinct schools with two masters.

PRIMARY SCHOOLS.

The number of Primary Schools has been increased during the year from twenty-eight to thirty-two.

The increase, in part, was due to the re-division of the Central Street School. This school last year combined three schools in one, with eight rooms and eight teachers. In July, owing to the unwillingness of the principal to continue in that capacity without an increase of salary, the School Committee voted to sub-divide the school.

There are now three schools, where but one was reckoned before. These are denominated the Central Street School, the Chapel Street School and the Cottage Street School.

The Weed Street and Fourth Street Schools are new schools, in fact as well as in name.

The number of scholars having continued to diminish in the Mann School, one of the rooms of that school has been closed, and Miss Crowley was transferred to the Fourth Street School in Centralville.

DISTRIBUTION OF TIME IN THE GRAMMAR AND PRIMARY SCHOOLS.

Some variation has been found necessary in the assignment of time for each study in these schools. By vote of the Board, ten minutes each day has been added to the time devoted to recesses.

The following table contains a statement of the time set apart for each branch. The first three years include the course of the Primary Schools. The last six years, from the fourth to the ninth years, inclusive, apply to the Grammar Schools.

TIME IN MINUTES FOR EACH EXERCISE EACH WEEK.

The annual examination of applicants for certificates of qualification to teach was held February 22nd. Of the thirty examined, nineteen were awarded certificates. Subsequently, on July 23rd, other applicants were examined under the direction of the Committee on Teachers. Four were found qualified, and, in accordance with the vote of the full Board, received certificates.

CHANGES IN SCHOOLS.

RESIGNED.

	Term of Service.
M. Jennie Keese	High School 8 years.

TRANSFERRED.

Cyrus W. Irish, from Pawtucket School to High School.
 Mary B. McGovern, from London Street to Weed Street School.
 Marietta F. Crowley, from Mann School to Fourth Street School.

ELECTED.

Walter E. Owen	Teacher of Music.
Nellie T. Gilday	assistant Cabot Street School.
Margie F. Marren	assistant Colburn School.
Mary B. McGovern	Weed Street School.
Fannie B. Edwards	assistant Highland School.
Nellie A. Coburn	assistant Highland School.
Elizabeth A. Hart	assistant Varnum School.
Julia A. Williams	assistant Varnum School.

PORTRAITS OF DR. JOHN O. GREEN AND DR. ELISHA BARTLETT.

Most excellent portraits of Dr. John O. Green and Dr. Elisha Bartlett were received in April last, accompanied by the following communication:—

LOWELL, April 25, 1886.

To the Superintendent of Schools, Lowell, Mass.:—

DEAR SIR:—The late Dr. John O. Green, by a memorandum, desired that the portrait of himself, by Mr. Thomas B. Lawson, should be presented to the Green School, and that of the late Dr. Elisha Bartlett, by the same artist, to the Bartlett School.

Accompanying this are the two portraits, and I beg their acceptance by the City for the purpose designated as memorials of the interest always taken by the donor in the cause of education.

Very respectfully yours,
J. ORNE GREEN.

No. 91 Pawtucket Street.

The portraits and letter of J. Orne Green, M. D., were presented to the School Committee at the next regular meeting and the following resolutions were unanimously adopted:—

RESOLUTIONS.

Resolved, By the School Committee of the City of Lowell, assembled, as follows:

That, with great pleasure we accept the portraits of Dr. John O. Green and Dr. Elisha Bartlett, presented to this Board by the late Dr. Green, through his son, John Orne Green, M. D.

Resolved, That the portrait of Dr. John O. Green be hung in the principal's room in the Green School house, and the portrait of Dr. Elisha Bartlett be hung in the principal's room of the Bartlett School house.

In accordance with the wish of the donor, whose name, with that of the lamented Dr. Theodore Edson, stands at the head of the roll of the founders of the Lowell schools, the portraits have been presented to the designated schools.

After a service of less than two years, in March last, the schools of Lowell suffered a serious loss in the election of my predecessor, Mr. George H. Conley, to the position of Supervisor in Boston.

It is but justice to say of Mr. Conley that he was thoroughly equipped for the discharge of the multiform duties of the office, which he could not fail to admirably fill. He developed an unusual faculty for executive work. By nature he was an organizer. In a comparatively brief period he re-organized, classified and graded anew the Lowell schools upon their present basis. With great tact, discretion, and, withal, with energy and effectiveness, he supplemented the life-long conscientious and successful work of his lamented predecessor.

Upon his departure, the School Committee unanimously adopted the following resolutions:—

RESOLUTIONS ON THE RESIGNATION OF SUPERINTENDENT

GEO. H. CONLEY.

Whereas, After two years' service as Superintendent of Public Schools in this city, Mr. Geo. H. Conley is called to a wider field of duty in a similar capacity in the city of Boston, therefore,

Resolved, That the School Board receives his resignation with sincere regret.

Resolved, That we recognize the ability and faithfulness with which he has served the schools of our city. With an enthusiasm regulated by wisdom, and a zeal moderated by prudence, he stepped into the difficult place made vacant by the death of the lamented Superintendent Morrill, and has succeeded in far more than realizing the expectations of his friends. With patient yet persistent perseverance, he has labored to secure every possible object that promised the improvement of our schools, and their condition today testifies to the large measure of success achieved.

Progressive in his views, he has taken no step and secured no changes that have not operated to the great advantage of the schools. With rare tact he has succeeded in winning the profound respect of our teachers, creating in their breasts a greater degree of enthusiasm for their work.

Resolved, That we recognize and heartily appreciate the uniform kindness, courtesy and gentlemanly bearing of Mr. Conley in all his relations to our schools and to the Board.

Resolved, That our kindest wishes go with him to his new field of labor, and that he has our assurance of confidence in a success there as great as he has achieved here.

Resolved, That these resolutions be spread upon the records of the School Board and a copy of them presented to Mr. Conley.

Respectfully submitted,

RANSOM A. GREENE,
WALTER H. LEIGHTON,
STEPHEN J. JOHNSON,

Committee on Resolutions.

In closing this report, I desire to acknowledge gratefully the co-operation and support accorded me by the Supervisor

of Evening Schools, the Truant Commissioners, the teachers of Lowell and the members of the School Committee.

Respectfully submitted,

GEO. F. LAWTON,

Supt. of Schools.

REPORT OF THE TRUANT COMMISSIONERS.

THE TRUANT COMMISSIONERS, in submitting their report, have nothing new to offer, as their duties are the same from year to year.

They find that the cause for absence among the scholars is much the same as last year: lack of proper clothing in winter months, and being detained at home by parents, who are obliged to leave young children in the care of others who are older, while they (the parents) are away from home, employed for the most part in the mills.

Yet there seems to be an increased desire on the part of the parents to keep their children in school steadily, which is gratifying to the Truant Officers and to the teachers as well, and which cannot fail to be productive of good to all concerned, while the attendance at school shows an increase in the monthly reports.

With the introduction of free text-books and the handling of all the supplies that go into our public schools, the duties of the Commissioners have materially increased.

One of the needs of the present time is better facilities for handling the books and supplies that pass through their hands, as everything has to be carried up two flights of stairs, and sometimes up three flights, and then down again as the needs of the teachers require. A room on the ground floor, in some suitable place, would very materially assist the Commissioners in that direction and make it possible for them to fill the orders from teachers with greater promptness.

They have endeavored to stop the practice of obtaining mill certificates fraudulently, as practised by a considerable number of children, who will obtain a certificate giving their age as 14, 15, or 16 years, as the case may be, and giving the same to a child less than 12 years of age; and in their endeavors they have been assisted by the State Inspector, Mr. John T. White, and by his advice are to have "Employment Tickets" issued to all the mills of the city, which shall have to be signed by the overseer to whom the child has applied for a place to work, giving a description of the age, height, complexion, color of hair and eyes, etc. The child will be required to present the same to the Truant Commissioners on his application for a certificate, and the child must correspond with the description on the "Employment Ticket." The ticket will be securely fastened to the certificate bearing the signature of one of the Truant Commissioners, both of which will be given to the overseer by whom the child is to be employed.

No certificates will be issued unless those applying shall present an "Employment Ticket" as evidence of the fact that they are the ones who desire the certificates for themselves and not for others.

The Board of Health have reported 36 cases of scarlet fever and 50 cases of diphtheria, and the officers have endeavored to assist them in preventing the spread of the same among the scholars.

They desire to thank the School Committee for their courtesy and kindness.

Respectfully submitted,

BICKFORD LANG,

WILLIAM H. BIRMINGHAM,

JOHN F. WILLIAMS.

REPORT OF THE TRUANT COMMISSIONERS FOR THE YEAR 1886.

1886.

 Bryce's *Aeneid* (last six books).
-

D.**COURSE OF STUDY FOR THE PRIMARY SCHOOLS.****FIRST YEAR.**

First Half—Monroe's Charts, and Franklin First Reader. Begin with words written upon the blackboard, using the names of familiar objects, and words expressing familiar acts.

- Combine words into groups and sentences.
 Pay particular attention to *tones* and *inflection*.
 Spell the words in columns, by sounds.

Develop the idea of number to ten, by the use of objects. Count to one hundred on the numeral frame.

Teach the construction of letters and figures, and the simplest form of script letters, using slate and blackboard.

Second Half—Monroe's Charts, and First Reader. Spell by sounds.

Write words, groups of words, and sentences upon the blackboard, and require pupils to copy upon the slate. Give special attention to the forms of the letters.

Add and subtract small numbers, using the numeral frame and objects.

Teach Roman numerals to L.

Follow the Grube Method in numbers as far as to 4.

Practice object teaching, using such objects as are familiar to the child.

SECOND YEAR.

First Half—Second Reader. Practice "Enunciation Exercises" daily.

Spell, by letters and by sounds, words in columns and in reading lessons.

Teach the simplest form of script letters.

Teach Arithmetic orally. Grube Method as high as 8.

Teach Roman numerals to M.

Second Half—Second and Third Readers. Practice "Enunciation Exercises" daily.

Continue to teach the simplest form of script letters, and write sentences from dictation upon the slate.

Teach Arithmetic, using the Franklin Primary, and see that the pupils read the questions fluently and correctly before solving them. Teach multiplication table to 8×8 .

THIRD YEAR.

First Half—Third Reader. Daily practice of exercise in enunciation. Spell words in columns and in reading lessons, by letters and by sounds. Teach the meaning of the words found in the reading lessons, and require scholars to use their own language in defining. Correct all faults in expression.

Teach all script letters, and require words and sentences to be written from dictation, upon paper.

Review the Arithmetic, taught during the second year, by oral questions similar to those in the text-books, and advance as far as practicable. Teach multiplication table as far as 10×10 .

Second Half—Third Reader. Continue exercises in enunciation, spelling, definitions, etc.

Use Miss Stickney's Child's Book of Language No. 1.

Review and complete the Arithmetic. Teach multiplication table to 12×12 .

Drawing should be taught in all the classes except first half of first year. In drawing and singing, follow the directions of the special teachers.

In each school a few minutes should be devoted at every session to physical exercises.

Monroe's Charts may be used at pleasure throughout the course.

E.

GRAMMAR SCHOOLS.

FOURTH YEAR.

READING.—Fourth Reader. Especial attention should be given the Introductory Exercises and the lessons in spelling and defining at the beginning of each reading lesson.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, to page 29; *Second Half*, from page 29 to 47.

ARITHMETIC.—From dictation; numeration and notation, addition and multiplication; amounts not to exceed a million. *Second Half*, from dictation; numeration and notation, addition and multiplication, subtraction and long division, not to exceed three periods. In subtraction, not more than two figures in the minuend to be less than the figures below them, and in division the divisor not to exceed 25.

LANGUAGE.—Elementary Lessons in English.

GEOGRAPHY.—Swinton's Elementary. *First Half*, to page 40; *Second Half*, from page 40 to 64.

HISTORY.—Child's Book of History as a reader.

MENTAL ARITHMETIC.—Thompson's Intellectual. Omit subtraction. *First Half*, to page 31; *Second Half*, including subtraction, from page 31 to 38.

FIFTH YEAR.

READING.—Fourth Reader, with daily drill on Introductory Exercises, spelling and defining.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, from page 47 to 69; *Second Half*, from page 69 to 93.

ARITHMETIC.—Bradbury's Eaton's Practical. *First Half*, to page 60; *Second Half*, from page 60 to 87.

LANGUAGE.—Elementary Lessons in English. *First Half*, to page 67; *Second Half*, from page 67 to 95.

GEOGRAPHY.—Swinton's Elementary Geography. *First Half*, from page 64 to 82; *Second Half*, from page 82 to end.

HISTORY.—Child's Book of History as a reader.

MENTAL ARITHMETIC.—Thompson's Intellectual. *First Half*, to page 42; *Second Half*, from page 42 to 65.

SIXTH YEAR.

READING.—Hilliard's Intermediate, with drill on Introductory Exercises, daily. Spelling and defining.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, from page 93 to 111; *Second Half*, from page 111 to 131.

ARITHMETIC.—Bradbury's Eaton's Practical. *First Half*, from page 89 to 102; *Second Half*, from page 102 to 134.

LANGUAGE.—Elementary Lessons in English. *First Half*, from page 95 to 137; *Second Half*, finish.

GEOGRAPHY.—Swinton's Grammar School Geography. *First Half*, to page 24; *Second Half*, from page 24 to 50.

HISTORY.—Child's Book of History as a reading book.

MENTAL ARITHMETIC.—Thompson's Intellectual. *First Half*, from page 60 to 80; *Second Half*, omitting Compound Numbers, from page 80 to 108.

SEVENTH YEAR.

READING.—Hilliard's Intermediate Reader, with drill on exercises to secure distinct articulation and correct pronunciation and expression.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, from page 131 to 139; *Second Half*, from page 139 to 145.

ARITHMETIC.—Bradbury's Eaton's Practical. *First Half*, from page 134 to 160; *Second Half*, from page 160 to 180.

GRAMMAR.—Greene's Introduction. Review Elementary English Lessons first half of year. *First Half*, to page 54; *Second Half*, from page 54 to 88.

GEOGRAPHY.—Swinton's Grammar School. *First Half*, from page 50 to 70; *Second Half*, from page 70 to 86.

HISTORY.—Higginson's Young Folks' History of the United States, to be taught "by reading and familiar conversation." *First Half*, to page 74; *Second Half*, from page 74 to 142.

MENTAL ARITHMETIC.—Thompson's Intellectual. *First Half*, from page 90 to 108; *Second Half*, omitting Interest, etc., from page 108 to 127.

EIGHTH YEAR.

READING.—Fifth Reader, with drill on Introductory Treatise. Spelling and definitions.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, from page 145 to 155; *Second Half*, from page 155 to 163.

ARITHMETIC.—Bradbury's Eaton's Practical. *First Half*, from page 180 to 204; *Second Half*, from page 204 to 229.

GRAMMAR.—Greene's Introduction. *First Half*, from page 88 to 123; *Second Half*, from page 123 to 149.

GEOGRAPHY.—Swinton's Grammar School. *First Half*, from page 86 to 106; *Second Half*, from page 106 to the end.

HISTORY.—Higginson's History of United States. *First Half*, from page 142 to 194; *Second Half*, from page 194 to 248.

MENTAL ARITHMETIC.—Thompson's Intellectual. *First Half*, omitting Bank Discount, from page 117 to 126; *Second Half*, from page 123 to 133.

NINTH YEAR.

READING.—Fifth Reader. Systematic teaching of the Introductory Treatise.

SPELLING.—Worcester's New Pronouncing Speller. *First Half*, from page 163 to end; *Second Half*, review whole book.

ARITHMETIC.—Bradbury's Eaton's Practical. *First Half*, from page 229 to 263; *Second Half*, review from beginning.

GRAMMAR.—Greene's Introduction. *First Half*, from page 149 to end; *Second Half*, review from beginning.

GEOGRAPHY.—Swinton's Grammar School. Review from beginning.

HISTORY.—Higginson's History of United States. *First Half*, from page 248 to 342; *Second Half*, review from beginning.

MENTAL ARITHMETIC.—Thompson's Intellectual. *First Half*, from page 133 to end; *Second Half*, review from beginning.

GENERAL DIRECTIONS.

In Arithmetic, mental work to accompany written work daily.

In Geography, discriminate between the important and unimportant details in assigning lessons. Use as reading lessons in the Grammar School Geography, the separate States, the separate countries of South America, of Europe, of Asia, and of Africa.

Spell and define words in the various text-books. Oral spelling should be combined with written spelling, but the latter should predominate. In all spelling exercises pronounce the word but *once*, to induce habits of attention.

Teachers will make frequent reviews of their own work, and also of the *work of preceding years*, for which they will be held responsible in examinations.

Declamation once a month by boys of First and Second Classes.

Compositions each week in every class, Elements of Book-keeping, Writing, Drawing and Music throughout the entire course.

F.

HIGH SCHOOL.

ENGLISH COURSE.

FIRST YEAR. *First Term*—Algebra, Outlines of History, English Composition. *Second Term*—Algebra, English History, Natural Philosophy.

SECOND YEAR. *First Term*—Geometry, Natural Philosophy, Physical Geography, French. *Second Term*—Geometry, Chemistry, English Grammar, French.

THIRD YEAR. *First Term*—Arithmetic, Rhetoric, English Literature, Astronomy, French. *Second Term*—Physiology, Geology, Political Science, French.

CLASSICAL COURSE.

FIRST YEAR. *First Term*—Algebra, Latin Grammar and Reader, English Composition. *Second Term*—Algebra, Latin Grammar and Reader, Natural Philosophy.

SECOND YEAR. *First Term*—Cæsar, Natural Philosophy, Geometry, French. *Second Term*—Cæsar, Chemistry, Geometry, French.

THIRD YEAR. *First Term*—Virgil, Arithmetic, Chemistry, French. *Second Term*—Virgil, Rhetoric, Political Science, French.

FOURTH YEAR. *First Term*—English Literature, Astronomy, German. *Second Term*—English Literature, Geology, Botany, German.

COLLEGE COURSE.

FIRST YEAR. *First Term*—Algebra, Latin Grammar and Reader, English Composition. *Second Term*—Algebra, Latin Grammar and Reader, Greek History.

SECOND YEAR. *First Term*—Cæsar, Geometry, Roman History. *Second Term*—Cæsar, Geometry, Greek Grammar and Lessons.

THIRD YEAR. *First Term*—Virgil, Greek Reader, Mathematics. *Second Term*—Virgil, Greek Reader and Composition, Mathematics.

FOURTH YEAR. *First Term*—Cicero, Xenophon, Physics, College French. *Second Term*—Cicero, Herodotus, Physics, College French.

FIFTH YEAR. *First Term*—Latin at sight, Homer, Physics, Chemistry. *Second Term*—Latin Reviews, Greek Reviews, Physics, Botany.

NOTE *a.* Those studies printed in italics are elective.

NOTE *b.* The choice of a study, and change in the choice of a foreign language must be subject to the approval of the principal.

NOTE *c.* Composition, Declamation, Reading, Music and Military Instructions are required throughout the course.

NOTE *d.* Book-keeping is elective.

STATISTICS FROM REPORT OF REFORM SCHOOL.

Pupils attending school January 1, 1886	83
Males under sentence	22
Females under sentence	1
Males not sentenced	48
Females not sentenced	12
Average monthly attendance	83
Average age under sentence	11 years.
Average age not under sentence	8½ years.
Highest number for any one month (in May)	100
Lowest number for any one month (in September)	60
Admitted on sentence	50
Discharged by expiration of sentence	26
Pardoned	6
Released on probation	1
Whole number attending school January 1, 1887	94
Committed for the following offences:—	
Truancy	40
Larceny	4
Vagrancy	4
Stubbornness	2
Birthplace of those under sentence:—	
United States	38
Ireland	4
England	2
Canada	4

Number of times committed:—

For the first time	41
" " second time	5
" " third time	3
" " fourth time	0
" " fifth time	1

Division of the twenty-four hours:—

Rise at	5.45 A. M.
Morning prayer	6.00 A. M.
Breakfast	6.30 A. M.
Recess
School	8.30 to 11.30 A. M.
Recess
Dinner	12.00 M.
Recess
School	1.30 to 3.30 P. M.
Supper, followed by recess	5.30 P. M.
Evening prayer and hour for retiring	7.15 P. M.

CARNEY MEDAL FUND.

* Received of James G. Carney, Esq.,
in 1858 and 1859, the amount of
two hundred dollars, which is to re-
main a perpetual debt of the
City forever; the interest to be ap-
plied in payment for the "Carney
Medals" to the departments of the
High School (annually)

\$200 00

----- \$200 00

Undrawn Jan. 1, 1887.....

\$200 00

* One hundred dollars was donated Aug. 24, 1858, and accepted by the City Council Sept. 14, 1858, and one hundred dollars additional, July 16, 1859, and accepted July 26, 1859. For the information of the citizens of Lowell, the Auditor respectfully refers them to the "Annual Report of the School Committee," for the year 1859, where all the correspondence between the donor and the recipient may be found.

CHAS. M. WILLIAMS.

JAMES C. ABBOTT.

CHAS. C. HUTCHINSON.

LOWELL, MASS., February 5, 1887.

I have examined the foregoing statement, and have personally examined the securities therein named, and hereby certify that the statement is a true copy of the Treasurer's books, and that the securities have all been produced and are in the possession of the Commissioners. I have also examined the income derived from the investments and find that it has all been entered upon the Treasurer's books and duly accounted for.

HENRY A. PIPER,

Accountant.

IN BOARD OF ALDERMEN, Feb. 8th, 1887.

Read and referred to the Joint Committee on accounts.

Sent down.

DAVID W. O'BRIEN,

City Clerk.

IN COMMON COUNCIL, Feb. 8th, 1887.

Read and referred to the Joint Committee on accounts.

WILLIAM J. COUGHLIN,

Clerk.

CITY OF LOWELL.

TO THE CITY COUNCIL:

The Joint Committee on Accounts of the City Council of the City of Lowell, to whom was referred the accounts of the City Treasurer and of the Commissioners of Sinking Funds, for the financial year ending Dec. 31, 1886, have attended to the business committed to them, and report:

The Joint Standing Committee on Accounts of the City Council of the City of Lowell for the year 1887, have made with the assistance of Mr. Henry A. Piper, expert accountant, of Boston, a thorough examination of the accounts of the City Treasurer and of the Commissioners on Sinking Funds, for the financial year ending Dec. 31, 1886, and find them to be correct. We herewith submit the report of Mr. Piper, the accountant, all of which is respectfully submitted.

M. J FLETCHER,

ROSWELL M. BOUTWELL,

*Joint Standing Committee of the City Council of the City of Lowell
for the year 1887.*

REPORT OF THE ACCOUNTANT.

LOWELL, FEB. 12, 1887.

TO THE JOINT STANDING COMMITTEE ON ACCOUNTS FOR THE CITY OF LOWELL:

Gentlemen :—I have made an examination of the books and doings of the City Treasurer for the year ending Dec. 31, 1886, and beg leave to submit the following report:

I have examined the cash book, and verified the footings thereof, and have also examined the vouchers for all disbursements, with the exception of the monthly bill drafts which were examined by your committee.

I find that every payment is supported by a voucher duly approved, and all of them appear to be legitimate and genuine.

I have examined the tax receipts, sewer and sidewalk assessments and water rates, and find the amounts as stated in detail have been duly entered upon the Treasurer's books.

I have balanced the cash of the Treasurer as it stood on February 11th, 1887, and find it to be correct. His books called for a balance in his hands amounting to.....

\$7,666 46

There was on deposit to the credit of the City as shown by the pass book of the First National Bank, which I have had the cashier write up and balance, an amount of.....

\$33,450 95

Amount carried forward

\$33,450 95

<i>Amount brought forward.....</i>	\$33,450 95
Deducting for checks not yet presented.....	28,276 50
Leaves amount as shown on the Treasurer's check book	\$5,174 45
Cash in office.....	2,492 01
	<hr/>
	\$ 7,666 46
The total amount received from Liquor Licenses during the year was.....	69,064 00
Of which one-quarter was paid to the State Treasurer, viz.....	17,266 00
	<hr/>
And the balance, amounting to.....	\$ 51,798 00
Was duly covered into the Treasury.	
The Treasurer's books show that the receipts of moneys during the year have amounted to.....	1,687,275 87
The balance on hand January 1, 1886 was.....	19,503 11
	<hr/>
	\$1,706,778 98
The disbursements during the year have amounted to.....	\$1,686,356 34
	<hr/>
Leaving in the hands of the Treasurer on Dec. 31, 1886	\$20,422 64
I have carefully compared the annual statement submitted to the City Council by the Treasurer, in which is shown in detail the receipts and disbursements above named, and hereby certify that it is a true copy of the Treasurer's ledger.	
The Collector's account of Taxes shows as follows, viz:	
Uncollected taxes January 1, 1886,	
For year 1883.....	\$ 1,287 73
For year 1884.....	18,831 91
For year 1885.....	75,577 54
	<hr/>
<i>Amount carried forward.....</i>	\$95,697 18

<i>Amount brought forward.....</i>	\$ 95,667 18
Reassessments on account of 1885.....	195 08
Assessments after commitment, 1886.....	6,785 80
Tax Warrant for year 1886.....	898,150 65
Total	\$1,000,828 71

The abatements made in 1886 were,

On account of 1883 taxes.....	\$ 1,287 73
On account of 1884 taxes.....	11,365 64
On account of 1885 taxes.....	780 73
On account of 1886 taxes.....	9,441 30
	\$ 22,875 40

The amount collected in 1886 was,

Of 1884 taxes.....	\$ 6,435 87
Of 1885 taxes.....	51,806 00
Of 1886 taxes.....	807,707 52
	865,949 39

The amount uncollected on Dec. 31,
1886 was,

Of 1884 taxes.....	\$ 1,030 40
Of 1885 taxes.....	23,185 89
Of 1886 taxes.....	87,787 63
	112,003 92
	\$1,000,828 71

As the result of my examination, I report that I found everything in connection with the detail examined by me to be correct, and that to the best of my knowledge and belief, all the income due to the City, has been properly accounted for.

HENRY A. PIPER,

Accountant.

REPORT.

DIRECTORS' ROOM, CITY LIBRARY,
LOWELL, December 23, 1887. }

To the City Council of Lowell:

The Directors of the City Library herewith submit their Annual Report for the year 1886 :

FINANCIAL STATEMENT.

RECEIPTS.

Balance on hand December 20, 1885,	\$344.76
Appropriation by City Council,	12,000.00
Received from dog licenses,	2,283.77
Received from fines,	264.65
Received from sale of catalogues,	53.20
Received for lost and damaged books,	9.10
Received from non-residents,	8.00
Received from all other sources,	11.69
Received by transfer from appropriation for school houses,	315.31
	\$15,290.38

EXPENDITURES.

Salaries	\$6,068.68
Rent and heating library and reading room,	2,000.00
Lighting library and reading room,	946.61
Books,	3,894.28
Periodicals,	629.78
Binding,	508.18
Insurance,	161.00
All other expenses,	1,081.85
	\$15,290.38

REPORT OF THE

CONDITION OF THE LIBRARY.

Volumes purchased,	2,741
Volumes added by gift,	87
Volumes added by binding periodicals,	208
Volumes missing and not paid for,	4
Estimated value of missing volumes,	\$3.00
Total number of volumes in the library,	30,822
Periodicals and papers subscribed for,	279
Periodicals and papers given,	13
Total number of periodicals and papers,	292

The total number of volumes in the Library was estimated in the last Report as *about* 30,000. This year the number of volumes represented on the shelf lists has been verified by comparison of the lists with the books on the shelves, the volumes in circulation as by the charging slips, and those in the hands of the binders or undergoing repairs in the Library. This gives a total of 30,822 volumes, not including a large number of pamphlets as yet unclassified. The classification of the contents of the Library is given in an appendix.

CIRCULATION.

Number of days the Library was open,	305
Number of volumes delivered for home use,	113,430
Number of volumes delivered for reference use,	3,504
Total circulation,	116,934
Average daily use (home and reference),	383
Largest daily use (home and reference) January 30,	1,007
Smallest daily use (home and reference) April 6,	150
Number of applications received during the year,	2,017
Number of names registered during the year,	1,833
Cards withdrawn for non-payment of fines, removals, etc., during the year,	2,804
Names registered December 20, 1885,	7,076
Total number of names registered at date,	8,233

The total circulation has been somewhat less than last year, a condition quite common in the annals of other libraries after the

lapse of two or three years from the date of their being opened as free libraries. The novelty at first induces many to take books who do not continue as steady patrons. The year, however, shows a noteworthy improvement in the character of the books read, in the increase of the reading of works other than fiction from 13 per cent. of the total circulation in 1885, to 19 per cent. the present year. An appendix gives the classified circulation.

In reviewing the work of the year, we find that the period since our last report has been a notable one in the history of the Library, an event of prime importance, hardly second to that of making the Library free to all, having been the adoption by the City Council of an amendment to the ordinance relating to the management of the Library, by which its affairs are virtually separated from political control and influence. This measure was brought about mainly through the efforts of Mr. Lawrence J. Smith, a member of the Common Council the present year, and a former member of this Board, who, undeterred by previous failures in his endeavors to secure this object, introduced a resolution to that effect in the lower branch of the City Council, which was there passed March 23, and took its final passage in the Board of Aldermen March 30. The text of the portions of the ordinance affected by the amendment is as follows :

SECTION 2. The Board of Directors shall consist of the Mayor, the President of the Common Council and Superintendent of public schools for the time being, and six other citizens, to be chosen in the month of January or February, 1884, by a concurrent vote of both branches of the City Council, or in case of a vacancy at any other time, in the same manner for the remainder of the unexpired term ; two of said members to be chosen for the term of one year, two for the term of two years, and two for the term of three years ; and thereafter in one of the said months in each year two members shall be chosen for the term of three years.

SECTION 4. There shall be chosen in the month of December, 1886, and whenever a vacancy occurs, by a vote of the Board of Directors, a librarian of the City Library, who shall hold his office until removed for cause.

SECTION 5. The Board of Directors * * * shall choose such assistants as may be needed in said Library and Reading Room.

In accordance with the requirement of the amended ordinance, the Directors, at a regular meeting on Monday evening, December 6, unanimously elected Mr. Charles H. Burbank to continue in the position of librarian, to which he had been chosen by the City Council at the beginning of the year.

Another matter of importance has been the insurance, for the first time, of the books contained in the Library, to the amount of \$20,000. This was divided among the several insurance agencies of the city, and effected at a cost of \$161, which will probably be lessened to some extent by the return of dividends by the mutual companies, with which a portion of the amount was placed.

The work of preparation for printing a catalogue has been pushed with all possible diligence, but has as yet been confined to the making of cross references. This involves the close examination of every book in the Library, except works of fiction, and referring to its appropriate place in the system of classification every subject contained therein which is not clearly comprehended in the title, and is of sufficient importance to be so noted. About two-thirds of the books to be examined have been thus passed in review. If the entire time of one person could be devoted to this somewhat onerous work, it could be quickly accomplished, but the multitude of other duties devolving upon the librarian have occasioned numerous interruptions to its steady progress. It is hoped, however, to have this labor completed early in the year. The next step towards the production of the catalogue will be the preparation of the manuscript for the printer. This will necessarily take considerable time, for it is a work requiring great care and accuracy, and the printed catalogue, when completed, will make a book nearly two-thirds as large as Webster's "unabridged Dictionary." The cost of merely printing and binding the catalogue will amount to several dollars a copy, but it is customary to charge the public only about half the cost of a catalogue, the city or town bearing the rest of the expense. The entire cost, however, must be provided for at the beginning and returns received as copies are sold. It has been the experience else-

where, that with catalogues ranging in price from one to two dollars, only a limited number, rarely exceeding 300 or 400, is taken in the first few months after publication ; then the sales fall off rapidly and only a few copies each month are called for. There is no reason to believe that it would be otherwise in Lowell. Although the printed catalogue will be a great convenience, and of almost inestimable value to some persons, a large proportion of the patrons of the Library would not purchase a copy for their own use and thus help defray a portion of its great cost. The work once accomplished, however, would be complete to the date of its publication, and as such, would endure to many years of usefulness, all subsequent work of cataloguing being supplemental thereto. Meanwhile, the public are reasonably well provided for with the card catalogue, which has the advantage of showing the very last addition to the Library, and which it is hoped to improve further, the coming year, by the adoption of a type-writer, which will make the cards more legible.

In the matter of additions great activity has prevailed, 2741 volumes having been acquired by purchase, 87 by gift, and 208 from periodicals received from the Reading Room and bound, making a total of 3036 volumes added to the Library during the year. Many of these have been works of great value, supplying deficiencies that have long existed ; many such have been procured at auction sales, at extremely low prices. In 1874, the Library directors were requested, in a communication signed by many prominent citizens, to procure French books for the already numerous inhabitants whose vernacular was that language. But little or nothing appears to have been done in the matter at that time. Quite early in the present year the librarian observed that large numbers of our French-Canadian population, both adults and children, were users of books, and that they took with avidity anything they could obtain in French. This led him to examine the resources of the Library in this department, which proved to be very meagre. Just as a list of classic and current French literature was being prepared for importation, an extensive private library of foreign books was announced for sale at

auction. Advantage was taken of this opportunity, and between 300 and 400 volumes were purchased, mostly in French but including a few in German and Italian, covering nearly every department of literature. It was almost feared that the class of reading thus provided would be too severe in character for popular appreciation. But the result has been contrary to this apprehension, works of history, biography, travel and general literature having been in much greater demand than romances or other light works. It is especially noticeable that translations of standard English works into French are much read, such as Milton's "Paradise Lost" and several plays of Shakespeare. Numerous works relating to the United States were included in this purchase, and are also eagerly sought. A classified list of the accessions during the year is given in an appendix.

The hope expressed in our last report, to restore the so-called directors' room to its former use as a reference room, has been fully realized. In it have been placed the encyclopædias, dictionaries, and general works of reference, together with many of the more costly art works and literary rarities and treasures, as far as its limited accommodations would allow, and the room has been opened freely to the public at all hours when the Library is open, except the single evening in each month when it is required for meetings of the directors. Here may be consulted at leisure not only such works as have been mentioned, but also any books in the Library. This privilege has been well appreciated by the public, and there is scarcely a day when the room is not visited by many persons, seeking information on all sorts of subjects. Between 3000 and 4000 volumes were consulted in this room during the year. That this important adjunct to the Library is destined to increase in the estimation of readers and investigators is beyond a doubt.

In view of all circumstances, it was not deemed advisable to carry out the plan suggested in the last report for procuring larger quarters for the Reading Room, though the necessity for such action is even greater than at that time. The room is far too small to

accommodate with comfort the large numbers who resort to it, and the usefulness of the institution will be greatly increased whenever its condition in this respect can be improved.

The relation of the Library to the public schools has improved to a considerable extent, but its resources are not yet employed by our teachers and scholars as they might be. The progress, however, made this year gives good encouragement for future gain in this direction. It has been said that if our schools are so conducted as to awaken a taste for knowledge and give a correct method in English reading, the free public library may represent the university brought to every man's door. And in endorsement of this view, Josiah Phillips Quincy remarks that "The function of a town library is to supplement the town schools; to gratify the taste for knowledge which they should have implanted, and to serve as an instrument for that self-education to which there is no limit." By invitation of Mr. G. F. Lawton, superintendent of public schools, who, by the amended ordinance, is now a member of this Board, the librarian addressed the school teachers of the city on this subject, in Huntington hall, Saturday afternoon, December 4, and it is hoped that the interest then awakened may bear good fruit. As soon as attention can be given to it, special details for the furtherance of this work will be arranged, of which due announcement will be made.

To accommodate the large number of volumes added during the year, additional shelving has been placed wherever possible, and the limit of such extension appears to have been reached. Nearly all of the room thus obtained is already occupied, and the question where to place the new books that are constantly coming to the Library becomes a serious one. The present quarters of the Library, at their best inadequate to accommodate the thousands who resort to it, are now entirely outgrown by the accumulation of books. The urgent need of the Library is for a building devoted solely to its use. This must either be provided by the city or supplied by private liberality. Not less than \$100,000 would be required to purchase a site and erect and properly equip a suitable library building, modest and

chaste in architectural proportions, but provided within with every approved appointment for the accommodation of the public and convenience of administration, and spacious enough to afford room for prospective increase for at least a generation to come; for the City Library has now passed the phase of being a mere purveyor of the ephemeral and trivial in literature for the entertainment of the multitude, and has attained the higher function of supplying food for thought, and of being a repository of all that is worthy of preservation in every department of human knowledge. In fact, its value in the community can hardly be overestimated, and the money which is spent upon it may properly be regarded rather as an investment than an expense, so large is the return. In his admirable address at the dedication of the Free Public Library building in Chelsea, James Russell Lowell happily said: "A college training is an excellent thing; but, after all, the better part of every man's education is that which he gives himself, and it is for this that a good library should furnish the opportunity and the means." And an English writer recently gave the opinion that "the great readers of the next generation will be, not our lawyers or doctors, shopkeepers or manufacturers, but the laborer and mechanic. The former work mainly with their heads, which are too exhausted for reading, and whatever leisure time they have must be devoted to air and exercise. The laborer and mechanic, on the contrary, besides being occupied often for much shorter hours, have in their work-time taken sufficient bodily exercise, and can therefore give any leisure they have for reading and study." As it must now be conceded that the educational influence of the Library is not only coequal but also supplemental to the work of the public schools to as great an extent as individuals may see fit to employ it in the pursuit of knowledge, it would seem to be as consistent for the city to appropriate money for the erection of a library building as for the construction of a new school house; and even more so, for while the former is for the instruction of our youth within certain limits of age, the Library affords opportunity to all, irrespective of age or condition, to drink

freely at the fount of wisdom. In many other places, however, private munificence has supplied this want, a few instances of which may be cited as examples worthy of imitation. In Chicago, by the will of the late Mr. Walter Newberry, \$3,000,000 became available a year ago "for the establishment and support of a free public library." In Baltimore, about the same time, by the generosity and public spirit of a living citizen, Mr. Enoch Pratt, there was opened a magnificent public library building, with a capacity of more than 200,000 volumes, and at the same time several branch libraries in suburban districts of the city. The whole amount of Mr. Pratt's gift, for the land, the building, books, etc., is upwards of \$1,000,-000, and will ensure an annual income to the library of \$50,000. Mr. Adolph Sutro is about erecting in San Francisco a magnificent building for a free public library, in which he will place his collection of 60,000 books, of exceptional value, all for the free use of the citizens. In Minneapolis the public spirit of the people has found expression in gifts which secure at once a library building costing more than \$200,000. And all about us, in New England, are to be found public libraries standing either as memorials to the departed or testimonials to the public spirit and generosity of the living, among which may be mentioned Haverhill, the gift, largely, of Mr. E. J. M. Hale; Fitchburg, the gift of Mr. Rodney Wallace, at a cost of \$84,500; Worcester, established by the benefaction of Mr. Green; Woburn, given by Mr. Winn; Chelsea, provided with a building by the generosity of the Hon. Eustace C. Fitts; Billerica, with the Bennett Library; Concord, Malden and Quincy. A visit to either of these beautiful and appropriate housings for books, with their perfect appointments and well adjusted systems of administration, should be enough, one would think, to inspire a desire to follow the example which they give. And on this point Mr. Lowell says, in the address at Chelsea before mentioned, "There is no way in which a man can build so secure and lasting a monument for himself as in a public library. Upon that he may confidently allow *Resurgam* to be carved, for through his good deed he will rise in grateful remembrance, and

14 REPORT OF THE DIRECTORS OF THE CITY LIBRARY.

in the lifted and broadened minds and fortified characters of generation after generation. The pyramids may forget their builders, but memorials such as this have longer memories." These examples and this suggestive utterance are commended to the serious consideration of our public-spirited citizens who have acquired wealth within our borders, in the hope that perhaps some of them may be moved to devote a portion of the well-earned reward of their industry to this noble and praiseworthy purpose.

A list of those to whom the Library is indebted for gifts of books is appended. Thanks are due to all, and especially to the local press for many kind favors during the year, in spreading information respecting the Library before the public, as well as for gifts of their publications for preservation.

REPORT.

OFFICE OF THE BOARD OF HEALTH, }
JANUARY 29, 1887. }

To the City Council:

In compliance with law and custom, the Board of Health submits its ninth annual report, together with a "review of the sanitary condition of the city." This report covers the year from January 1 to December 31, 1886. In 1885 the fear of small-pox and cholera kept up a constant interest in health matters, but no epidemic came and the year proved very healthful. In 1886 there has been no alarm, and no epidemic, but the mortality has largely increased, as will appear in the latter part of this Report.

COMPLAINTS AND NUISANCES.

Privy vaults, full,	681
Filthy cellars and yards,	65
Swine ordered removed,	31
Vaults ordered removed,	14
Privy vaults leaking,	6
Filthy water closets,	5
Ordered enter sewers,	5
Filthy houses,	4
Filthy henneries,	3
Defective plumbing,	2
Dead animals removed,	2
Filthy stables,	2
Houses ordered vacated,	2

REMOVAL OF ASHES, GARBAGE, FILTH, HOUSE DIRT, ETC.

This constitutes the largest expenditure under the direction of the Board of Health. During the year (1886) 16,080 loads of such material have been removed from the streets, and 518 loads from alleys and back yards. Five teams and ten men have been constantly employed in this way. The great object of this work is cleanliness. By this means, every family in the city is greatly benefited in comfort and health, and it is believed that this work has been thoroughly and faithfully done the past year.

HOUSE OFFAL.

This constitutes an important sanitary work carried on by the Board. It includes all waste matter collected in families, under the term of "swill." Formerly this was removed by private individuals, but experience proved that it was not collected regularly, especially in summer, nor was it always conducted in a cleanly and wholesome manner. In hot weather it frequently became a nuisance, a source of disease, and in many private families the quantity was so small that they could not readily dispose of it. As a sanitary measure it became absolutely necessary for the Board of Health to take charge of it. As in hotels, boarding houses, and large families the parties are allowed to dispose of it as they see fit, this embraces nearly all the large collections which are of much value, and can be turned to some account. Thus it requires much time and labor to collect these small quantities widely scattered in the city. In collecting and disposing of this swill, it requires five teams and eleven men all the time. One man is employed in its care and disposal, together with keeping the account. During the year 1886, 17,308 barrels were collected and sold. The receipts are turned toward the expense of carrying on the work, which amounts to nearly two-thirds of the cost. This business is carried on as a work of sanitation :—as much so as cleaning out the back alleys and yards.

The interests of private and public health demand that it should be done, even if no remuneration was obtained from this work. It should be stated that it is not four years yet since the Board took

charge of this business, and the income in proportion to the expense has been steadily improving. The time may come when this department will be a paying concern.

CONTAGIOUS DISEASES.

During the year, with the exception of small-pox, contagious diseases have prevailed, though not in an epidemic or malignant form. There have been reported to the Board 72 cases of diphtheria and 41 of scarlet fever. The latter has prevailed in a mild form, there being only four deaths, but diphtheria has proved quite fatal, 34 deaths, almost one-half. In nearly all these cases the premises have been visited to ascertain their sanitary condition, and to give precaution in preventing the extension of the disease. In some cases the cause was obvious, but in others not easily discovered; in quite a number of instances it could be traced directly to exposure in another case. But one thing was very evident, these diseases were widely scattered in the city. With two exceptions, there was only one in the same neighborhood, or in dwellings contiguous.

Measles and whooping cough, the latter part of the season, have been very prevalent in some parts of the city. As the law requires no notification of these diseases, the Board could not well take the same cognizance of them as of diphtheria and scarlet fever. As measles and whooping cough interfere very much with school exercises, and sometimes prove dangerous and fatal, it is a question whether more active measures should not be taken to check, if not banish, these diseases. Boards of Health undoubtedly have power to do this even if not directed by statute laws. Should the same measures be applied to control these diseases as are applied to diphtheria and scarlet fever, would the community sustain them? If not now, the time will come when this will be done. It is not merely the sickness accompanying these diseases, but their effects on the health and constitution afterward which is most to be dreaded.

SEWERS.

No fact in sanitary science is better established than that the health of a people depends much upon good sewers. These should

not only be properly constructed, but so distributed that the sewerage of every part of a city can conveniently enter them. In this respect the central parts of Lowell are pretty well provided for, but not so with some of the outskirts. Population has been rapidly extending in certain directions, so that there are large numbers now who have no sewer accommodations. In these localities, the streets, yards and grounds can neither be suitably drained, nor can their sink and privies have a proper outlet. The sanitary condition of these neighborhoods are suffering from this source, and there can be no doubt but this is one of the causes of our large mortality. Petitions have been sent into the city government from these localities, and hearings had upon them, but for two years very little comparatively has been done in this direction. In behalf of the sanitary interests of our city, several sewers should by all means be built this year. There are three reasons why a city should expend money liberally for sewers. First: The health of people demand it. Without good sewer accommodations there is always among such people a greater amount of sickness and mortality. Second reason: Justice demands it. Individuals and families who pay their proportion of taxes should be provided with similar accommodations to what others enjoy at public expense. The third reason: The pecuniary interests of a city demand it. The real estate thus favored becomes more valuable, and pays a higher tax. Besides, it is a strong inducement for people outside to remove to such a place and seek there a permanent residence. Thus, health, justice and property interest are benefited by having good sewer accommodations in every part of a city. While Lowell has done well in the past, there is an imperative need of better sewerage in certain neighborhoods.

VAULTS AND NIGHT SOIL.

In cities more complaints come from privy vaults than from all other sources. They are universally considered the greatest nuisance we have, and, at the same time, one of the most fruitful sources of disease. The construction, location, care, ventilation and cleaning out of vaults—each one of these comprise important items in the

account. But the cleaning out of vaults has always been found the most troublesome, and its management attended with the greatest difficulty. Formerly, their contents were removed by interested parties, and the work was performed mostly by night. But there was a general dissatisfaction with this course. The first Report of this Board designated "the night-cart system of emptying vaults the most intolerable of all nuisances." The Report of 1880 says, "The privy-vault system of our city is in the worst possible condition. Hundreds of these vaults are old and decayed. The contents of many of them have leaked out into the ground, until the earth about them is thoroughly saturated and has become the source of the most poisonous miasma. How long this contamination can continue without serious results is only a question of time."

In 1881, the process of cleaning out vaults by the "Odorless Excavating Apparatus" was introduced into Lowell, and it was expected there would be by this change great improvement in this business. The Reports of 1882-3 and '84 make very little account of the manner in which this work was done. The Report of 1885 makes no mention whatever of the subject. In 1886, soon after the Board had entered upon its duties, it was confronted with two facts; first, with numerous complaints of the unsatisfactory manner in which this work was carried on. To such an extent had these complaints prevailed, the remark was often made that there was no improvement over the night-cart system of former days. The other fact claiming the Board's attention was the large death rate of Lowell, especially as compared with other cities.

Upon careful investigation it was found that, with two other exceptions, the death rate of Lowell was higher than that of any other city in the state. It was also found that the cities generally which had used this "Odorless machine" for years had reduced their death rate.

In attempting to account for the large mortality in our city, the question arose, Has not the bad condition and unsatisfactory management of the vaults something to do with it? In view of these facts, it seemed as though some reform in this business was

absolutely necessary; that in order to secure better and more wholesome service it should be placed under strict rules and regulations, in such a way that these could be rigidly enforced. Whether this reform shall be carried out, and become established, remains to be seen.

RETURN OF DEATHS.

The law provides that if certificates are returned by undertakers, without a physician's name attached, stating the cause of death, the Board of Health must sign such certificate. The object is to see that there is nothing wrong in the death, and then, that there should be a correct list of diseases, accounting for each death. The number of such returns, probably over 100 each year, is larger than it should be. No sick person should be allowed to die without a physician being called to see if anything can be done to save life. There can be no excuse for such neglect, as the city provides a physician in every ward, who can be summoned any hour without expense to the party. There have been returns of deaths the past year, some of adults but more especially of children, where no physician had attended; on inquiry into the circumstances, it would look as though there was shocking indifference or neglect!

Might it not be well to have the law enacted to prevent cruelty to animals, apply also to human beings?

MORTALITY OF LOWELL.

The deaths for 1886 were 1499, making 170 more than in 1885, and 52 larger than ever in any previous year. Of this number 407 died under one year of age, and 618 under five. The leading diseases were: Cholera Infantum, 169; Consumption, 168; diseases of heart, 90; Pneumonia, 88; Old Age, 58; Typhoid Fever, 53; Croup, 39, and Diphtheria 34, making 699 from these eight causes. There was no epidemic during the year, and only 50 deaths from contagions. The number of deaths last year at the City Almshouse and St. John's Hospital was less than usual. The large mortality of 1886 does not seem to be occasioned by any one disease, but by an increase of deaths from several. The infant mortality as a class

was quite large. The deaths—407—under one year make 27 per cent., and the 618 deaths under five make 41 per cent. of the whole. The increased population of the city over 1885 will account in part for the increase of deaths, though not sufficient to make it satisfactory.

SANITARY CONDITION OF THE CITY.

The law directs that a Board of Health shall present in its annual report "a review of the sanitary condition of the city." There are three classes of facts which test the health or sanitary condition of a place. First, its death rate; second, the percentage of its infant mortality; third, the proportion of deaths in the zymotic class to the whole mortality. The zymotic class comprises those diseases which are considered preventable. The death rate based upon the population at the census of 1885 is 23.27 in a thousand, but would be reduced some in proportion to the increase of population in 1886. The average death rate for a series of years in the whole state does not vary much from 19 in a thousand, and also the same in all the cities of the state.

The mortality under five years is 41 for 1886 in a thousand, and for a series of years 37 in Lowell, whereas in the whole state the average is 35 in a thousand, and in all the cities of the state not much larger.

From a careful examination of the mortuary statistics of Lowell for ten years, it does not appear that there has been any reduction of deaths in the zymotic class of diseases, whereas in the state they have reduced almost one-quarter in the course of ten years. This is everywhere considered a sure test of the state and progress of sanitary science. In view of these facts, it is evident that there is much need of improvement in the sanitary condition of the city. While it may be difficult to explain all the causes of its high death rate, some of the more obvious demands attention. First, its infant mortality is too high. Some special means should be put forth for its reduction. Second, in certain quarters, densely populated, the death rate is extraordinary. For illustration, there were 107 deaths recorded by the city clerk in "1886" for "Little Canada!"

There are other localities where the laws of health and life are grossly violated, and greatly need renovation. No reform is likely to start spontaneously in those quarters. Third, there is another source which constitutes a fruitful cause of disease and death, that is the vault system. It has been found in all cities suffering from unusual sickness and mortality, that a bad condition and management of vaults was one of the primary causes. No sanitarian becoming acquainted with the past and present state of things here, on this subject, could come to any other conclusion than that this has had much to do with sickness and death in the city, and that a radical reform is here necessary as a *health measure*.

Fourth. There is still another cause of our increased death rate, which demands the attention of the city government. In several large neighborhoods in the outskirts of the city, no sewers exist by means of which the streets, grounds, yards, cellars, sinks and vaults can be drained. There can be no question but such a state of things must result in increased sickness and mortality. It is hoped some active measures will soon be taken towards remedying this evil.

In closing this report, we would gladly congratulate our citizens upon the good health and favorable sanitary condition of the city, but the facts and statements here made will not justify it.

Respectfully submitted,

J. W. B. SHAW,
NATHAN ALLEN,
J. J. COLTON.

Read and ordered on file.

Sent down.

DAVID W. O'BRIEN, *City Clerk.*

IN COMMON COUNCIL, February 8th, 1887.

Read and ordered on file.

WM. J. COUGHLIN, *Clerk.*

REPORT.

OFFICE OF CITY PHYSICIAN AND SUPT. OF BURIALS.

To the City Council:

GENTLEMEN — According to the usual custom and the requirement of the City Ordinances, I beg leave to present to your honorable board the following Report.

The number of deaths in the city, for the year ending December 31st, 1886, was 1499, showing an increase over the preceding year of 171. The causes of this large increase in mortality are several. Our population, as given at the last census, was 64,051. Taking the increase in the number of polls, and also that of the children of school age, as a basis, and the population of the city is estimated at several thousand more than the above figures.

The large number of dwelling houses that have been built, the most of which are at present occupied, would also indicate a decided increase in population. The percentage of deaths to 1000 population, by the census of 1880 (64,051), would be 23.40, while if we have a population of 70,000, it would be but 21.40.

The number of deaths from consumption, for the year 1880, was 235, the whole number of deaths being 1312. For the past year the deaths from consumption number only 168, showing quite a large falling off. There are reported 26 more deaths from heart disease than there were in 1880. There were also reported 42 more deaths from cholera infantum than in 1880.

There has not been any serious epidemic in the city during the year. Near the close of the year measles and whooping cough became very prevalent, and have made rapid strides among the children. And while no great mortality has been reported from

these diseases, still there can be no doubt that, indirectly, many more have succumbed to diseases incident to them. Pneumonia is credited with 92 deaths for the year, while for the year 1885 there were only 82. Bronchitis and croup are also much more prevalent after an attack of measles or whooping cough, and they are frequently followed by disastrous results.

POLICE STATION.

In the Report for 1885 mention was made of the utterly unfit condition of the Police Station for those so unfortunate as suddenly to meet with accident depriving them of reason. They are taken to the Station House and placed in a cell with absolutely no convenience for the sick. It is encouraging to see the city authorities looking about for some method to remedy this sad condition of things.

CITY HOSPITAL.

Mention was also made in the same report of the great need of a City Hospital, such as is found in other cities of the size and importance of Lowell. That need still continues, and probably will continue until some of our citizens of ample means shall see the necessity for such an institution and come forward and philanthropically build and endow it. What greater meed of praise could one desire than that of having established such a monument to his memory. Money is freely contributed to endow institutions of learning, and also those of a religious character. Why should it not also be forthcoming to relieve and comfort those suffering from disease. St. John's Hospital, it is true, does a great and noble work, and those who contribute to its support are deserving of all praise. But they cannot do everything. Besides, this hospital is often full to overflowing. We have, it is true, at the City Almshouse, a hospital department after its kind, and one as good as others of its kind. But who would care to suffer the agonies of disease with 30 or 40 in the same room? And who, with broken bones, would care to be taken two or three miles away to a hospital, and an almshouse at that? And yet this is the only place over

which the city authorities have control, and to which, if stricken suddenly with disease or accident, one can be sent for treatment. The city of Springfield has a hospital, and recently \$75,000 has been contributed by one of its benevolent citizens for its support and endowment.

CITY FARM.

The average number at the City Farm, for the past year, has been 326. The whole number of deaths was 41, as against 54 for 1885 and 49 for 1884. The deaths were due to the following causes, viz:

Apoplexy	2	Heart Disease	1
Brain Disease.....	1	Hereditary Syphilis.....	1
Brights Disease.....	2	Inanition	2
Cancer	1	Congestion of Liver	1
Consumption.....	12	Old Age	3
Debility.....	6	Paralysis.....	5
Dropsy	1	Syphilis.....	3

Five died under the age of five years, and sixteen were over 60 years of age. Twenty-three had been at the Farm less than six months, and twelve were there less than one month before death, and six less than two days before death. These were all sick when they came to the Farm, and were simply brought there to die, coming with no hope of recovery, as they would have gone to any hospital to be cared for while they should live. Only eighteen deaths occurred among the regular residents, and several of them had been there less than one year, and they came in a diseased condition. There was but one death among the children of school age, a boy of nine years who had chronic Brights disease. The whole number of school children was about 100. This certainly speaks well for those having them in charge. Good plain food at regular intervals, with an equable temperature and good ventilation, have done much more to preserve life and health for this class than could possibly have been expected had they remained at such homes as most of them came from. One of the serious diseases that afflicts

children in hospitals, or in institutions of this kind, is conjunctivitis, or ophthalmia, a contagious disease to which children are peculiarly susceptible. In some institutions in New York City from twenty to fifty per cent. of the inmates have at times been thus afflicted, and in former years it has been quite serious at the Farm. But by giving to each child a separate towel, and having arrangements for washing such that each one uses fresh water, as it comes in many streams from a long pipe over the sink, there is at present but very little suffering from this dangerous disease.

It is but just to add that the superintendent, matron and assistants do all in their power to ameliorate the sufferings of those who are committed to their care. A mother and her daughter, both afflicted with diseases of the lungs, left the institution, during the year, in a very comfortable condition, and in less than one week, through the influence of drink and exposure, both were dead. If they had remained at the Farm there is no doubt they might have lived for weeks or months, and in case of the mother probably for years.

Respectfully submitted,

JOHN J. COLTON,

City Physician and Supt. of Burials.

TABLE 1.

EXHIBITING THE NUMBER OF DEATHS DURING THE YEAR 1800; WITH THE CAUSES, AGE AND SEX.

ANNUAL REPORT

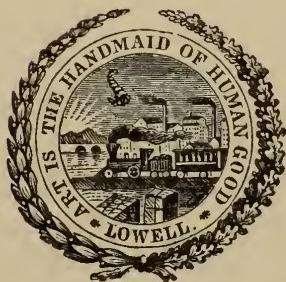

OF THE

BIRTHS, MARRIAGES AND DEATHS

IN THE

CITY OF LOWELL

FOR THE YEAR 1886.

LOWELL, MASS.:
CAMPBELL & HANSOM, PRINTERS.
1887.

CITY OF LOWELL.

IN BOARD OF ALDERMEN, March 16, 1887.

Received and ordered on file.

DAVID W. O'BRIEN, *City Clerk.*

IN COMMON COUNCIL, March 22, 1887.

Received and ordered on file, in concurrence.

WILLIAM J. COUGHLIN, *Clerk.*

REPORT.

CITY CLERK'S OFFICE,
LOWELL, MASS., March 16, 1887.

To THE CITY COUNCIL :

Gentlemen, — I herewith submit the Annual Report of Births, Marriages, and Deaths in the city of Lowell during the year 1886.

BIRTHS.

The number of children born alive during the year was 1883, an increase of 114 over the number recorded for 1885. In 1885 there were 907 males and 860 females, while in 1886 there were 927 males and 956 females.

Ward One reported 151 males and 180 females, including three pairs of twins and one illegitimate birth.

Ward Two reported 140 males and 146 females, including two illegitimate births, one case of triplets.

Ward Three reported 182 males and 180 females, including eight pairs of twins and two illegitimate children.

Ward Four reported 124 males and 140 females and one sex unknown.

Ward Five reported 202 males and 187 females. The returns for this ward include three pairs of twins and one illegitimate birth.

Ward Six reported 128 males and 123 females,—two colored and three illegitimate children, one case of triplets.

Of the number given in as above, there was in Ward One one born in previous years, but not recorded; in Ward Two there was one; in Ward Three there were three; in Ward Four there was one; in Ward Five there was one; in Ward Six there were eight; making a total of fifteen reported with births for 1885 and recorded in 1886, which should have been credited to previous years.

MARRIAGES.

The number of intentions of marriages recorded and issued in 1886 was 832, more by 123 than in the year 1885.

The number of marriages solemnized in Lowell for the year 1886 was 774. Marriages solemnized elsewhere, but returned and recorded here because one or both of the parties resided in Lowell, 39; making the total number of marriages recorded in Lowell for 1886, 813. This is more by 106 than the number recorded for the year next preceding.

As an index to the make-up of our population, the following table, showing the nativities of the parties married in 1886, may possess some significance:—

	Grooms.	Brides.
United States.....	397	402
Canada.....	155	158
Ireland	136	141
England	61	47
Scotland.....	11	9
Other foreign countries.....	53	56

DEATHS.

The number of deaths in 1886 was 1,499, an increase of 171 over the number reported for 1885.

Further details and information as to the causes of death may be found in the Report of the City Physician and Superintendent of Burials.

Copies of the Record of Births, Marriages and Deaths, for the year 1886, have been sent to the Secretary of the Commonwealth, as required by law.

Respectfully submitted,

DAVID W. O'BRIEN,

City Clerk.

ANNUAL REPORT

OF THE

CHIEF ENGINEER

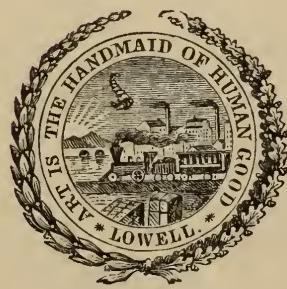

OF THE

FIRE DEPARTMENT,

OF THE

CITY OF LOWELL,

FOR THE YEAR 1886.

LOWELL, MASS.:
HARRINGTON BROS., PRINTERS, SUN OFFICE.
1887.

CITY OF LOWELL.

IN BOARD OF ALDERMEN, March 2, 1887.

Read and ordered on file. Sent down for concurrence.

DAVID W. O'BRIEN,

City Clerk.

IN COMMON COUNCIL, March 22, 1887.

Received, read and ordered on file in concurrence.

WILLIAM J. COUGHLIN,

Clerk.

REPORT.

CHIEF'S OFFICE, ENGINE HOUSE, MIDDLE ST.,
LOWELL, January 1, 1887.

To the Honorable Mayor and Board of Aldermen:

Gentlemen:—In accordance with the requirements of the ordinance governing the Fire Department, it becomes my duty, as Chief Engineer, to present to you the annual report of the Fire Department of Lowell for the year ending Dec. 31, 1886. Owing to a change in the Ordinance the report will be made out in January instead of March, as in years past.

The report will be found to contain statements in detail, embracing the amount of expenditures, a register of the Department, with number of badge, age, residence and occupation of each member; a record of all fires and alarms which have occurred during the year and the causes thereof, with the names of the owners or occupants, the loss and insurance as near as could be ascertained; with the number and location of fire alarm boxes, hydrants and reservoirs, with an inventory of all property belonging to the department in charge of the several companies, and such other information as is thought proper for your consideration.

The amount received from appropriations and other

sources was \$66,438 59. The expenses of the Department have been \$61,212 98.

The following statement will show the receipts and expenditures:

RECEIPTS.

Appropriation	\$65,000 00
Receipts.....	1,438 59
	<hr/> \$66,438 59

EXPENDITURES.

Pay Roll.....	\$39,767 07
Alterations and repairs on buildings.....	2,931 34
Alterations and repairs on fire-alarms.....	2,235 23
Repairs on steamers, hose carriages, wagons, etc.....	1,185 84
Exchange of horses.....	2,286 00
Boilers for heating buildings.....	417 35
Hay, grain and straw.....	3,628 13
Harness and repairs.....	341 88
Veterinary services and medicine.....	251 62
Paid on hose (6's) house.....	4,637 90
Horse shoeing.....	433 58
Rent	300 00
Coal.....	925 87
Gas	466 33
Telephone and rental of instruments.....	345 00
Laundry.....	73 08
Beds, bedding and furniture.....	295 65
Oil, sponges, brooms, dusters, soap, etc.....	559 84
Incidentals.....	131 27
	<hr/> \$61,212 98
Transferred to Appropriation of Schools.....	\$3,000 00
Balance on hand Jan. 1, 1887.....	2,225 61

Firemen of Steamers.....	175	"
Call Men.....	175	"
Drivers and Permanent Men.....	2.50	per day

FORCE

The Department consists of a Chief and four Assistant Engineers ; one Fire Alarm Telegraph Operator ; three Steam Fire Engine Companies, one of twelve and the other two of eleven men ; four horse Hose Companies of nine men ; two hand Hose Companies of ten men ; two Hook and Ladder Companies, one of ten and the other of fifteen men ; one Protective Company of seven men ; and one Chemical Engine Company of four men ; making a total of one hundred and thirty-two men ; of which thirty-one are permanent and devote their whole time to the interest of the city ; the remaining one hundred and one men are subject to call only during an alarm of fire. In addition to the duties pertaining to his office, the Chief has charge of street lights.

APPARATUS.

The apparatus of the Department is kept in the best possible condition, and comprises four Steam Fire-Engines ; seven four-wheeled two-horse Hose Carriages ; two Hook and Ladder Trucks ; one Chemical Engine,

and one Protective Wagon fully equipped; eight Hose Pungs on runners; Horse, Harness, Wagon and Sleigh for the use of the Chief; three traverse-runner Sleighs; one traverse-runner Sled; seven exercise or fuel wagons and two Fire Alarm Wagons. In addition to the above we have a four-wheeled Horse Hose Carriage loaded with Hose and kept in No. 5's house; three four-wheeled Hand Hose Carriages with five hundred feet of Hose on reel, one stationed in Pawtucketville, one at Ayers City, the other at the City Poor Farm.

FIRE ALARM TELEGRAPH.

This important branch of the service has been ably performed by the operator, George B. Whitney; the work of this branch is continuous and exacting, and great care has to be exercised to protect the wires from interference with the telephone and other wires; but the lines have been kept in perfect working order during the year; there are some two miles of old wire yet to be renewed. Connected with the service there are nine bell strikers, eleven Engine House Gongs, eight Engineers' Gongs, eleven Electrical arrangements for opening all doors, etc., eleven Registers, sixty-nine Signal Boxes, one six circuit non-interfering Repeater, one cut-out and testing Switch Board, eight Galvanometers, three hundred and twenty Cups of Battery, fifty-eight miles of wire and 468 poles. There was added to the system last year 1 bell striker, 8 boxes, 3 miles of wire and 45 poles. The committee of last year contracted

for the entire remodelling of the Fire Alarm System, at an expense of \$3750, making all boxes perfect non-interfering where heretofore there were in use four different styles of boxes, altering all bell strikers to the latest improved pattern, new coils, etc., and a new 10 circuit Repeater, Switch Board, Galvanometer, Arrester, etc., for the central office, as the 6 circuit Repeater was too heavily loaded to rely on it with safety, as the circuits were too long, being only 6 in number. With the new change we shall have as complete and efficient system as there is in use anywhere. I also recommend the erection of at least 6 signal boxes the present year; we have had some trouble by telephone wires coming in contact with Electric light wires, making a cross or connection with the Fire alarm wires, and in one instance nearly destroying the repeater; but in November the committee purchased of the National Protective Company of New York, enough protectors to protect the repeater and the Engine House Gongs, etc., from trouble with the electric light; it is a small instrument that carries off all the extra current, and I would recommend the purchase of enough more to protect all the boxes as the expense is slight compared with the damage that is liable to be done without them.

TELEPHONE.

The telephones are a great benefit to the department and to the Citizens who have notified the department of many fires the past year; there are connected with the system fifteen complete stations, thirteen extension bells;

about eleven miles wire, constructed, owned and maintained by the city, except the hand telephones and transmitters, which are rented from the telephone company.

HORSES AND HARNESSSES.

The number of horses belonging to the department is twenty-eight, in good condition; six (6) have been procured by change during the year. There are twelve pairs of double and six single harnesses, twelve Berry patent swinging harnesses.

HOSE.

There is in the Department at present 7500 feet cotton rubber-lined hose, 5000 feet leather, 1600 feet of rubber, making in all 14,100 feet. I would recommend the purchase of a certain amount each year, as a supply of good hose is a very essential thing.

HYDRANTS.

During the year thirteen new Post hydrants have been added and the two Flush discontinued and one taken out, making a total number of hydrants seven hundred and seventy for which this department was charged annually twenty dollars each; the Post hydrants added are located: 1 Baldwin, 1 South Loring, 1 West Pine, 1 La Grange, 1 Bartlett, 1 High, 1 Bowers, 2 Varnum Avenue, 1 Aiken Avenue, 1 School, 1 Anderson, 1 Lawrence.

The amount paid by this department for water last year was \$15,400.00, making the appropriation for Water and Fire Departments \$80,400.00.

PROTECTIVE DEPARTMENT.

This organization consists of one company of seven men, four of whom are permanent; one wagon drawn by two horses, fully equipped with all the paraphernalia requisite for the protection of property from damage by water, and are maintained by the city. This company has spread one hundred and eighty-five blankets the past year, used hand grenades eighteen times, and the extinguishers sixty-five times. Hours of service, seventy-nine. The promptness and efficiency of this department have been the means of saving much valuable property the past year.

CHEMICAL ENGINE.

Organized in 1885, and consists of one company of four permanent men; one double tank Engine, holding seventy-five gallons each, of the Perkins pattern, built by the Chicago Extinguisher Company, and drawn by two horses. It has given very good satisfaction.

HOUSES.

There will be repairs needed in some of the houses, a new floor will be laid in Steamer 3's house and Hose 5's. The lumber is now in the dry house; there will be some slight repairs needed in some of the other houses. The new house contracted for for Hose 6 will be ready for occupancy about the first of March.

FIRES AND LOSSES.

I have the pleasure of repeating that the year just closed has been one of remarkable exemption from losses by fire; the promptness with which alarms have been given, and the prompt response by the Department, have prevented, in some cases, what threatened to be serious conflagrations. The whole number of alarms of fire that occurred during the year ending Dec. 31, 1886, was 95, of which 58 were given from signal boxes, 11 by telephone, and 26 still alarms, showing an increase of 7 over last year; the telephone and still alarms were attended by the apparatus and men of the Department, and by their timely arrival and without alarming the whole city by sounding a bell alarm, have, in some instances, prevented serious fires. The whole amount of loss by fires as near as can be ascertained, was only \$23,960.16; the whole amount of insurance was \$141,607.00, the amount of insurance paid was \$23,870.16, making the whole amount of loss above insurance \$90.00, which fully sustains the reputation of the Department for promptness and efficiency; there has been a few incendiary fires; but a large proportion of them have been caused by carelessness. The Department has responded to two fires out of the City, one Aug. 21st at 10.30 P. M., was a House and in North Chelmsford. Assistance called for from Haverhill, a portion of the Department was loaded on cars ready to proceed, but a telegraph dispatch was received stating that the fire was under control. There has been no serious casualties the

past year and no death in the Department. One death by burning, Mrs. M. Hayes, caused by the explosion of an oil can.

LOWELL FIREMEN'S FUND ASSOCIATION.

This benevolent association was organized December 17th, 1853, for the purpose of affording relief to such of its members as should receive injuries while in the discharge of their duties; the importance of this association to the Department cannot be overestimated. The income is derived by an annual assessment upon each member; by donations from citizens and others; and in behalf of the association I would return thanks to those citizens who have aided them in the past.

Cash on hand May 1, 1886.....	\$10,028 45
Received to Jan. 1, 1887.....	270 70

	10,599 15
Paid out to Jan. 1, 1887.....	46 00

Balance Jan. 1, 1887.....	\$10,553 15

I would recommend that an ordinance should be passed, regulating the sale of kerosene, or so-called non-explosive fluids; also our building laws are very imperfect, and in fact we have none. We have a small fire-district; but citizens wishing to make additions or enlargements of their buildings apply to the Board of Aldermen for a license which is usually granted; and new buildings which are being built in the district are not looked after by any one, and consequently are not built

strictly after the ordinance; and outside of the district persons erect large four and five-story wooden buildings for stores and tenements, without a fire-wall or fire-escape, and in many cases with only one very narrow stairway to the upper stories, which are nothing more than a death-trap for those who occupy them. Another trouble arises from the bad construction of some of our chimneys, and in parts of the city a hole cut through the roof or side of a building, with a stove pipe stuck through for a chimney; not only endangering their own, but the adjoining property to destruction. The infrequency of fire the past year ought not to make us unmindful of our duty, looking to the safer protection of the future of our city. There should be stringent building laws made, both in regard to the nature and construction of buildings, and for an Inspector of Buildings, whose duty it should be to examine and approve the plans of all buildings, and to see that the conditions prescribed by the laws are complied with as regards the public safety; and who should have power to remove dangerous buildings and structures.

In conclusion of this, my annual report to your honorable body, I desire to express to you my warm appreciation and sincere thanks for your various actions, by which the department has secured greater efficiency and skill to cope with fires. Our relations have been most cordial during the year just closed, and for all this, and your support of such measures as I have thought fit to suggest for the improvement of the Department, I am under obligations to you. I also wish to tender the

Superintendent of Fire Alarms my respects for the continued improvement he has made in our system of receiving alarms, and for his endeavors to second all steps tending toward a higher degree of efficiency. My present assistants are capable men, whom I have always found at the post of duty; and I am under obligations to them for their cheerful and well-directed efforts to secure first-class work. The members of the Fire Department are intelligent, industrious men, who have not flinched in the hour of danger, and who have made constant efforts to improve in their methods of work. I can sincerely praise them for the record made in 1886. My thanks are also due to the Committee on Fire Department, for their hearty co-operation to all matters tending to the improvement of the Department; to the Marshal and other members of the Police Force, for their valuable assistance at fires and on other occasions; to the City Clerk, Auditor, Treasurer, Superintendents of Streets and Water Works, and all other officials with whom I have had pleasant intercourse.

Respectfully Submitted,

THOMAS J. FARRELL,

Chief L. F. D.

Extension Bells for sleeping rooms.....	13
Miles Wire.....	11

GENERAL RUNNING ORDERS.

The companies will respond to alarms of fire given from boxes as indicated on the running card.

The Chief, First Assistant and Protective Company will answer alarms from all boxes.

When an alarm of fire is given all companies not responding will remain at their houses thirty minutes, unless dismissed by telegraph signals, viz : One blow on the engine house gongs and alarm bells will be understood as proclaiming the fire extinguished, and the companies not attending be dismissed ; two strokes will constitute a general alarm, and all companies will respond immediately, after waiting 30 seconds to be sure that it is not an alarm from another box. After a first alarm is given and before the recall signal is struck, should an alarm be given from another box, all unemployed companies will respond after waiting twenty seconds.

INSTRUCTIONS TO KEY-HOLDERS.

Alarms are to be given from the box nearest the location of the fire.

Upon the discovery or positive information of a fire, you will unlock the box, pull down the slide or hook once only, and let go. If you hear no sound from the bell in the box, pull again. If you fail a second time, go to the next nearest box and do the same. Also be particular to remain at the box until the arrival of an engineer, who will release the key.

Each box contains a small bell, which if heard, before you pull the hook, indicates that the alarm has been previously given from another box. In such cases, do not pull the hook, until you are sure the alarm has been completed.

Never signal for a fire seen at a distance; never touch the hook except to give an alarm of fire. Give an alarm for no cause other than an actual fire.

Second alarms for the same fire will be given only by one of the Engineers.

Never let the key go out of your possession unless called for by the Chief Engineer. If you change your residence or place of business where the key is kept, return the key to the same officer.

Keys to the boxes are in possession of responsible persons in the vicinity of the signal boxes; also in the hands of the police.

Citizens are requested to inform themselves where the keys to the signal boxes are kept.

COMPANIES RESPONDING TO TELEPHONE ALARMS.

DISTRICT No. 1.—South side of Pawtucket Canal and west side of Boston & Lowell R. R. Nos. 1 and 2.

DISTRICT No. 2.—East side of Boston & Lowell R. R., to and including Hale, South Highland, Walnut, Whipple and Watson Streets, to Concord River. Nos. 1 and 6.

DISTRICT No. 3.—East side of Boston & Lowell R. R., Appleton, Middlesex and Jackson, to and including South Street. Nos. 2 and 6.

Benjamin Walker, councilman.
John Nesmith, councilman,

1865.

George W. Norris, alderman.
Edward F. Watson, alderman.
Charles W. Dodge, councilman.
T. L. P. Lamson, councilman
John Pearson, councilman.

1866.

Josiah G. Abbott, mayor.
Charles W. Dodge, alderman.
Joseph L. Sargent, alderman.
Benjamin Walker, councilman.
Edward C. Rice, councilman.

WATER BOARD, 1887.

President WALTER COBURN.

Term expires first Monday in May, 1887.

C. A. R. DIMON,

Term expires first Monday in May, 1888.

ALDERMAN JAMES FRANCIS.

Councilman ARNOLD S. WELCH.

Councilman FRANK W. HOWE.

Clerk ANDREW J. DEVOLL.

Superintendent of Works HORACE G. HOLDEN.

Foreman of Works THOMAS DOYLE.

Engineer at Pumping Station JAMES P. ROBERTS.

Service Clerk LEONARD T. FARRIS.

Inspectors.

JOHN J. BANCROFT.

THOMAS E. LENNON.

WILLARD S. KNOWLTON.

HENRY E. SPRAGUE.

Meter Inspector.

ROBERT GARDNER.

 The Water office is open daily, from 9 a. m. to 3 p. m., and on Monday evenings, from 7 to 8 o'clock.

REPORT OF THE WATER BOARD.

OFFICE OF THE LOWELL WATER BOARD,
LOWELL, MASS., JAN. 10, 1887.

To the City Council of the City of Lowell:

GENTLEMEN—The Lowell Water Board in accordance with the Ordinances of the City of Lowell herewith presents the Fourteenth Annual Report of the Board:

The year 1886, like its predecessor, shows a continued increase in net charges for water used, and the Department has reached a point where it is self-sustaining. The increase over the preceding year is \$9,903.43, leaving us a balance of \$4000 over all expenses. The dwelling houses of the Engineer and of the man in charge at the Beacon Street Reservoir have been put in thorough repair at a cost of some \$800, and the expense charged to maintenance. The Works are as nearly completed as they ever will be, as extensions and improvements will be necessary every year, to a certain extent.

The Department in all its branches is in excellent condition.

For details of the workings of the Department, we would refer you to the Report of the Superintendent and Report of the Engineer accompanying.

The first meeting of the Board for 1886, was held January 25th.

The Board, consisting of the following members, Walter Coburn, President, and Col. C. A. R. Dimon from the citizens, and Alderman James Francis and Councilmen Arnold S. Welch and Frank W. Howe, from the City Government.

ORGANIZATION.

The Annual Organization under the City Ordinances occurred May 3d. The Board was composed of the same members as above—Col. C. A. R. Dimon having been re-elected as a member of the Board from the Citizens. The Board organized by the choice of Walter Coburn as President, and A. J. Devoll as Clerk.

CONTRACTS.

February 3d a contract was made with the Mellert Foundry and Machine Company, of Reading, Pa., for one hundred and fifteen tons of pipe and specials amounting to \$3,209.50. July 17th a contract was made with Wm. E. Livingston for one thousand tons of Maryland Co.'s Cumberland Coal, at \$4.65, delivered.

STATISTICS.

The total amount of water pumped during the year was 1,441,622,640 U. S. gallons, an increase over the year 1885 of 141,856,360 U. S. gallons. The daily average was 3,949,738 U. S. gallons pumped into the Low Service, and 55,487 U. S. gallons pumped into the High Service Reservoir,

an increased daily average over the year 1885, in the Low Service, of 338,834 U. S. gallons.

1392 $\frac{5}{8}$ tons of coal have been used during the year, 31 1-2 tons of which were used for the High Service engine; 245 tons for the Worthington engine; 1,107 1-4 tons for the Morris engine.

There have been 321 $\frac{4}{7}$ gallons of water raised 164 feet high for each pound of coal consumed by the High Service engine, 432 $\frac{2}{7}$ gallons raised 164 feet high for each pound of coal consumed by the Worthington engine, and 551 $\frac{8}{7}$ gallons raised 164 feet high for each pound of coal consumed by the Morris engine. These remarkable results show the perfect condition in which the property of the city is kept at the Pumping Station.

The result of the year's work at the Pumping Station is gratifying to the Board, and to every citizen interested in the Department. The cost of pumping 1,000,000 gallons has been reduced from \$7.12 in 1885, to \$6.52 in 1886, by the Morris engine, and from \$8.22 in 1885, to \$7.53 in 1886, by the Worthington engine.

This is the lowest cost ever reached by this Department, and our Engineer, Mr. James P. Roberts, may feel a justifiable pride in the results attained.

The total net charges for water-rates for the year, after deducting all abatements and charges for service pipes, have been \$163,651.75, against \$153,748.32 for the year 1885, an increase for the year of \$9,903.43. Total number of water-takers, 14,710.

The following table will show the monthly charges for water from the commencement of the Works to Dec. 31, 1886, with all abatements and total net charges:

Charges for Water by Months, from Commencement to December 31, 1886.

" 1880	154,391.59
" 1881	231,171.27
" 1882	173,645.92
" 1883	179,713.23
" 1884	174,552.71
" 1885	175,880.24
" 1886	167,343.52
Gross cost of Works to Jan. 1, 1887.....	\$4,089,239.31
Receipts from various sources to Jan. 1, 1887.....	1,702,435.50
Net cost of Works to Jan. 1, 1887.....	\$2,386,803.81

The following table will show the expenditures and receipts of the Works from 1873 to 1887, exclusive of the interest on the Water Debt;

	Expenditures.	Receipts.	Expenditures in excess of receipts.	Receipts in excess of expenditures.
1873	\$188,376.59	\$ 57,739.48	\$130,637.11	
1874	128,108.63	80,625.66	47,479.98	
1875	170,095.78	94,908.14	75,187.64	
1876	115,012.24	98,815.54	16,196.70	
1877	53,988.72	100,825.63		\$46,837.91
1878	49,900.15	104,142.87		54,242.72
1879	42,157.82	110,185.34		68,027.52
1880	45,031.59	123,740.49		78,708.90
*1881	121,601.27	128,053.97		6,452.70
†1882	64,525.92	140,397.96		75,872.04
1883	65,673.23	152,582.99		86,909.76
1884	64,982.71	154,437.55		89,454.84
‡1885	64,030.24	157,956.79		93,926.55
1886	51,808.52	168,757.53		116,949.01

*In 1881 there were expended the following extraordinary amounts:

For river crossing, 24-inch reserve line.....	\$ 9,988.59
For high service water supply.....	57,969.39
†In 1882, high service water supply.....	10,898.59
‡In 1885, Beacon street reservoir.....	14,766.27

Had these extraordinary expenses not occurred, the excess of receipts over expenditures for those years would have been respectively \$74,410.68, \$86,-770.63 and \$108,692.82.

This Department received an appropriation of \$3000 for 1886, which sum covered the amount to be paid yearly on the temporary loan of \$15,000, levied in 1885, for repairing the paving of the Beacon Street Reservoir.

Superintendent Holden's length of service and the excellent condition in which streets and sidewalks are left, after being torn up by putting in new, or renewing old service pipe and repairing mains, attest his attention to duty, and the value of his knowledge and experience as an officer of the department and a servant of the city.

Mr. A. J. Devoll, the Clerk of the Board, has attended to his duties in a thoroughly satisfactory manner, not only to the Board but to all who have had occasion to do business with the office; the books of the Department are well kept, and collections closer than for several years past.

The force of Inspectors has been increased by one man, whose especial duty it is to detect leaks and undue waste. The result, after a short experimental trial, has more than realized the expectations of the members of the Board who proposed the addition.

Clerks and assistants in the office have been employed from time to time as the service requires, without regard to political results or criticism.

During the year a machine shop has been built at the Pumping Station, and placed under the supervision of Mr. Roberts, for the repair of meters. It has been satisfactory in its workings and has saved considerable expense to all whose meters have needed repairs.

The Ordinance licensing Plumbers and Pipe Fitters, has not proved as great a success as the Board of 1885

had anticipated. For the City to receive the full benefits of the Ordinance, there should be appointed an Inspector of Plumbing and Piping, to enforce its provisions.

Respectfully submitted,

WALTER COBURN,
CHAS. A. R. DIMON,
JAMES FRANCIS,
ARNOLD S. WELCH,
FRANK W. HOWE,

Members of the Lowell Water Board.

IN WATER BOARD, Jan. 10, 1887.

FOURTEENTH ANNUAL REPORT

OF THE

City Engineer to the Water Board.

JANUARY 1, 1887.

REPORT OF THE ENGINEER.

OFFICE OF THE CITY ENGINEER,
LOWELL, MASS., Jan. 1, 1887.

To the Lowell Water Board:

GENTLEMEN:—The undersigned respectfully submits the Fourteenth Annual Report of the work done by the pumping engines at the Pumping Station, and the records as taken at the Beacon Street Reservoir.

The calculations of the duty of the engines were made from the records kept by Mr. James P. Roberts, the engineer in charge.

All the coal used at the Station has been charged to pumping, including what is used for running the small stationary engine, which drives the machinery in the new shop.

In the calculation of the duty nothing has been deducted for ashes or heating the building, and nothing added to the head for friction in the pumps.

The largest quantity pumped during any run of twenty-four hours, is as follows: Morris Engine, December 10th, 6,045,440 gallons, and the Worthington Engine, October 14th, 6,631,830 gallons. The Worthington High Service Engine pumped January 26th, in fifteen hours, 572,264 gallons.

In the table of the running expenses of the engines the amounts will not agree with the pumping account as given in the report of the Water Board, for the reason that only the articles used during the year are included. In making up the cost of running expenses the pay of the men is divided proportionally to the number of hours run by each engine (Morris 84 per cent. and Worthington 16 per cent.).

The cost of repairs on boilers, sundries, tools and stock is divided proportionally to the quantity of water pumped by each engine (Morris Engine 86 per cent., Worthington Engine 14 per cent.).

The average cost of pumping one million gallons from the Beacon Street Reservoir to the High-Service Reservoir, is eight dollars and eighty-five cents, which added to the cost of raising the same quantity into the Low-Service Reservoir, makes the total cost of raising one million gallons into the High-Service Reservoir fifteen dollars and thirty-seven cents.

FOURTEENTH ANNUAL REPORT

OF THE

Superintendent of Water Works,

TO THE

LOWELL WATER BOARD.

JANUARY 1, 1887.

REPORT OF THE SUPERINTENDENT.

SUPERINTENDENT'S OFFICE, CITY HALL,
LOWELL, JANUARY 1st, 1887.

To the Lowell Water Board:

GENTLEMEN:—In compliance with the requirements of the City Ordinance relating to the Water Works, I respectfully submit herewith the Fourteenth Annual Report of the Superintendent of the Lowell Water Works, for the year ending December 31st, 1886.

The total amount of water pumped into the reservoir during the year was 1,441,622,640 gallons being an increase of 141,856,360 gallons over the amount pumped in 1885, and assuming the number of water users to be 65,000 will give an average daily consumption of about 60 gallons of water for each consumer. This of course includes all the water used for every purpose, such as domestic use, manufacturing, and for extinguishing fires, also water for steam boilers, drinking fountains, sprinkling streets, etc. The total quantity sold by meter measurement amounts to 326,999,950 gallons, an increase over last year of 10,580,900 gallons. The works are all in good condition. All needed repairs have been made together with many improvements.

FILTER GALLERY AND CONDUIT.

An inspection of the filter gallery showed that but a slight amount of sediment had collected on the bottom, while the sides and top were clean and in good condition.

The conduit has been blown off three times this season, in order to carry off the sediment which accumulates on the bottom after every freshet in the river. No repairs have been made on either the gallery or conduit this year.

PUMPING STATION.

The Morris engine has pumped 1,222,150,080 gallons and the Worthington has pumped 219,472,560 gallons of water into the reservoir. No repairs of any account have been made on either of

the engines or boilers. The rear of the coal shed has been extended back nine feet, giving room for storing about two hundred tons more coal than formerly. At the front of the shed, a shop has been built on and fitted up with tools for general repairs, including all the repairs of meters, etc.

The windows in the engine room have been lowered twenty-two inches, and lights of colored glass set between the upper and lower sashes, giving a much better outlook to the room.

An enclosed railing has been placed around the flywheel, and a small entrance door cut through the large doors in front of the building. A large storehouse has been built back of the coal shed, and the anterior portion of the grounds enclosed by a new slat fence.

An examination of the lightning rod on the boiler house chimney, showed it to be so badly corroded as to be practically useless, and after much inquiry and study of lightning rods, it was decided to put on a solid copper rod made by the R. I. Telephone and Electric Co. of Providence. The rod has for a ground connection, the six inch water main on Hampshire street. A new iron ladder has been attached to the outside of the chimney reaching to the top.

The coping around the chimney has been repaired and the cap repainted. The dwelling occupied by the engineer and the one also at the reservoir, were both in a dilapidated condition, but few repairs having been made on them since they were purchased. These have now been put in good repair, painted, papered and shingled, and are now in condition to last many years without much more expense.

HIGH SERVICE.

20,252,722 gallons of water have been pumped into the high service reservoir during the year, an increase of 1,860,684 gallons over last year. No extensions or services have been added to the high service system this year.

RESERVOIR.

For several years usually during the month of February the water in some sections of the city has developed a peculiar odor which has been designated as "swampy" and could be easily detected by any one placing their face close to a fresh drawn basin of water. The reason of this was attributed to the fact that in every case where the smell had been noticed, the reservoir as well as the river had for several weeks previous been covered with ice, leaving no chance for the air to get to the water. Last winter, as an experiment, the gate

connecting the inlet chamber of the reservoir with the 30-inch pipe through which the water flows to the opposite side of the reservoir was closed, and at the mouth of the overflow weir, an apron was built of 2-inch plank 6 inches wide, laid with 1 inch space between each plank, and a 3 inch joist fastened around the rim of the apron. So that as the water is pumped over the weir, it flows into this apron, and drops into the reservoir either through the cracks, or over the sides, and falling from two to six feet according to the height of water in the reservoir, it gets thoroughly aerated before passing into the main, and since this device has been adopted, the swampy smell has disappeared.

The debris remaining from last year's repairs at the reservoir has all been utilized by widening the westerly and part of the northerly slope, making these banks now five feet wider at the bottom of the slope, and three feet wider at the top, the loam being previously removed from the slopes, and replaced again after the debris had been wheeled on and well rolled and puddled. Portions of the slopes and surrounding grounds, were then ploughed and sowed with grass seed. Iron steps made by the No. Chelmsford Foundry Co. have been set at the entrance to the gate house, and a drain of 8-inch Akron pipe with four cesspool connections, has been laid from the Beacon street sewer along the foot of the northern slope a distance of 675 feet.

EXTENSIONS.

Two miles two hundred and forty-three feet of cast iron mains have been laid this year. A twelve-inch main with two expansion joints, has been laid across Merrimack river under the westerly sidewalk of central bridge, and connected with the twelve-inch mains on each side of the river, so that we have now four independent lines leading from the reservoirs to the city proper. A connection controlled by a twelve inch gate has also been made with the 24-inch force main on Sixth street, to the 12-inch main on Bridge street. So that in case of any accident to the reservoir, or in case of a large fire, the water can be pumped directly into the city mains, giving an additional supply to that furnished by the reservoir alone. Connections on both sides of the river at Hunt's falls have been made with the 30-inch main to the 24-inch reserve line, by a system of gates, so that in case of any accident in the river to either the high service or low service mains, the water can in a few moments be switched into the 24-inch reserve line.

LEAKS.

There have been two leaks in joints of the force main, six leaks in joints of the supply mains, one break in pipe on L street. Two blank heads started off, on the high service line, caused by the backing being taken away by parties building a house drain, ten service pipes have broken off, principally occasioned by the settling of sewer trenches, and one twelve-inch special broke on the corporation line on Hall street.

HYDRANTS.

Thirteen new hydrants have been set on extensions. The old style hydrant on Adams street, near Broadway, has been changed for a new flush hydrant, the old style hydrant on Mt. Vernon street near Broadway, and the one on Broadway near school street, also the new flush hydrant on Suffolk street, near Lagrange street, have been discontinued and replaced by new post hydrants. An inspection of every hydrant in the city is made twice every year by the Fire department, who report every hydrant which is not in perfect order. Fifty-nine cases were reported this year, but only twenty-six needed more than slight repairs, and none of them were out of order so but what they could have been used if necessity required.

SERVICES.

241 services have been added this year. 150 old services have been changed for either lead or larger iron, and 22 services have been discontinued and cut off at the main.

The amount of service pipe laid in 1886 is as follows:

$\frac{3}{4}$ inch wrought iron pipe.....	520	feet.

ITEMS OF OTHER WORK DONE.

Two years ago an examination of the trusses supporting the twenty-four-inch main which crosses Concord river under East Merrimack street bridge, showed that they had deflected from a straight line and canted down stream. An examination this year showed that the deflection had increased so much that there was danger of the trusses tripping and letting the pipe into the river. The cause of this was owing to the ends of the trusses resting on loose stones, on both abutments and pier, and as the pipe was originally laid crowning, when the trusses settled the pipe crowded against the timber on the down stream side and caused the trusses to cant. The pipe had to be shored up by timbers reaching from the bottom of the river. The trusses were then brought back into place, and held by braces and rods, also by rods running diagonally from the centers to the up stream end of the abutments and pier. The ends of the trusses were then secured in masonry on a firm foundation, so that no trouble need hereafter be apprehended.

A six-inch blow-off has been laid on Front street, and the mains throughout the city have been blown out twice this year. All the service boxes, hydrants boxes, street gate boxes and gates, have been examined and put in good order. 385 unsound service boxes have been replaced by the pipe service box manufactured by Staples Bros. of this city. 11 decayed hydrant boxes have been replaced by cast iron boxes and 33 street gates were found leaking and were

repaired. A pipe drinking fountain has been set on Branch street near the Franklin school house. The stone troughs at Middlesex Village and on Bridge street in Centralville, have been removed and changed for pipe fountains, and the stone trough in Liberty square has been replaced by a large circular fountain made by the Mott Iron Works of New York.

CONCLUSION.

In closing this report I desire to extend to the President and members of the Water Board my sincere thanks for their uniform courtesy and co-operation in the discharge of the duties of my position.

Respectfully submitted,

HORACE G. HOLDEN, Supt.

Low Service.—Water Pipes Laid in 1886.

ANNUAL REPORT

OF THE

POLICE DEPARTMENT

OF THE

CITY OF LOWELL,

FOR THE YEAR 1886.

LOWELL, MASS.:
HARRINGTON BROS., PRINTERS, SUN OFFICE.
1887.

IN BOARD OF ALDERMEN, Jan. 3, 1887.

Read and ordered on file.

SAMUEL M. CHASE,

City Clerk.

R E P O R T.

*To the Honorable Mayor and Board of Aldermen of
the City of Lowell:*

Gentlemen: I have the honor of herewith presenting for your consideration my second annual report of the doings of and the present condition of the Police Department for the year commencing December 1, 1885, and ending November 30, 1886.

The force at the present time consists of sixty-two regular officers, rank and file, and nine supernumeraries, making a total of seventy-one, including the janitor of the court room. Three of the above supernumeraries were made regular officers November 16, to take effect December 1, the present year, leaving six supernumeraries to fill vacancies and do such other duty as they may be called upon to do. In my judgment six supernumerary officers are enough at any one time to do the work required. During the past year nine supernumeraries reported regularly for duty, and their average pay has been about one-half the pay the regular officers receive. I am informed that some of the supernumeraries who have families to support, have not paid their living expenses with what they have received from the depart-

ment by some hundreds of dollars. Therefore, I recommend that no more supernumeraries be appointed until the present number be made less, either by promotion or otherwise.

Three new day beats are to be added December 1, as follows: One beginning at corner of Market and Central, and including those streets and Prescott, Bridge, Paige, Shattuck streets and vicinity, now patrolled by the officer on postoffice square beat. By this arrangement the officer on duty at the square and post-office will be able to give that locality his constant attention, which the increasing business of that vicinity demands. The second new beat is located in Ward Four, west of Nichols street, and south of Lowell & Nashua Railroad to the city limits. The third new beat is located in Ayers city, including all streets south of Chelmsford street and west of Boston & Lowell Railroad, extending to city line. The increase of population and the frequent calls from the above named localities have convinced me that more officers were needed in the above named places. The force is divided as follows:

HEADQUARTERS.

At headquarters during the day the following are on duty: Chief, Deputy Chief, four Inspectors of Police, (two of which are detailed for detective duty and two for the enforcement of the liquor law), two Warrant Officers, and one Keeper. The above officers report for duty at 7.30 a. m., and remain on duty until 7.30 p. m.

DAY PATROL.

One Sergeant and twelve Patrolmen report for duty at 7.45 a. m., at which time the roll is called by the Sergeant, and at 8 o'clock they go to their respective beats and remain on duty till 7 p. m., one hour being allowed each man for dinner, being so arranged in regard to time as to keep the city well protected, and enable one officer to look after his own and the adjoining beat, or in other words one officer cares for two beats during the dinner hours.

THE NIGHT PATROL.

Consists of the Junior Deputy Chief, two Sergeants, one Keeper, and thirty-one patrolmen.

The Junior Deputy Chief, acting as Captain, and thirty-one Patrolmen report for duty at 6.45 p. m., when the roll is called by the Captain. At 7 p. m., a line is formed by the Sergeant, under the direction of the Captain, and the men are marched out in double file, each repairing to his beat and remaining on duty until 4 a. m., each officer being allowed forty minutes in the station for lunch.

One Sergeant and four Patrolmen report for duty at 11 p. m., and remain on duty until 8 a. m., when they are relieved by the day patrol.

SUPERNUMERARIES.

Report daily at roll call and are detailed to fill vacancies caused by sickness or leave of absence of the regular officers.

PROBATION OFFICER.

Thomas R. Garity, who has served in that capacity for the past three years, still continues to act as Probation officer. His management of cases turned over to him by the court on probation, has in many cases been productive of some good, and at all times satisfactory to the court and prosecuting officer.

CONCLUSION.

I desire to thank Deputy Chief Wood and Howard, Sergeants, Inspectors, and the force generally for their cheerful assistance and the good work done in the department during the past year. Also to his honor Mayor Abbott, and Alderman Crowley, Stanley and Butterworth, Committee on Police, for the courteous treatment I have received at their hands. My official relations with them have been very pleasant and agreeable to me during the year.

I also desire to extend my thanks to Hon. Samuel P. Hadley, Judge of the Police Court, and James F. Savage, clerk, for valuable advice in cases pending before the court.

Respectfully Submitted,

J. G. FAVOR,

Chief of Police.

ANNUAL REPORT

OF THE

CITY SOLICITOR

OF THE

CITY OF LOWELL,

FOR THE YEAR 1886.

LOWELL, MASS.:
HARRINGTON BROS., PRINTERS, SUN OFFICE.
1887.

CITY OF LOWELL.

IN BOARD OF ALDERMEN, April 5, 1887.

Read and ordered on file.

DAVID W. O'BRIEN,

City Clerk.

IN COMMON COUNCIL, April 5, 1887.

Received and ordered on file in concurrence.

WILLIAM J. COUGHLIN,

Clerk.

REPORT.

OFFICE OF CITY SOLICITOR,

LOWELL, February 28, 1887.

To the City Council:

Gentlemen,—The following is a report of the business of this office, so far as relates to suits and proceedings at law, in which the City was a party, pending during the past year. The following actions were pending March 1, 1886:

JOHN M. PEVEY v. CITY OF LOWELL.

MIDDLESEX COMPANY v. CITY OF LOWELL.

(Relating to the Andover, Church and Pond Street Sewers.)

MIDDLESEX COMPANY v. CITY OF LOWELL.

(Relating to the Intercepting Sewer.)

MIDDLESEX COMPANY v. CITY OF LOWELL.

(Relating to the boundary line of land of the City bordering upon the mill pond of the plaintiff in Concord river.)

*MARIA T. STEVENS v. CITY OF LOWELL.

*JULIA A. BUTTERFIELD v. CITY OF LOWELL.

SOLOMON BACHMAN v. CITY OF LOWELL.

*HERBERT E. WEBSTER, Adm'r. v. CITY OF LOWELL.

*SHAW STOCKING COMPANY v. CITY OF LOWELL.

REPORT OF THE CITY SOLICITOR.

- *MARTHA W. SMITH v. CITY OF LOWELL.
ANN ASHWORTH v. CITY OF LOWELL.
*JAMES GUILLINE, Adm'r, v. CITY OF LOWELL.
CYRUS JOHNSON v. CITY OF LOWELL.
*DANIEL GAGE v. CITY OF LOWELL.
*CLARINDA OTIS v. CITY OF LOWELL.
ROSA FOLEY v. CITY OF LOWELL.
*J. Q. A. HUBBARD v. CITY OF LOWELL.
*ANN CARR v. CITY OF LOWELL.
*JULIUS T. ADAMS v. CITY OF LOWELL.
*LOWELL BLEACHERY v. CITY OF LOWELL.
HENRY E. PARKER v. CITY OF LOWELL.
*LAURA E. BLAKE v. CITY OF LOWELL.
*NATHANIEL ALLEN v. CITY OF LOWELL.
MARIA FLYNN v. CITY OF LOWELL.
ANN DONAHOE v. CITY OF LOWELL.
O. A. SIMPSON v. CITY OF LOWELL.
HENRY A. HILDRETH v. CITY OF LOWELL.
BERNARD RILEY v. CITY OF LOWELL.
*ELIZA COWLEY v. CITY OF LOWELL.
MARY A. MCINTIRE v. CITY OF LOWELL.
*HYDE PARK v. CITY OF LOWELL.
*HANNAH REAGAN v. CITY OF LOWELL.
*THOMAS F. HART, Pro Ami, v. CITY OF LOWELL.
*MARY G. ADAMS v. CITY OF LOWELL.
J. M. G. PARKER v. CITY OF LOWELL.

Of the foregoing list of cases those marked with asterisk have been finally terminated as follows, viz :

MARIA T. STEVENS v. CITY OF LOWELL.
JULIA A. BUTTERFIELD v. CITY OF LOWELL.

Petitions for a jury to assess damages alleged to have been caused by the widening of Chelmsford Street. The City Coun-

cil of 1884, passed a resolution awarding to each petitioner, compensation at the rate of twenty-five cents per square foot for the land taken in the widening of the street. The awards made by the Council were accepted by the petitioners, the damages paid, and the cases thereby ended.

HERBERT E. WEBSTER, adm'r, v. CITY OF LOWELL.

Petition for a jury to assess damages alleged to have been occasioned to the estate of the petitioner by the discontinuance of a portion of Hanover Street. The defence of this action was assumed by the Tremont and Suffolk Mills. The case went to the Supreme Court in the year 1884, upon an appeal by the petitioner, from a ruling of the Superior Court; and it came back for trial and was tried at the September sitting of the Supreme Court in the year 1885. The jury assessed damages for the petitioner, and the case went to the Supreme Court on exceptions, taken by the defendant, which have since been overruled.

THE SHAW STOCKING COMPANY v. CITY OF LOWELL.

Petition for a jury to assess damages occasioned by the alleged diversion of water flowing in natural water courses through and over the premises of the petitioner, and used by it for manufacturing purposes. The claim of the petitioner was that the construction of sewer through streets adjoining petitioner's premises had caused the diversion. This case had been pending in Court for several years.

At the last September sitting of the Superior Court, the case was tried before a jury, and the verdict was for the petitioner for \$6,241, which includes interest amounting to \$1,241.

MARTHA W. SMITH v. CITY OF LOWELL.

Tort to recover compensation for injuries received by the plaintiff in falling on ice on French Street. A trial was had at the September sitting of the Superior Court, resulting in a verdict for the City.

JAMES GUILLINE, Adm'r, v. CITY OF LOWELL.

Tort for damages to plaintiff's intestate, a minor son, by reason of falling through an opening in Central Bridge, resulting in loss of his life. Trial at the last September term. Judgment for plaintiff for \$500. The case has gone to the Supreme Court on Exceptions taken by the City.

DANIEL GAGE v. CITY OF LOWELL.

Tort for injuries to plaintiff's horse, occasioned by the alleged defective condition of Pawtucket Street. Trial at the September term, and judgment for the City.

CLARINDA OTIS v. CITY OF LOWELL.

Tort for personal injuries occasioned by the alleged defective condition of Beach Street. Settled without a trial for \$500.

J. Q. A. HUBBARD v. CITY OF LOWELL.

Petition for a jury to assess damages claimed to have been occasioned to petitioner's premises on Lowell Street by the construction of a sewer in 1883. The heirs of the late H. C. Duganne assumed the defence of this case. Disposed of by an entry of "neither party."

ANN CARR v. CITY OF LOWELL.

Tort to recover damages for injuries to person and property, alleged to have been occasioned to plaintiff by reason of the defective condition of a portion of Lawrence Street, on the 21 day of June, 1884. The personal injuries were of a very severe nature, and the settlement made, under all the circumstances disclosed, was deemed advantageous to the City. Settled without a trial for \$600.

JULIUS T. ADAMS v. CITY OF LOWELL.

Petition for a jury to assess damages claimed to have been done to petitioner's premises by the construction of a sewer. Settled without a trial for \$150, without costs.

LOWELL BLEACHERY v. CITY OF LOWELL.

Petition for a jury to assess damages to petitioner's premises and water rights, claimed to have been sustained by laying out and widening Meadowcroft Street in 1883. A proposition of settlement made by the petitioner to accept the award of land damage made by the City Council upon the construction by the City of a Conduit to conduct spring and surface water to the premises of the petitioner, was accepted by the City. The work has been satisfactorily done and the case settled.

LAURA E. BLAKE v. CITY OF LOWELL.

Tort to recover damages for injuries received by the plaintiff in falling on ice on Kirk Street. Tried at the March term of the Superior Court, and judgment for the plaintiff. The case went to the Supreme Court on Exceptions, taken at the trial by my predecessor in office. A rescript has been received stating that the exceptions were over ruled.

NATHANIEL ALLEN v. CITY OF LOWELL.

Tort to recover compensation for injuries alleged to have been received by the plaintiff by falling on ice on Marshall Street. Trial at September term of the Superior Court. Judgment for plaintiff for \$250.

ELIZA COWLEY v. CITY OF LOWELL.

Petition for a jury to assess damages to petitioner's premises occasioned by the extension and grading of Taylor Street. Settled without a trial for \$200, without costs.

HYDE PARK v. CITY OF LOWELL.

This was an action of contract to recover from the City the amount expended for the temporary support of a pauper supposed to have a settlement in Lowell. Settled without a trial for \$25.

HANNAH REAGAN v. CITY OF LOWELL.

Tort to recover compensation for damages occasioned by the alleged defective condition of a sidewalk on Lawrence Street. Tried at the September term of the Superior Court ; verdict for the plaintiff for \$250.

THOMAS F. HART, pro ami, v. CITY OF LOWELL.

Tort to recover compensation for injuries alleged to have been sustained by plaintiff, occasioned by a defect in Keene Street. Settled without a trial for \$150, without costs.

MARY G. ADAMS v. CITY OF LOWELL.

Tort to recover damages for personal injuries, occasioned by an alleged defect in a public street. Tried at the September term of the Superior Court, and judgment for the City.

- (1) MIDDLESEX COMPANY v. CITY OF LOWELL.
- (2) MIDDLESEX COMPANY v. CITY OF LOWELL.

Since the report of the progress of these cases by my predecessor, they have been advanced a stage by the filling of the Master's report in the case number (1), and the preparation of a draft report in case number (2). When the report in the second case is returned into court, these important cases will be in readiness for an immediate hearing. As the right to make use of the Concord River as a depository of sewage, where the sewers empty therein, is involved, it is obvious that the determination of the issue is of great importance to the City.

- (3) MIDDLESEX COMPANY v. CITY OF LOWELL.

This was a bill in equity to restrain the City from trespassing on the premises and water privileges of the plaintiff, by the maintenance of a structure on the land forming a part of the plaintiff's mill pond, in Concord River, and to define the proper boundary line between the premises of the City and the plaintiff. No progress has been made in this case since the answer was filed.

In the following cases on the foregoing list, no progress has been made during the year:

- JOHN M. PEVEY v. CITY OF LOWELL.
- SOLOMON BACHMAN v. CITY OF LOWELL.
- CYRUS JOHNSON v. CITY OF LOWELL.
- ANN ASHWORTH v. CITY OF LOWELL.
- ROSA FOLEY v. CITY OF LOWELL.
- HENRY E. PARKER, pet'r for cert. v. CITY OF LOWELL.
- MARIA FLYNN v. CITY OF LOWELL.
- BERNARD RILEY v. CITY OF LOWELL.

MARY A. MCINTIRE v. CITY OF LOWELL.

ANN DONAHOE v. CITY OF LOWELL.

O. A. SIMPSON v. CITY OF LOWELL.

HENRY A. HILDRETH v. CITY OF LOWELL.

J. M. G. PARKER v. CITY OF LOWELL.

The following actions and proceedings have been brought against the City during the year ending March 1, 1887:

*THE LOWELL DISTRICT TELEGRAPH CO. v. CITY OF LOWELL.

*HANNAH WICKLANDER v. CITY OF LOWELL.

MARY ROYDS v. CITY OF LOWELL.

*JANE A. KENNEDY v. CITY OF LOWELL.

GEORGE A. CHASE v. CITY OF LOWELL.

*MARY HENNESSEY v. CITY OF LOWELL.

MARTHA A. FRANKLIN v. CITY OF LOWELL.

DAVID W. O'BRIEN v. CITY OF LOWELL.

ROBERT B. CAVERLY v. CITY OF LOWELL.

HENRY EMERY v. CITY OF LOWELL.

BENJAMIN PALMER v. CITY OF LOWELL.

HERBERT L. CHURCH v. CITY OF LOWELL.

CHRISTOPHER SHERIDAN v. CITY OF LOWELL.

COLEMAN O'LAUGHLIN v. CITY OF LOWELL.

CHARLES H. BURTT v. CITY OF LOWELL.

SARAH COCHRANE v. CITY OF LOWELL.

LEVI MILNER v. CITY OF LOWELL.

SOLOMON BACHMAN v. CITY OF LOWELL.

JOHN H. HOLDEN et al. v. CITY OF LOWELL.

DANIEL V. HAMBLETT v. CITY OF LOWELL.

JAMES MCGUIRE v. CITY OF LOWELL.

PATRICK MONGOVAN v. CITY OF LOWELL.

BOOTT COTTON MILLS v. CITY OF LOWELL.

MERRIMACK MANUFACTURING COMPANY v. CITY OF LOWELL.

TREMONT AND SUFFOLK MILLS v. CITY OF LOWELL.

THE LOWELL DISTRICT TELEGRAPH COMPANY V. CITY OF LOWELL.

This was an action of contract to recover damages for the breach of an alleged contract between the plaintiff and City wherein it was claimed the City had agreed to pay the plaintiff (\$2220) twenty-two hundred and twenty dollars each year for the term of five years, for the use of what was known as the Police Telegraph System, to be erected and maintained by the plaintiff. The vote authorizing the contract, and the work and material furnished under it, was passed by a majority of the Committee on Police of the Board of Aldermen, in the year 1884. Early in the Municipal year of 1885, the City Council repudiated the contract as invalid, and the system was discontinued. The plaintiffs were notified thereof and requested to remove the apparatus in the Station House. The suit was brought April 24, A. D., 1886, and at the last September term of the Superior Court the plaintiff was non-suited.

November 5, 1886, another suit for the same cause of action was brought against the city, which is now pending.

HANNAH WICKLANDER V. CITY OF LOWELL.

Tort to recover damages for injuries sustained by the plaintiff by reason of an icy sidewalk on Middlesex Street. Settled without a trial for \$400.

MARY ROYDS V. CITY OF LOWELL.

Tort to recover damages for personal injuries occasioned by the plaintiff falling on an accumulation of ice and snow on Bridge Street.

JANE A. KENNEDY V. CITY OF LOWELL.

Tort to recover damages for personal injuries alleged to have been occasioned by the defective condition of Taylor Street.

Trial at the September term of the Superior Court, and verdict for the City.

GEORGE A. CHASE v. CITY OF LOWELL.

Tort for personal injuries alleged to have been occasioned by the falling of a tree, located and growing on Worthen Street, September 3, 1885.

MARY HENNESSEY v. CITY OF LOWELL.

Tort for personal injuries alleged to have been occasioned by an accumulation of snow and ice on Gorham Street. Settled without a trial for \$300.

MARTHA A. FRANKLIN v. CITY OF LOWELL.

Tort for personal injuries alleged to have been occasioned by an accumulation of ice and snow on Sixth Street, February 15, 1886.

DAVID W. O'BRIEN v. CITY OF LOWELL.

Contract to recover the sum of \$380.40, which the plaintiff claims to be his proportion of the license fees received by him as City Clerk of the City of Lowell, for the issue of licenses for dogs. The whole amount of the fees was paid over by him to the treasurer of the County, and this action is to recover the amount authorized in the Statutes to be retained by the Clerks of cities and towns for such fees.

ROBERT B. CAVERLY v. CITY OF LOWELL.

Tort for personal injuries alleged to have been occasioned by a defect in the way on Varnum Street, June 15, 1886.

HENRY EMERY v. CITY OF LOWELL.

Tort to recover damages alleged to have been occasioned to the plaintiff's premises and crops by reason of the overflow of water from a conduit, constituting a part of the water works system in Pawtucketville.

BENJAMIN PALMER v. CITY OF LOWELL.

Contract to recover the balance alleged to be due upon a contract for paving stones furnished the City.

HERBERT L. CHURCH v. CITY OF LOWELL.

Tort for personal injuries alleged to have been occasioned by a defect on Middlesex Street.

CHRISTOPHER SHERIDAN,

COLEMAN O'LAUGHLIN.

Petitions for a jury to assess damage alleged to have occasioned to petitioners' premises, by the change of grade of Chestnut Street. The resolution of the City Council, under which the work was done, was passed in October, 1885.

CHARLES H. BURTT v. CITY OF LOWELL.

Tort to recover damages for personal injuries alleged to have been occasioned by falling, November 20, 1886, upon doorstep, projecting into the way on Middlesex Street. The Hamilton Company have been notified to come in and assume the defence of this suit.

SARAH COCHRANE v. CITY OF LOWELL,

LEVI MILNER v. CITY OF LOWELL,

SOLOMON BACHMAN v. CITY OF LOWELL,

JOHN J. HOLDEN v. CITY OF LOWELL,
DANIEL V. HAMBLETT v. CITY OF LOWELL.

These five proceedings are on application for juries for the assessment of damages alleged, by the petitioners, to have been sustained by them by reason of the widening of Riverside Street by vote of the City Council, passed December 22, 1885.

PATRICK MONGOVAN v. CITY OF LOWELL.

This is an action of tort brought in the United States Circuit Court, Massachusetts District, to recover damages for personal injuries alleged to have been occasioned by the falling of a derrick used in the repair of the high service reservoir. William H. Ward has been notified to come in and defend.

JAMES MCGUIRE v. CITY OF LOWELL.

Tort for personal injuries alleged to have been sustained by the minor daughter of the plaintiff, Alice McGuire, by reason of falling on doorsteps which are claimed to have projected out upon the sidewalk on Cross Street, December 3, 1886.

BOOTT COTTON MILLS v. CITY OF LOWELL,
MERRIMACK MANUFACTURING COMPANY v. CITY OF LOWELL,
TREMONT AND SUFFOLK MILLS v. CITY OF LOWELL.

Petitions to the County Commissioners for the abatement of taxes, in the nature of an appeal from the assessment of tax made by the assessors of the City of Lowell. An extended hearing on the petition of the Boott Cotton Mills was had in February, 1887, and the result has not yet been announced.

The business of this office has increased very rapidly within the last few years, and will, undoubtedly, continue so to do, keeping pace with the growth of the City, and the increase and improvement of its highways and conveniences.

In the near future, it is not unlikely that it may be found necessary for the Solicitor to give his undivided time and attention to the discharge of the duties of his office, and that suitable provision be made for the supply of clerical and other subordinate assistance, proportioned to the multifarious and increasing duties of this responsible office.

In conclusion, I gratefully acknowledge the valuable assistance rendered me in the discharge of my duties, by the various officials and employees of the City, and more especially to Mr. Henry C. Pike, of the Police Department, who has been detailed for special service in this department.

Respectfully submitted,

JOHN J. PICKMAN,

City Solicitor.

ANNUAL REPORT
OF THE
SUPERINTENDENT OF INSTITUTIONS
AT CITY FARM.

1886.

REPORT OF THE SUPERINTENDENT.

INSTITUTIONS AT CITY FARM,

LOWELL, DEC. 31, 1886.

To the Board of Overseers of the Poor of the City of Lowell:

Gentlemen:—In accordance with the rules, I respectfully submit the following as my Fifth Annual Report of the condition of the Institutions together with its statistics.

The number of inmates in the Almshouse January 1, 1886, was 267; 138 Males and 129 Females. During the year there was admitted 321; 159 Males and 162 Females, making the whole number for the year 588. Of this number there were discharged 316; 157 Males and 159 Females, leaving the number remaining December 20, 1886, 272; 123 Males and 149 Females. The average number supported for the year was 262. There were during the year twelve births in the Alms-house, 6 Males and 6 Females. Of those discharged from the Almshouse, Forty died, 18 Males and 22 Fe-

males, of the following diseases: Consumption 13, Debility 5, Old Age 3, Paralysis 5, Apoplexy 2, Brights 2, Cancer 2, Heart Disease 1, Brain Disease 1, Syphilis 4.

INSANE.

The number of insane in the Almshouse January 1, 1886, was 81; 22 Males and 59 Females. During the year there were admitted 31; 9 Males and 22 Females, making the whole number for the year 112; 32 Males and 80 Females. Of this number there were discharged during the year 32, leaving the number remaining Dec. 20, 1886, 80; 22 Males and 58 Females. Of the number of insane discharged, there were 10 that died.

The above statistics of the insane are also included in those of the Almshouse. The number of deaths in the Almshouse (40) covers all the institutions. The whole number in the various institutions during the year being 920. The health of the inmates have been good. Dr. Colton has been prompt in his attendance.

WORKHOUSE.

The number of inmates January 1, 1886 was 39; 16 Males and 23 Females. The number committed during the year was 188; 42 Males and 146 Females. Of this number there were discharged during the year, 175, ma-

king the whole number 227, leaving the number December 20, 1886, to be 46, with 6 absconded. The average number supported during the year was 40. The number pardoned during the year was 3. The cause of committments was as follows; 114 for drunkenness, 7 for second offence, 37 for third offence, 24 common drunkard, 3 for larcency, 2 vagrants, 1 assault and battery. The longest sentence was one year, the shortest, for 30 days.

The oldest person committed was 76 years, the youngest, 18 years. Of those committed, 118 were born in Ireland, 40 in America, 18 in England, 9 in Scotland, and 3 in Canada.

EXPENDITURES.

The average number supported in the Almshouse being 262, in the workhouse 40, in the House of Employment for juvenile offenders 34, makes the whole average in all the institutions 336. The amount of bills paid for all expenses at the City Farm was forty-one thousand eighty-two dollars and five cents, (\$41,082.05). From this I deduct the following items: eight thousand four hundred and sixty-eight dollars (\$8,468.00) the value of four thousand two hundred and sixty-three provision orders, delivered as per order of the Secretary of the Overseers of the Poor. Four hundred and eighty dol-

lars and fifty-three cents, the value of paper bags, baskets and delivery of the same. \$793.08 sales from the farm. \$3,155.68 the amount for board of persons in the institutions. \$2,943.00 coal, wood and provisions on hand, which leaves the actual cost for the support of the City's poor \$25,241.76, a yearly cost of \$75.13, or a weekly cost of \$1.44. For the statistics of the School I refer you to the Teacher's report. I tender to the Board my thanks; also to the officers.

Respectfully,

ALBERT PINDAR,

Superintendent.

During the summer months the boys rise, perform their ablutions, and have breakfast one hour earlier and have supper, recess, prayers, and retire one-half hour later.

As no man who is thoroughly in earnest in a certain line of work is ever satisfied with the amount he is able to accomplish, yet we feel that the year as a whole has been one of fair success.

We have done all in our power to further every interest, not only of the school, but in every other department of work we have been called upon to assist in performing connected with our institution.

It gives me great pleasure to say that my intercourse with the Superintendent and Matron during the year has been very pleasant; to them I am indebted for many kind acts which have been of great value to me in the performance of my duties.

Perfect harmony has characterized the year's work between myself and assistant, Mr. M. Sexton.

I have found him at all times ready and willing to

perform his share of our work. I can truly say of him that he has been earnest and faithful in the performance of every duty.

In closing this report, allow me, if you please, Gentlemen, to return my hearty thanks to each one of you, for the very kind and courteous manner I have been treated by your Board.

WM. A. LANG.

ANNUAL REPORT
OF THE
FREE DISPENSARY PHYSICIANS

1886.

REPORT OF DISPENSARY PHYSICIANS.

FREE DISPENSARY ROOMS,

LOWELL, February 1, 1887.

To the Overseers of the Poor of Lowell:

Gentlemen:—The physicians of the Free Dispensary present to you their report for the year 1886. The Dispensary Staff consisting of the following twelve physicians, chosen by the Overseers of the Poor, Drs. Allen, Colton, Eaton, W. A. Johnson, Huntress, McOwen, Patterson, Ricker, H. J. Smith, C. P. Spaulding, Sullivan and Viles, attended to their duties during the year and felt well repaid for their work in the fact that they have been of service to the sick poor of Lowell.

We think that there have been very few cases of imposition here, thanks to the excellent care of your secretary. Very few patients, if any, come here who can afford to pay for medical treatment. Most of the cases are of genuine sickness and deserving charity.

The whole number of new prescriptions filled at the

Dispensary was 4486. Sixteen hundred and one (1601) prescriptions were repeated during the year.

The whole number of patients treated here was 608. Of these the diagnosis was given in 467 cases.

The following list comprises the principal diseases and the number of cases of each.

Bronchitis	76
Accident	31
Phthisis	31
Rheumatism	26
Dyspepsia	25
Debility	18
Syphilis	15
Ulcers	15
Disease of Heart	9
Gonorrhœa	8
Scrofula	7
Extraction of teeth	7
Diarrhœa	6
Ascarides	6
Prolapsus Uteri	5
Leucorrhœa	4
Eczæma	4
Lumbago	3
Hæmorrhoids	3
Pleurisy	3
Tonsillitis	2
Congestion of Liver	2
Ottorrhœa	2
Orchitis	2

Wm. T. Loftus has discharged the duties of drug clerk to the satisfaction of the Staff.

We desire to extend our thanks to Messrs. Cushing, Lovejoy and Elliott, the Dispensary Committee of your Honorable Board, who have attended to all the wants and suggestions of the Dispensary Physicians.

Respectfully submitted,

LEONARD HUNTRESS,

Secretary for the Board.

REPORT OF THE
PERSONAL PROPERTY.

The following is a schedule of Personal Property under my charge Dec. 31, 1886, belonging to the appropriation for Roads and Bridges :

1 engine and tools,	14 single carts,
Blacksmiths' tools and stock,	2 new cart bodies,
5 tons of hay,	11 tool chests,
6 tons rye straw,	1 watering cart,
135 bushels of oats,	4 wood wagons,
35 bushels of corn,	1 pauper wagon,
6 bags of meal,	2 lumber wagons,
43 horses,	1 road builder,
17 sets double harnesses,	1 hand cart,
18 sets single harnesses,	2 stone drags,
1 set lead harnesses,	1 pair draft wheels,
36 feed baskets,	5 single wagons,
116 curry and brushes,	1 committee wagon,
56 collars,	17 double wood sleds,
45 halters,	9 snow scrapers,
60 blankets,	2 snow ploughs,
51 surcingles,	3 ploughs,
1 horse sling,	2 single sleighs,
5 horse covers,	2 stone truck drags.
3 buffalo robes,	2 street rollers,
16 double carts,	2 street sweepers,

5 street rakes,	2 scythes,
7 forks,	106 stake chains,
2 augers,	24 draft chains,
1 new pung,	15 wheelbarrows,
4000 ft. old bridge lumber,	131 shovels,
6 horse's water pails,	1 grindstone,
150 ft. of $1\frac{1}{4}$ in. rope,	1 boring machine,
11 steel wedges,	12 grain rakes,
35 stone cutter's points,	3 watch tackles,
2 trowels,	1 set corner stone,
4 paving mauls,	2 electric batteries,
922 lbs. steam drills,	2 stone wheelbarrows,
44 plug drills,	1 large platform scale,
31 crowbars,	2 corn brooms,
10 tramping bars,	6 stone bounds,
68 snow shovels,	3 anvils,
44 hoes,	1 coal screen,
10 lanterns,	3 long-handled shovels,
15 oil cans,	3 wash-tubs,
12 pails,	2 ice chisels,
134 picks,	4 vises,
4 handsaws,	6 monkey wrenches,
10 axes,	2 bitstocks,
3 adzes,	6 wooden mauls,
2 jack screws,	5 mauls, long handles,

11 wheelbarrow frames,	1 hatchet,
7 wheelbarrow wheels,	4 stone rakes,
200 lbs. nails,	58 pick handles,
118,000 feet oak lumber,	50 feet rubber hose,
1 feather duster,	16 drilling spoons,
1 cask spikes,	2½ barrels of oil,
7,856 feet 3-inch plank,	215 feet flagging stones,
1,000 feet spruce lumber,	2 tons fine feed,
117 street signs,	1 jaw for crusher,
10 gallons blue paint,	2 kegs powder,
4 coal hods,	20 bundles broom stuff,
4 clocks,	3 hogs,
2 cross-cut saws,	1 stone crusher building,
3 ladders,	8 chairs,
5 powder cans,	25 hammer handles,
3 hay cutters,	4 street brooms,
3 derricks and rig,	50 hammers,
4 spirit levels,	1 stone crusher,
1 small platform scale,	2,068 feet edge stone,
3 tubs,	2 writing desks,
2 long levels,	2 lap robes.
5 stoves,

1,000 feet leather hose,	5 tubs,
19 sheeting caps,	10,000 feet spruce lumber,
2 electric batteries,	8 catch basin dippers,
4 blacksmith's forges,	100 feet rubber hose,
3 anvils,	12 pick handles,
2 vises,	8 dozens lantern globes,
3 sets tackles and falls,	25 gallons of oil,
3 crabs,	1 grindstone,
5 sets shear poles,	5 hoisting tubs,
10 chains,	35 lbs. high explosive powder,
2 50-foot tapes,	1 sand screen,
3 steel squares,	37 steel wedges,
3 wheelbarrows,	1 portable kettle.
13 wooden mauls,	

REMARKS.

During the past year, it was found necessary to entirely rebuild the woodwork on Pawtucket Bridge, and the bridge at the present time is practically as good as new. Central Bridge has been re-planked, and is in good repair for several years to come. The laying out and grading of Pine Street at a cost of \$1,675, Parker Street at a cost of \$1,875, and Humphrey Street at a cost of \$450, were done by contract. The numerous extensions of the Horse Railroad tracks have been very costly to this department, owing to the fact that the tracks have to be laid at grade, and very few, if any, of the streets were at their true grade at the time. All streets which have been graded the past year, have been laid at true grade. Many of the sidewalks had to be rebuilt, on account of the rough, uneven and dangerous places in them. The work done was mostly on brick walks. It was found necessary to top-dress a large number of concrete walks. Notwithstanding the increase of wages this year, over last, the streets which were graded by contract, the unexpected expense on Pawtucket and Central Bridges, the unusually large amount of work caused by the Horse Railroad, the ordinary expenses of the department have been kept at a very low basis.

Again, I would most respectfully suggest the need of a steam road roller. It would be of great service in rebuilding and rolling the different streets. The stone crusher has been entirely overhauled, and is in splendid running order. The time is not far distant when a portable crusher will save the city many dollars in labor and teaming. On streets where the travel is heavy, nothing but paving should be laid ; and it is advisable to macadamize as much as possible, in preference to grading, as it is almost an impossibility to procure suitable material for grading. Western Avenue, near the Freight Depot, is in bad condition, for which there is no lasting remedy but granite paving. Granite crossings are superior to concrete, and less repairs being needed, are more desirable for travel, etc. Men have been detailed on the principal streets, whose duties are to keep the

crossings clean. Their work is satisfactory, and ought to be continued and extended the coming year.

ACKNOWLEDGEMENTS.

In closing this report, I desire to acknowledge my obligations to His Honor the Mayor, for his constant kindness, counsel and advice. To the gentlemen of the City Council I beg to tender sincere gratitude for the consideration and courtesy shown the departments ; and especially, to thank the Committees on Roads and Bridges, and Sewers and Drains, for their uniform helpfulness and encouragement throughout the year. I wish also to express my sense of the fidelity of the Assistant Superintendent, Foremen, Time Keeper and subordinates under my charge, and to testify to their diligent service in behalf of our city. I also wish to thank the City Engineer and his assistants for the kindness and courtesies extended by them throughout the year.

All of which is respectfully submitted,

C. H. HANSON,

Superintendent of Streets.

Balance undrawn Jan. 1, 1887.....	\$ 3,871 57
	<u>\$14,496 75</u>

REPAIRS.

The expenditures of this department have been for repairs, the principal ones being as follows:

GOVERNMENT BUILDING.

During the year there has been made an addition to the Treasurer's office, by building a one-story projection on the back side. It is of brick and is supported by iron columns and beams.

The old school committee room has been fitted up for the assessors and a door cut through into the old office.

The room formerly occupied by the Water Board has been thoroughly remodeled and fitted up for the School Committee.

The room formerly occupied by the Superintendent of Schools has been annexed to the City Engineer's office.

HUNTINGTON HALL.

The wood work has been painted, walls have been whitened, and anti-rooms whitened.

MARKET BUILDING.

The wood work of the drill hall has been painted, grained and varnished, the walls have been tinted, and gun rack fitted up for the High School Battalion.

CITY STABLE.

A new floor has been laid in main stable, and other general repairs made.

The principal expenditures were as follows:

Pay rolls.....	\$5,690 61
Superintendent's salary.....	1,500 00
Otis, Allen & Son, lumber.....	63 42
A. L. Brooks & Co., lumber and mouldings.....	177 84

The following are the principal changes in this department:

HIGH SCHOOL.

Walls have been whitened, wood work in hall painted, roof painted, fences rebuilt.

GREEN SCHOOL.

The heating arrangement has been changed from indirect to direct heating, basement concreted, inside wood work has been given a coat of varnish and shellac, and water closets refitted.

MOODY SCHOOL.

Basement has been concreted and boiler setting repaired.

REPORT OF THE
HIGHLAND SCHOOL.

Walls and ceilings have been colored, basement has been concreted, water closets refitted, and a bell weighing 1500 placed in the tower for school and fire purposes.

EDSON SCHOOL.

Part of the building has been whitewashed and the blackboards repaired.

VARNUM SCHOOL.

An addition of two rooms and a private office for Principal has been made, it is of brick and is two stories high, yard has been regraded and a bank wall and fence built on south side.

COLBURN SCHOOL.

The four lower rooms and hallway have been resheathed, new windows have been put in, and the entire wood work (inside) has been painted, grained and varnished, the outside has received two coats of paint, the steam fitting in lower rooms has been renewed, and in the upper rooms the coils have been straightened up.

BUTLER SCHOOL.

Basement has been whitewashed and double windows put on two rooms.

BARTLETT SCHOOL.

Four ceilings have been newly lathed and plastered, all of the walls have been whitewashed, all of the inside

wood work has been painted and varnished, and the concrete walks repaired and enlarged. The furniture has been partly renewed.

PAWTUCKET SCHOOL.

Roof has been partly re-slated and the outside wood work on the roof and towers repainted.

DOVER STREET.

Walls and ceiling colored.

SCHOOL STREET.

Walls and ceilings colored.

CHARLES STREET.

Painted, grained, varnished, and whitewashed.

CABOT STREET.

Painted, grained, varnished, and whitewashed.

HIGH STREET.

Whitened and colored.

POND STREET.

Water closets refitted.

WEST SIXTH

Water closets put in basement.

COMMON STREET.

Whitened and colored.

ROCK STREET.

Repainted and new fences built.

AMES STREET.

New walks concreted.

MANN SCHOOL.

Whitewashed throughout.

WEED STREET.

This is a new four-room primary, the two lower rooms are finished and the upper ones only plastered. The house is of wood with a brick foundation. The dimensions of the main building are 72 ft. 10 inches by 31 ft. 4 inches. There is a projection on front for stair and hallway 31 ft. 4 inches by 20 ft. 9 inches and a porch on each side of entrance. The finish is white-wood stained cherry. The building is heated by steam. Total cost, land and building, \$9,994 31.

The principal expenditures were as follows:

Pay rolls, janitors.....	\$14,112	45
Pay rolls, schoolhouse	4,423	46
Otis Allen & Son, lumber.....	42	68

ANNUAL REPORT

OF THE

SEALER OF WEIGHTS AND MEASURES

OF THE

CITY OF LOWELL,

FOR THE YEAR 1886.

LOWELL, MASS.:
HARRINGTON BROS., PRINTERS, SUN OFFICE.
1887.

CITY OF LOWELL.

IN BOARD OF ALDERMEN, April 5, 1887.

Read and ordered on file.

DAVID W. O'BRIEN,

City Clerk.

REPORT.

SEALER OF WEIGHTS AND MEASURES,
OFFICE, No. 57 MARKET ST.,
LOWELL, MASS., March 14, 1887. }

To the Honorable Mayor and Board of Aldermen:

Gentlemen:—From the 13 of March, 1886, to the above date, I have collected for fees: \$178.81, less trucking, \$10.08, balance \$168.73, which I paid to the City Treasurer. I have tested weights, measures and balances as follows:

OUTSIDE THE SEALER'S OFFICE.

Weights, . . .	2,008	of these 143 were light and 2 heavier than standard
Counter balances, . . .	256 "	" 10 condemned weighed light of standard
Platform " . . .	158 "	" 12 " " " " "
Spring " . . .	36 "	" 18 " " " " "
Butchers " . . .	39 "	" 2 " " " " "
Coal and track balances .	33 "	" 14* " " 1 heavier than "
Weighing beams . . .	2 "	" 1 " " lighter " "
Wet measures . . .	28 "	" 5 " smaller than "

*The track and coal scales that weighed over 5000 lbs. and were condemned: were 6 coal scales giving light weight, 1 Public weigher's Scale giving weight heavier than standard, 7 belonged to the differ-

ent Corporations, and gave light weight. They have all been repaired, made to conform to the standard and sealed. All the spring balances are used by butchers; they are fraudulent devices for weighing and should be prohibited by ordinance from being used within the city limits.

TESTED AND SEALED AT THE SEALER'S OFFICE.

Weights	588	of these 31 were condemned weighed lighter than standard
Counter balances	85	" " 2 " "
Platform	. 51	" " 5 "
Spring	. 11	" " 4 "
Butchers	. 3	" I was "
Wet Measures	. 123	" " 9 were smaller than standard
Dry Measures	. 13	" " Q was condemned
Steelyards	. 2	" I " "
Weighing beams	2	" " 0 " "
Whole number of weights tested.....		2,596
Whole number of balances of all kinds.....		678
Whole number measures, wet and dry.....		164

I have charged no fees for weights, measures or balances brought into the Sealer's office, and none for weights, measures and balances condemned and tested outside the Sealer's office.

On assuming the duties of the office, I was surprised that the Second City of the Commonwealth did not possess a better set of balances, for the use of the Sealer of Weights and Measures. The balances were old and rusted and not fit for the accurate testing and adjusting of weights.

When I told His Honor the Mayor that they were worthless, he, with Aldermen Puffer and Penniman, of the Committee on Weights and Measures, gave orders to purchase a new set, which were made by Fairbanks & Co., of St. Johnsbury, Vermont, and with proper care can be used for years.

The City should have a double set of weights for the use of the Sealer of Weights and Measures. For where there is only a single

set, and it always in use, the weights get light from wear and there is no chance for time to have them repaired and made to conform to the standard.

I would commend to your Honorable Body the need of a public office, in some of the City's buildings, for the Sealer of Weights and Measures. Where business men could come, and where weights belonging to the City could be kept, and not carried on the appointment of every new Sealer to their homes or places of business.

I would call the attention of your Honorable Body to the fact that there are no ordinances to enforce the collection of transportation, and that in your wisdom you will pass such ordinances, as without them I cannot collect transportation and the city will have to pay it.

Thanking his Honor the Mayor, and Aldermen Puffer and Penniman, of the committee on Weights and Measures, for their courteous manners and willingness to supply me with correct instruments.

Respectfully Submitted,

JAMES T. MURRAY,

City Sealer.

ANNUAL REPORT

OF THE

SUPERINTENDENT OF STREET LAMPS

OF THE

CITY OF LOWELL

FOR THE YEAR 1886.

LOWELL, MASS.:
CAMPBELL & HANSOM, PRINTERS.
1887.

CITY OF LOWELL.

IN BOARD OF ALDERMEN, Jan. 17, 1887.

Read and ordered on file.

DAVID W. O'BRIEN,

City Clerk.

REPORT.

LOWELL, January, 1887.

The Mayor and Board of Aldermen.

GENTLEMEN:—Herein is submitted the Annual Report of the Superintendent of Street Lights for the year ending December 31st, 1886.

The working force under the direction of the Chief of the Fire Department consists of a foreman, six men and twenty-nine boys; the men (with one exception) have, in addition to their regular duties of cleaning the lamps, set and fitted up sixty-six gas and forty-seven kerosene posts, and have changed location and reset fifty posts the past year; the boys light and the police put out, except thirty-seven gas lights which are on the outskirts, which are put out by a man employed for that purpose by the Lighting Department. The foreman and captain of police keep the time, size, burner, etc.

The kerosene lamps are contracted for with the Wheeler Reflector Co. of Boston, at 5 $\frac{1}{2}$ cents per night, they to furnish reflector, lamp, oil, and furnish glass, after once broken.

There are at present seventy-five electric street lights, paid for by the city at 60 cents per light.

This department has at present 1286 lights: 876 gas, 335 kerosene (the kerosene substituted for gasoline during the past summer), and seventy-five electric lights. There have been five electric lights added during the year; there have been seventy-three gas lights added during the year, sixty-six of which have been new settings, the other seven have been placed back on the old posts displaced by the electric. The size of burners vary from four feet to eighteen feet, according to locality.

There have been 47 kerosene lamps added during the year, and several have been taken out and replaced by gas, making up to date 335 in number.

There are about 140 lamp posts piped and ready for use, if wanted, that were discontinued on account of electric lights.

The expense of lighting the government building, ward rooms, armories, Huntington and Jackson Halls, and the gas consumed by the thirty-eight corporation lights, are charged to this department.

The locations of gas lights added during the year are as follows:

NEW SETTINGS.

CITY DOCUMENT, 1886.

SALARIES OF THE OFFICERS

OF THE

CITY OF LOWELL.

FOR THE YEAR 1887.

LOWELL, MASS.:
CITIZEN NEWSPAPER COMPANY, 35 MERRIMACK STREET.

1886.

CITY OF LOWELL.

In the year eighteen hundred and eighty-six.

RESOLUTION

ESTABLISHING THE SALARIES OF OFFICERS OF THE CITY OF
LOWELL FOR THE YEAR 1887.

*RESOLVED by the Board of Aldermen and
Common Council of the City of Lowell, in
City Council assembled, as follows:—*

The salaries of the several city officers for that portion of the year beginning on the first of January, and ending on the thirty-first day of December, one thousand eight hundred and eighty-seven, shall be at the rate herein mentioned; to be paid monthly, unless herein otherwise ordered.

*Section 1. The salary of the MAYOR shall ~~MAYOR.~~
be at the rate of two thousand dollars per
annum.*

City Clerk. *Sect. 2.* The salary of the CITY CLERK shall be at the rate of eighteen hundred dollars per annum.

City Treasurer. *Sect. 3.* The salary of the CITY TREASURER shall be at the rate of twenty-five hundred dollars per annum, for performing the duties of City Treasurer and Collector of Taxes. He shall annually give a bond in the sum of fifty thousand dollars, with good and sufficient sureties, satisfactory to the Mayor and Aldermen, for the faithful performance of his duties, and to account for all sums of money received in the sales of Water Bonds, and the collection of Water Rates, and in the capacity of City Treasurer and Collector of Taxes.

Auditor of Accounts. *Sect. 4.* The salary of the AUDITOR OF ACCOUNTS shall be at the rate of fifteen hundred and fifty dollars per annum.

City Solicitor. *Sect. 5.* The salary of the CITY SOLICITOR shall be at the rate of seventeen hundred dollars per annum, which shall be in full for all services rendered the city.

Civil Engineer. *Sect. 6.* The salary of the CIVIL ENGINEER shall be at the rate of twenty-five hundred dollars per annum, which shall be in full for

services as Civil Engineer and Engineer of the Water Board; and he shall devote his whole time to the service of the city. He shall be allowed such assistance as the Chairman of the Joint Standing Committee on Streets, the Chairman of the Standing Committee on Sewers, and the President of the Lowell Water Board may determine.

Sect. 7. The salary of the CITY PHYSICIAN AND SUPERINTENDENT OF BURIALS shall be at the rate of five hundred dollars per annum, which shall be in full for all services rendered the city, including his duties as a member of the Board of Health.

Sect. 8. The salary of the LIBRARIAN OF THE CITY LIBRARY shall be at the rate of fifteen hundred dollars per annum.

Sect. 9. The salary of the CLERK OF THE COMMON COUNCIL shall be at the rate of two hundred and fifty dollars per annum.

Sect. 10. The salary of the CITY MESSENGER shall be at the rate of one thousand dollars per annum.

Sect. 11. The salary of the MEASURER OF MEASURED WOOD AND BARK.

SALARIES.

WOOD AND BARK, in the rear of the Market House building, shall be at the rate of six hundred dollars per annum, and he shall account for all fees received by him in his official capacity; shall pay the same into the treasury monthly, and at the same time make a report of the amount so paid to the Auditor of Accounts; and also shall be required to devote daily to his duty such time as the Mayor may direct. The salary of any additional measurers of wood and bark shall be at such rate as the Mayor and Aldermen may, from time to time, determine; *provided*, that the same shall not exceed the amount of fees received.

President
of the Low-
ell Water
Board.

Sect. 12. The salary of the PRESIDENT OF THE LOWELL WATER BOARD shall be at the rate of four hundred dollars per annum.

Sect. 13. The Joint Committee on Accounts and the Joint Committee on Finance may provide such clerical assistance in the offices of the City Clerk, City Treasurer, Auditor of Accounts, and Assessors of Taxes, as may be necessary, the expense thereof to be charged to the Reserved Fund. The Directors of the City Library may provide such assistance to the

Librarian of the City Library as may be necessary, the expense thereof to be charged to the Appropriation for Library. The Joint Committee on Military Affairs may provide such clerical assistance as may be necessary in the distribution of State Aid; the expense thereof to be charged to the Reserved Fund.

POLICE.

Sect. 14. The salary of the CHIEF OF POLICE shall be at the rate of eighteen hundred dollars per annum.

Sect. 15. The salaries of the DEPUTY CHIEFS shall be at the rate of fourteen hundred dollars per annum each, payable fortnightly.

The salaries of the INSPECTORS OF POLICE, detailed for detective duty, shall be at the rate of twelve hundred dollars per annum each, payable fortnightly.

The compensation of the SERGEANTS OF POLICE, and INSPECTORS detailed for liquor duty, shall be at the rate of three dollars per day each, payable fortnightly.

Night
Police
Officers.

The compensation of DAY and NIGHT POLICE OFFICERS shall be at the rate of two dollars and seventy-five cents per day each, payable fortnightly.

Sect. 16. All fees received by the officers mentioned in the two preceding sections, for attendance as witnesses, or for any other service in an official capacity, shall be paid by the officer receiving the same to the City Treasurer; and said officer shall, at the same time, report to the Auditor of Accounts the amount thus paid; *provided, however,* that said officers need not account for any fees for travel and attendance before the Supreme Judicial and Superior Courts as witnesses.

The Stand-
ing Justice
of the
Police
Court of
Lowell.

Sect. 17. THE STANDING JUSTICE OF THE POLICE COURT OF LOWELL shall be paid at the rate of one hundred dollars per annum, for receiving complaints, issuing warrants, and trying cases under the Forty-eighth Chapter of the Public Statutes, or any subsequent Act or Ordinance concerning truant children and absentees from school.

SUPERINTENDENTS AND INSPECTORS.

Sect. 18. The salary of the SUPERINTENDENT OF STREETS shall be at the rate of eighteen hundred dollars per annum. The city shall furnish a horse for his use.

Sect. 19. The salary of the SUPERINTENDENT OF PUBLIC BUILDINGS shall be at the rate of fifteen hundred dollars per annum. The city shall furnish a horse and conveyance for the use of himself and the men under his charge.

Sect. 20. The salary of the SUPERINTENDENT OF THE WATER WORKS shall be at the rate of sixteen hundred dollars per annum; and the city shall furnish a horse and carriage for his use.

Sect. 21. The salary of the SUPERINTENDENT OF CITY SCALES shall be at the rate of two hundred dollars per annum; and he shall pay into the City Treasury all moneys received for fees.

The salary of any additional weigher of hay and other articles shall be at such rate as the Mayor and Aldermen may, from time

to time, determine; *provided*, that the same shall not exceed the amount of fees received.

Fish Warden. *Sect. 22.* The salary of the FISH WARDEN shall be at the rate of forty dollars per annum; and the salary of POUND-KEEPER shall be at the rate of twenty-five dollars per annum.

Sealer of Weights and Measures. *Sect. 23.* The salary of the SEALER OF WEIGHTS AND MEASURES shall be at the rate of three hundred dollars per annum and all fees received by him shall be paid into the city Treasury monthly, and he shall, at the same time, report to the Auditor of Accounts the amount of such payment.

Secretary of the Board of Overseers of the Poor. *Sect. 24.* The salary of the SECRETARY OF THE BOARD OF OVERSEERS OF THE POOR shall be at the rate of one thousand dollars per annum.

Board of Health. *Sect. 25.* The salary of the appointed members of the BOARD OF HEALTH shall be at the rate of five hundred dollars per annum each.

REGISTRARS OF VOTERS.

Registrars of Voters. *Sect. 26.* The salary of the appointed REGISTRARS OF VOTERS shall be at the rate

of four hundred dollars per annum each. They shall receive their pay in equal amounts, in the months of October, November, and December.

ASSESSORS' DEPARTMENT.

Sect. 27. The salary of the CHAIRMAN ^{Chairman of Board of Assessors.} OF THE BOARD OF ASSESSORS shall be eleven hundred dollars per annum; and the salary of the SECRETARY OF THE BOARD OF ASSES- ^{Secretary and other Assessors.} SORS shall be ten hundred and fifty dollars per annum, and he shall keep a record of all abatements and changes in tax bills; and the salary of each of the other Assessors shall be ten hundred dollars per annum; and the said Assessors shall make out and distribute the tax bills. The Assessors shall devote their whole time to the service of the city. They shall jointly make a valuation of the real estate in the city, and enter the same in a book to be kept for mutual reference, the same to be done before entering on a subdivision of their duties of assessing in May.

FIRE DEPARTMENT.

Sect. 28. The salaries of the several members of the Fire Department for the year beginning April 1st, one thousand eight hundred and eighty-seven, shall be as herein mentioned, to be paid semi-annually, unless otherwise ordered.

Chief
Engineer.

The salary of the CHIEF ENGINEER shall be at the rate of fifteen hundred dollars per annum, payable monthly, which shall be in full payment for all services which may be required of him by the City Council; and he shall devote his whole time to the duties of his office.

First
Assistant
Engineer.

The salary of the FIRST ASSISTANT ENGINEER shall be at the rate of two hundred and twenty-five dollars; and of the other Assistant Engineers at the rate of two hundred dollars each, per annum.

Secretary
of the
Board of
Engineers.

The SECRETARY OF THE BOARD OF ENGINEERS, who shall be a member of the Board, shall receive twenty-five dollars additional, which shall be in full payment for all the services which may be required of him by the

Mayor and Aldermen, the Chief Engineer, and the Board of Engineers.

The FOREMEN of the respective Hose, Hook foremen. and Ladder, and Steam Fire Engine Companies shall be paid at the rate of two hundred dollars each, per annum.

DRIVERS of Steamers, Hook and Ladder, drivers. Horse Hose Carriages, and Protective Wagon, who shall perform all the duties of Stewards, and all other permanent men shall be paid two dollars and fifty cents per day, payable fortnightly.

ENGINEERS OF STEAM FIRE ENGINES shall Engineers of Steam Fire Engines. be paid at the rate of two hundred and twenty-five dollars per annum.

ASSISTANT ENGINEERS OF STEAM FIRE ENGINES shall be paid at the rate of one hundred and seventy-five dollars per annum. Assistant Engineers of Steam Fire Engines.

All other MEMBERS of Steam Fire Engine, Members. Hose, and Hook and Ladder Companies, shall be paid at the rate of one hundred and fifty dollars per annum each, with the exception of Pawtucketville and Ayer's City Hose Companies, the pay of whose members shall be twenty-five dollars per annum each.

Sect. 29. Whenever any person in the employment of the city shall demand payment of his salary, or any part thereof, it shall be the duty of the Auditor and City Treasurer to deduct therefrom any and all sums of money due from such officer to the city.
